Throughout 1778, Iroquois war parties repeatedly raided the frontiers of Pennsylvania, New York, and New Jersey. In 1779, General George Washington decided to punish them. He sent Major General John Sullivan into the Iroquois country with orders to make it uninhabitable. "Scorched Earth - General Sullivan and the Senecas" tells how Sullivan's invasion force of thousands of soldiers marched it into the Pennsylvania hinterland, up the Susquehanna River, and into the Iroquois homeland. Along the way, the troops burned every village and destroyed every farm they found. As the army advanced, the Indians - men, women, and children - fled. Drawing upon first-person accounts kept by Sullivan's officers, author John L. Moore chronicles how the troops devoted much

more time to laying waste to cornfields than they did to fighting Iroquois warriors. Washington himself was ecstatic. "Their whole country has been overrun and laid waste," he said. In the end, many more Indians starved during the following winter than were killed in battle with Sullivan's soldiers. As he traveled across the Pennsylvania Frontier in 1743,

naturalist John Bartram didn't know what to expect when he accepted an invitation to spend the night in the cabin of a white man who traded goods for furs with the Indians. The cabin was near the native town of Shamokin (present-day Sunbury) along the Susquehanna River.

"About midnight, the Indians came and called up him and his squaw," Bartram wrote later.

"She sold the Indians rum. ... Being quickly intoxicated, men and women began first to sing and then dance round the fire." Bartram is one of many early Pennsylvanians that people this colorful non-fiction work.

Others include Conrad Weiser, the Pennsylvania Colony's Indian agent; William Penn, the colony's visionary founder; Madame Montour, an interpreter who was the daughter of an Algonquin mother and French father; and Major General Edward Braddock, who led British troops against the French army in the Ohio River Valley. Author John L. Moore raises and answers many questions about who the frontiersmen and natives were and what they did. What was William Penn's colony like in its early days? How did the Lenni Lenape Indians living in Penn's colony obtain their food? What did they eat? How did they get along with Penn, and how did Penn get along with them? Why did Penn's sons recruit athletic young men to walk the boundary of land the Lenape weren't especially interested in

Jack Armstrong died violently along the Juniata River in early 1744. Armstrong was a rough-and-tumble frontier trader whose sharp business practices antagonized one Indian too many. He and two men who worked for him traveled into the woods in early 1744 and never came out again. Word soon crossed the frontier that all three had been murdered. Obscure, but richly detailed documents tell how and why Iroquois Indians living along the Susquehanna River at present-day Sunbury developed evidence that

exposed the Native Americans involved in Armstrong's murder. John L. Moore's nonfiction book contains true stories of Armstrong and other real people caught up in the struggles that took place all along the Pennsylvania frontier throughout the late 1600s and 1700s. The stories are set mainly in the valleys of the Delaware, Juniata, Lehigh, Ohio and Susquehanna rivers. Other chapters tell how: The Philadelphia jury in Margaret Mattson's 1683 witchcraft trial delivered a split verdict. She was acquitted of bewitching her neighbors' cows, but found guilty of being known as a witch. Presiding over the trial was William Penn, who let Margaret go home after her husband and son posted a bond for her "good behavior." Moravian missionaries who traveled along the Susquehanna River's West and North Branches during a famine in 1748 found many Indians sick with smallpox and suffering from starvation. The people in one native town were boiling tree bark for food. In another village they were cooking grass. Early in the French & Indian War, an influential Iroquois chief known as "The Belt of Wampum" urged Pennsylvania officials to build a fort on the Susquehanna River at the native town called Shamokin, present-day Sunbury. "Such Indians as continue true to you want a place to come to and to live in security," The Belt said in early 1756. Frances Slocum, a small girl kidnapped by Indians from her home along the Susquehanna River during the American Revolution, spent most of her adult life as a Miami Indian. In 1839, her brother Joseph and his daughters traveled from Pennsylvania to Indiana to
