Hoarders collect to excess, filling bathtubs, closets, kitchens, garages, storage sheds—floor-to-ceiling—to render their living spaces uninhabitable. They're so consumed they lose jobs, family and friends, homes, health, and occasionally their lives. To the rest us, these people seem bizarre or mentally ill, and we view their challenges with impatience, frustration and simplistic answers. Yet a true fix isn't so simple. My Husband's Under Here Somewhere, however, strives to unearth them. Morbidly fascinating tales abound as the lives of hoarders who amass animals and collectors who spin out of control are examined. The science behind hoarding—including its link with Obsessive-Compulsive disorders—as well as promising forms of treatment, meet with consideration. Our materialistic culture, one that's obsessed with having more and more, further informs the narrative. Certain types of stockpiling stem from challenging life experiences. A fellow who'd been imprisoned in a Russian Gulag spent the remainder of his days amassing keys. Jodin, a resistance fighter during World War II, is a consummate saver of twine. For her, a possession of such insignificance once meant the difference between extinction and survival. As a boy, Norman's father insisted the house be kept as neat as a pin. Should anything fall out of place—absolutely anything—and he got beaten. So nowadays, he thoroughly enjoys his messes and views them as a way to get even. Ordinary hoarders and extreme collectors notwithstanding, they're also found among the rich and famous. Peter the Great kept a human zoo of freakish oddities, and also enjoyed excising his subjects' teeth, adding them to his vast assemblage. The hapless Collyer brothers crammed their Manhattan brownstone to the brim and accidentally entombed themselves within it. Unable to part with his shorn locks and nail clippings, Howard Hughes stored them away for "safekeeping." Then there's China's remarkable Emperor Qin. After he conquered all surrounding kingdoms, he constructed 270 palaces to live in. As if that weren't enough, he built roads and dug irrigation canals alongside, standardized laws, established a system of weights and measures, created a form of currency, and then formalized the use of written characters. While not a hoarder by today's standards, he was, quite possibly, the first to promulgate the axiom, "He who dies with the most toys wins." Eccentricity, wealth and death aside, each of the aforementioned had way too much stuff, which is a problem familiar to most of us. Dare to quest for answers as to why this is so, and our acquisitive culture must be examined. Harnessing humor and compassion, My Husband's Under Here Somewhere does precisely that. As the first of its kind, this book of narrative non-fiction looks at hoarding and collecting as part of a continuum. And, while many self-help decluttering books and hoarding-related memoirs, as well as works dealing with Obsessive-Compulsive Hoarding already exist, none of them focus on the psycho-spiritual ramifications of suffocating to death beneath heaps of possessions. Hopefully, this publication will appeal to hoarders and collectors, as well as family, friends and neighbors impacted by the hoarder's behaviors. It's also for clinicians and public agencies in search of positive ways to respond. Lastly, it's for curious folks who seek to understand.

Women with Attention Deficit Disorder, psychotherapist Sari Solden's, groundbreaking book, explains how every year, millions of withdrawn little girls and chronically overwhelmed women go undiagnosed with Attention Deficit Disorder because they don't fit the stereotypical profile: they're not fast-talking, hyperactive, or inattentive, and they are not male. This pioneering book explores treatment and counseling options, and uses real-life case histories to examine the special challenges women with AD/HD face, such as the shame of not fulfilling societal expectations. Solden explains that AD/HD affects just as many women as men, and often results in depression, disorganization, anxiety, and underachievement. Included in this revised edition is a brand new chapter on friendship challenges for women with AD/HD. Three empowering steps -- restructuring one's life, renegotiating relationships, and redefining self-image -- help women take control of their lives and enjoy success on their own terms. "Sari Solden has used her personal and professional experience to shine some light into the dark closet inhabited by far too many ADD women... She empowers ADD women by validating their experience as worthwhile human beings who struggle with serious organizational problems in many areas of their lives." (Kate Kelly and Peggy Ramundo, authors of You Mean I'm Not Lazy, Stupid, or Crazy")

The Little Book of Tidying

"Discover how to start your own business helping people, homes and offices get organized."--Cover.

Marie Kondo's first book, The Life-Changing Magic of Tidying, transformed the homes and lives of millions of people around the world. Spark Joy is her in-depth tidying masterclass, a line-illustrated, room-by-room guide to decluttering and organising your home. It covers every room in the house - from the bedroom and kitchen to the bathroom and living room - as well as all the items that occupy their spaces. Charming line drawings explain how to organise your house and apply Marie Kondo's unique folding method to all your clothes, including shirts, trousers, jackets, skirts, socks and bras. The secret to Marie Kondo's unique and simple KonMari tidying method is to tidy by category and to focus on what you want to keep, not what you want to get rid of. Ask yourself if something 'sparks joy' and suddenly it becomes so much easier to understand if you really need it in your home and your life. Except tidying up is not just about transforming your home: when you surround yourself with things you love, you will find that your whole life begins to change.

A charming, practical, and unsentimental approach to putting a home in order while reflecting on the tiny joys that make up a long life. In Sweden there is a kind of decluttering called *döstädning*, *dö* meaning "death" and *städning* meaning "cleaning." This surprising and invigorating process of clearing out unnecessary belongings can be undertaken at any age or life stage but should be done sooner than later, before others have to do it for you. In *The Gentle Art of Swedish Death Cleaning*, artist Margareta Magnusson, with Scandinavian humor and wisdom, instructs readers to embrace minimalism. Her radical and joyous method for putting things in order helps families broach sensitive conversations, and makes the process uplifting rather than overwhelming. Margareta suggests which possessions you can easily get rid of (unworn clothes, unwanted presents, more plates than you'd ever use) and which you might want to keep (photographs, love letters, a few of your children's art projects). Digging into her late husband's tool shed, and her own secret drawer of vices, Margareta introduces an element of fun to a potentially daunting task. Along the way readers get a glimpse into her life in Sweden, and also become more comfortable with the idea of letting go. Organizing Solutions for People with ADD, 2nd Edition outlines new

Four generations live under one roof in Columbus, Ohio, and they've figured out to make it work: dividing responsibilities and chores, re-designing some physical spaces for privacy, and reconfiguring others into common areas for all to gather and enjoy living together. This tale of heartache, heroism, and hope is one family's multi-generational social experiment, which encompasses kids in their teens, parents in their forties, grandparents in their seventies, and a ninety-plus year-old great-grandmother. Together, as they navigate the joys and challenges that come with aging in America, they're also answering the question, How does family help you thrive at home when you're old? An Alzheimers/dementia diagnosis adds a layer of complexity, yet the family resolves to keep their eldest at home for as long as she's happy, safe and engaged in life. The younger generation learns much from their elders, and the elders from their children. While mastering the use of technology and new family systems, they're also mastering the use of humor, tolerance, and patience. Ultimately, that's what makes this four-generation experiment a success. Practical design advice and clear-eyed strategies are mixed with personal tips and observations, making it easy to see how anyone can transform their home into their own multi-generational living situation. Her stories are honest, both funny and poignant. The family's fiascos are counterbalanced by their many successes, the greatest one being that as individuals and as a family, they continue to thrive.

For Jen, change comes from within—a process that to succeed, must begin with the heart. Americans are spending more time at home than ever before, and many have come to realize that their living spaces aren't serving them. We have too many things, resulting in physical and mental clutter. And the organizational strategies we try only go so far, leaving us feeling disconnected and disheartened. Life in Jeneral helps you build healthier mental habits that allow us to break free from the clutter, while providing traditional strategies to get—and stay—organized. Beautifully designed and featuring examples from Jen's personal experiences and those of her clients, Life in Jeneral teaches us how to: Flip common mental blocks that prevent us from organizational success Identify and tackle "clutter magnets"—the spaces where things seem to gather Discover common emotional baggage keyed to specific types of clutter Organize and evolve specific spaces in the home, room by room Life in Jeneral offers a holistic approach to organization; once we understand what we want from our spaces—how they can nurture and support our emotional well-being—we can create a home that feels both practical and joyful.
