This book argues broadly that any historical narrative about republicanism needs to place Marlowe at the front of its genealogy, and that his interest in republican ideals is sustained from the beginning to the end of his meteoric career. More specifically, this study will nonetheless argue that it is difficult to discern a clear republican form of government in Marlowe's works. What we can discern is 'republican representation', the author's representational foregrounding of his own republican frame of art. This study is the first to situate the complex Marlowe corpus within the context of the advent of English Republicanism.

American Economist and Tariff League Bulletin

"Allegheny County in southwestern Pennsylvania was for many years a staging area of westward migration. Thousands of early pioneers passed through it and thousands more stayed. Representatives of many of these early settlers, perhaps the majority, are immortalized in this work in genealogical and biographical sketches. The sketches, numbering approximately 2,250 and naming a total of 50,000 related persons, generally treat subjects who were born in the early nineteenth century, with reference to immediate forebears of the late eighteenth century. The sketches typically mention the date and place of birth and marriage of the principal subject, the place of birth of his parents and often grandparents, sometimes the name of the first ancestor in America, and details of religion, education, military service, occupation, home, and residence"--Publisher website (December 2008)
