“Gripping and timely.” —People “The YA debut we’re most excited for this year.” —Entertainment Weekly “A book that knocks you off your feet while dropping the kind of knowledge that’ll keep you down for the count. Prepare to BE slain.” —Nic Stone, New York Times bestselling author of Dear Martin and Odd One Out Ready Player One meets The Hate U Give in this dynamite debut novel that follows a fierce teen game developer as she battles a real-life troll intent on ruining the Black Panther–inspired video game she created and the safe community it represents for Black gamers. By day, seventeen-year-old Kiera Johnson is an honors student, a math tutor, and one of the only Black kids at Jefferson Academy. But at home, she joins hundreds of thousands of Black gamers who duel worldwide as Nubian personas in the secret multiplayer online role-playing card game, SLAY. No one knows Kiera is the game developer, not her friends, her family, not even her boyfriend, Malcolm, who believes video games are partially responsible for the “downfall of the Black man.” But when a teen in Kansas City is murdered over a dispute in the SLAY world, news of the game reaches mainstream media, and

SLAY is labeled a racist, exclusionist, violent hub for thugs and criminals. Even worse, an anonymous troll infiltrates the game, threatening to sue Kiera for “anti-white discrimination.” Driven to save the only world in which she can be herself, Kiera must preserve her secret identity and harness what it means to be unapologetically Black in a world intimidated by Blackness. But can she protect her game without losing herself in the process? A radical anthropologist studies the global justice movement. A totalitarian regime has ordered all books to be destroyed, but one of the book burners suddenly realizes their merit.

**THE YEAR BY The New York Times Book Review • O: The Oprah Magazine • The Washington Post • People • Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly** In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation ’ s history and current crisis. Americans have built an empire on the idea of “ race, ” a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates ’ s attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children ’ s lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

A New York Times, USA Today, and national indie bestseller. A Feast of Wonder! A supplemental textbook for middle and high school students, Hoosiers and the American Story provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America 's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana 's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

The Serpent King

Prepare to have your conception of truth rocked to its very foundation. It is the year 2004. Violent crime is the number one political issue in America.

Now, the Swift and Sure Anti-Crime Bill guarantees a previously convicted violent criminal one fair trial, one quick appeal, then immediate execution. To prevent abuse of the law, a machine must be built that detects lies with 100 percent accuracy. Once perfected, the Truth Machine will change the face of the world. Yet the race to finish the Truth Machine forces one man to commit a shocking act of treachery, burdening him with a dark secret that collides with everything he believes in. Now he must conceal the truth from his own creation . . . or face his execution. By turns optimistic and chilling--and always profound--The Truth Machine is nothing less than a history of the future, a spellbinding chronicle that resonates with insight, wisdom . . . and astounding possibility. "PROFOUND." --Associated Press "Beginning in the jungles of Southeast Asia, trekking through the Middle East, traversing the Pacific, Lawler discovers the secrets behind the chicken's transformation from a shy, wild bird into an animal of astonishing versatility, capable of serving our species' changing needs. Across the ages, it has been an all-purpose medicine, sex symbol, gambling aid, inspiration for bravery, and of course, the star of the world's most famous joke. Only recently has it become humanity's most important single source of protein. Most surprisingly, the chicken--more than the horse, cow , or dog-- has been a remarkable constant in the sperad of civilization across the globe"--Page 4 of cover.

The New York Times bestselling account of one of history's most brutal -- and forgotten -- massacres, when the Japanese army destroyed China's capital city on the eve of World War II In December 1937, one of the most horrific atrocities in the long annals of wartime barbarity occurred. The Japanese army swept into the ancient city of Nanking (what was then the capital of China), and within weeks, more than 300,000 Chinese civilians and soldiers were systematically raped, tortured, and murdered. In this seminal work, Iris Chang, whose own grandparents barely escaped the massacre, tells this history from three perspectives: that of the Japanese soldiers, that of the Chinese, and that of a group of Westerners who refused to abandon the city and created a safety zone, which saved almost 300,000 Chinese. Drawing on extensive interviews with survivors and documents brought to light for the first time, Iris Chang's classic book is the definitive history of this horrifying episode. "Chang vividly, methodically, records what happened, piecing together the abundant eyewitness reports into an undeniable tapestry of horror." - Adam Hochschild, Salon !--[if !supportAnnotations]-- !--[if !supportAnnotations]-- !--[endif]--

A masterpiece ahead of its time, a prescient rendering of a dark future, and the inspiration for the blockbuster film Blade Runner By 2021, the World War has killed millions, driving entire species into extinction and sending mankind off-planet. Those who remain covet any living creature, and for people who can't afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep. They've even built humans. Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial humans can wreak, the government bans them from Earth. Driven into hiding, unauthorized androids live among human beings, undetected. Rick Deckard, an officially sanctioned bounty hunter, is commissioned to find rogue androids and "retire" them. But when cornered, androids fight back—with lethal force. Praise for Philip K. Dick "The most consistently brilliant science fiction writer in the world."—John Brunner "A kind of pulp-fiction Kafka, a prophet."—The New York Times "[Philip K. Dick] sees all the sparkling—and terrifying—possibilities . . . that other authors shy away from."—Rolling Stone

Technology and increasing levels of education have exposed people to more information than ever before. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. Tom Nichols' The Death of Expertise shows how this rejection of experts has occurred: the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine, among other reasons. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. When ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy or, in the worst case, a combination of both. An update to the 2017 breakout hit, the paperback edition of The Death of Expertise provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election. Judging from events on the ground since it first published, The Death of Expertise issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today.

Arguing that the European and white American destruction of the native American people was the most massive act of genocide in the history of the world, Stannard attempts to set the records straight on what befell American Indians over the last five centuries.

A coming-of-age classic about two Jewish boys growing up in Brooklyn in the 1940s, this "profound and universal" (The Wall Street Journal) story of

faith, family, tradition, and assimilation remains deeply pertinent today. "Works of this caliber should be occasion for singing in the streets and shouting from the rooftops." —Chicago Tribune It's the spring of 1944 and fifteen-year-olds Reuven Malter and Danny Saunders have lived five blocks apart all their lives. But they've never met, not until the day an accident at a softball game sparks an unlikely friendship. Soon these two boys—one expected to become a Hasidic rebbe, the other at ease with secular America—are drawn into one another's worlds despite a father's strong opposition. Set against the backdrop of World War II and the creation of the state of Israel, *The Chosen* is a poignant novel about transformation and tradition, growing up and growing wise, and finding yourself—even if it might mean disappointing those you love.

A true, bestselling story from the battlefield that faithfully portrays the horror, the madness, and the trauma of the Vietnam War More than half a million copies of *Chickenhawk* have been sold since it was first published in 1983. Now with a new afterword by the author and photographs taken by him during the conflict, this straight-from-the-shoulder account tells the electrifying truth about the helicopter war in Vietnam. This is Robert Mason's astounding personal story of men at war. A veteran of more than one thousand combat missions, Mason gives staggering descriptions that cut to the heart of the combat experience: the fear and belligerence, the quiet insights and raging madness, the lasting friendships and sudden death—the extreme emotions of a "chickenhawk" in constant danger. "Very simply the best book so far about Vietnam."

Involved for over thirty years in the politics of Iraq, Ali A. Allawi was a long-time opposition leader against the Baathist regime. In the post-Saddam years he has

held important government positions and participated in crucial national decisions and events. In this book, the former Minister of Defense and Finance draws on his unique personal experience, extensive relationships with members of the main political groups and parties in Iraq, and deep understanding of the history and society of his country to answer the baffling questions that persist about its current crises. What really led the United States to invade Iraq, and why have events failed to unfold as planned? *The Occupation of Iraq* examines what the United States did and didn't know at the time of the invasion, the reasons for the confused and contradictory policies that were enacted, and the emergence of the Iraqi political class during the difficult transition process. The book tracks the growth of the insurgency and illuminates the complex relationships among Sunnis, Shias, and Kurds. Bringing the discussion forward to the reconfiguration of political forces in 2006, Allawi provides in these pages the clearest view to date of the modern history of Iraq and the invasion that changed its course in unpredictable ways.

Named to ten BEST OF THE YEAR lists and selected as a William C. Morris Award Winner, *The Serpent King* is the critically acclaimed, much-beloved story of three teens who find themselves—and each other—while on the cusp of graduating from high school with hopes of leaving their small-town behind. Perfect for fans of John Green's *Turtles All the Way Down*. "Move over, John Green; Zentner is coming for you." —The New York Public Library "Will fill the infinite space that was left in your chest after you finished *The Perks of Being a Wallflower*." —BookRiot.com Dill

isn't the most popular kid at his rural Tennessee high school. After his father fell from grace in a public scandal that reverberated throughout their small town, Dill became a target. Fortunately, his two fellow misfits and best friends, Travis and Lydia, have his back. But as they begin their senior year, Dill feels the coils of his future tightening around him. His only escapes are music and his secret feelings for Lydia—neither of which he is brave enough to share. Graduation feels more like an ending to Dill than a beginning. But even before then, he must cope with another ending—one that will rock his life to the core. Debut novelist Jeff Zentner provides an unblinking and at times comic view of the hard realities of growing up in the Bible belt, and an intimate look at the struggles to find one's true self in the wreckage of the past. "A story about friendship, family and forgiveness, it's as funny and witty as it is utterly heartbreaking." —PasteMagazine.com "A brutally honest portrayal of teen life . . . [and] a love letter to the South from a man who really understands it."

—Mashable.com "I adored all three of these characters and the way they talked to and loved one another." —New York Times Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with nothing to eat and nothing to sell. William began to explore science books in his village library, looking for a solution. There, he came up with the idea that would

change his family's life forever: he could build a windmill. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on William's story, this is the perfect edition to read and share with the whole family.

Through a series of poems, a young girl chronicles the life-changing year of 1975, when she, her mother, and her brothers leave Vietnam and resettle in Alabama.

In 1927, at the urging of twenty-one-year-old Harriet, Mrs. Livingston reluctantly recalls her experiences at the Triangle Shirtwaist factory, including miserable working conditions that led to a strike, then the fire that took the lives of her two bestfriends, when Harriet, the boss's daughter, was only five years old. Includes historical notes.

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This book is available as an open access ebook under a CC-BY-NC-ND licence. Vaccinating Britain shows how the British public has played a central role in the development of vaccination policy since the Second World War. It explores the relationship between the public and public health through five key vaccines - diphtheria, smallpox, poliomyelitis, whooping cough and measles-mumps-rubella (MMR). It reveals that while the British public has embraced vaccination as a safe, effective and cost-efficient form of preventative

medicine, demand for vaccination and trust in the authorities that provide it has ebbed and flowed according to historical circumstances. It is the first book to offer a long-term perspective on vaccination across different vaccine types. This history provides context for students and researchers interested in present-day controversies surrounding public health immunisation programmes. Historians of the post-war British welfare state will find valuable insight into changing public attitudes towards institutions of government and vice versa. Beginning with the absolutely critical first moments of the outbreak in China, and ending with an epilogue on the vaccine rollout and the unprecedented events between the election of Joseph Biden and his inauguration, Lawrence Wright's *The Plague Year* surges forward with essential information--and fascinating historical parallels--examining the medical, economic, political, and social ramifications of the COVID-19 pandemic.

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Provides an overview of the sustainable energy crisis that is threatening the world's natural resources, explaining how energy consumption is estimated and how those numbers have been skewed by various factors and discussing alternate forms of energy that can and should be used. The Advocate is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States. Pathogens transmitted among humans, animals, or plants by insects and arthropod vectors have been responsible for significant morbidity and mortality throughout recorded history. Such vector-borne diseases " including malaria, dengue, yellow fever, and plague " together accounted for more human disease and death in the 17th through early 20th centuries than all other causes combined. Over the past three decades, previously controlled vector-borne diseases have resurged or reemerged in new geographic locations, and several newly identified pathogens and vectors have triggered disease outbreaks in plants and animals, including humans. Domestic and international capabilities to detect, identify, and effectively respond to vector-borne diseases are limited. Few vaccines have been developed against vector-borne pathogens. At the same time, drug resistance has developed in vector-borne pathogens while their vectors are increasingly resistant to insecticide controls. Furthermore, the ranks of scientists trained to conduct research in key fields including medical entomology, vector ecology, and tropical medicine have dwindled, threatening prospects for addressing vector-borne diseases now and in the future. In June 2007, as these circumstances became alarmingly apparent, the Forum on Microbial Threats hosted a workshop to explore the dynamic relationships among host, pathogen(s), vector(s), and ecosystems that characterize vector-borne diseases. Revisiting this topic in September 2014, the Forum organized a workshop to examine trends and patterns in the incidence and prevalence of vector-borne diseases in an increasingly interconnected and ecologically disturbed world, as well as recent developments to meet these dynamic threats. Participants examined the emergence and global movement of vector-borne diseases, research priorities for understanding

their biology and ecology, and global preparedness for and progress toward their prevention, control, and mitigation. This report summarizes the presentations and discussions from the workshop.

Despite billions of dollars of aid and the best efforts of the international community to improve economies and bolster democracy across Africa, violent dictatorships persist. As a result, millions have died, economies are in shambles, and whole states are on the brink of collapse.

Political observers and policymakers are starting to believe that economic aid is not the key to saving Africa. So what does the continent need to do to throw off the shackles of militant rule?

African policy expert George Ayittey argues that before Africa can prosper, she must be free.

Taking a hard look at the fight against dictatorships around the world, from Ukraine's orange revolution in 2004 to Iran's Green Revolution last year, he examines what strategies worked in the struggle to establish democracy through revolution. Ayittey also offers strategies for the West to help Africa in her quest for freedom, including smarter sanctions and establishing fellowships for African students.

"I recognized that Michael Hunter knows what he is talking about the minute I opened this book. Hunter is the kind of guy--and the kind of work--that you get when you combine passion, creativity, inventiveness, and elbow grease. This book makes me hungry, and Michael Hunter makes me proud to be a hunter and angler." --Steven Rinella, outdoorsman, host of the TV series and podcast MeatEater, and author The MeatEater Fish and Game Cookbook Well-known hunter and respected wild-game chef, Michael Hunter, grew up in the great outdoors. Inspired by the endless bounty of the land, hunting, fishing, foraging, and cooking is a way of life for Hunter. Celebrating the resources of the wild, The Hunter Chef Cookbook features a collection of over 100 recipes and butchery guides, and stunning food and landscape

photography. The book includes recipes for cooking big game, from moose and bison, to white tail deer and wild boar. Common small game features include wild turkey, duck, wild goose, ruffed grouse, as well as rabbit and squirrel. Fresh-water and salt-water fish recipes feature pickerel, wild salmon, rainbow trout, prawns, scallops, and more. A seasoned forager, Hunter offers an array of savoury and sweet recipes, incorporating wild ingredients, everything from mushrooms and leeks to sumac and berries.

"[A] juicy memoir about growing up, becoming a chef, and working as New York's most unconventional wedding caterer." --BUST magazine  
When their high-school-aged, punk, runaway daughter is found hosting a Jersey Shore hotel party, Rossi's parents feel they have no other choice: they ship her off to live with a Chasidic rabbi in Crown Heights, Brooklyn. Within the confines of this restrictive culture, Rossi's big city dreams take root. Once she makes her way to Manhattan, Rossi's passion for cooking, which first began as a revolt against the microwave, becomes her life mission. The Raging Skillet is one woman's story of cooking her way through some of the most unlikely kitchens in New York City--at a "beach" in Tribeca, an East Village supper club, and a makeshift grill at Ground Zero in the days immediately following 9/11. Forever writing her own rules, Rossi ends up becoming the owner of one of the most sought-after catering companies in the city. This heartfelt, gritty, and hilarious memoir shows us how the creativity of the kitchen allows us to give a nod to where we come from, while simultaneously expressing everything that we are. This "moving, witty memoir" (Nigella Lawson) includes unpretentious recipes for real people everywhere. Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells--taken without her knowledge--became one of the most important tools in medicine: The first "immortal" human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her "immortality" until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family--past and present--is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family--especially Henrietta's daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, The Immortal Life of Henrietta Lacks captures the beauty and drama of scientific discovery, as well as its human consequences.

From food products to fashions and cosmetics to  
children's toys, a wide range of commodities today  
are being marketed as "halal" (permitted, lawful)  
or "Islamic" to Muslim consumers both in the West  
and in Muslim-majority nations. However, many of  
these products are not authentically Islamic or  
halal, and their producers have not necessarily  
created them to honor religious practice or  
sentiment. Instead, most "halal" commodities are  
profit-driven, and they exploit the rise of a new  
Islamic economic paradigm, "Brand Islam," as a  
clever marketing tool. Brand Islam investigates  
the rise of this highly lucrative marketing  
strategy and the resulting growth in consumer  
loyalty to goods and services identified as  
Islamic. Faegheh Shirazi explores the reasons why  
consumers buy Islam-branded products, including  
conspicuous piety or a longing to identify with a  
larger Muslim community, especially for those  
Muslims who live in Western countries, and how  
this phenomenon is affecting the religious,  
cultural, and economic lives of Muslim consumers.  
She demonstrates that Brand Islam has actually  
enabled a new type of global networking, joining  
product and service sectors together in a huge  
conglomerate that some are referring to as the  
Interland. A timely and original contribution to  
Muslim cultural studies, Brand Islam reveals how  
and why the growth of consumerism, global  
communications, and the Westernization of many  
Islamic countries are all driving the  
commercialization of Islam.
