As clinicians begin to realize the important role of dose-finding in the drug development process, there is an increasing openness to "novel" methods proposed in the past two decades. In particular, the Continual Reassessment Method (CRM) and its variations have drawn much attention in the medical community, though it has yet to become a commonplace tool. To overcome the status quo in phase I clinical trials, statisticians must be able to design trials using the CRM in a timely and reproducible manner. A self-contained theoretical framework of the CRM for researchers and graduate students who set out to learn and do research in the CRM and dose-finding methods in general, *Dose Finding by the Continual Reassessment Method* features: Real clinical trial examples that illustrate the methods and techniques throughout the book Detailed calibration techniques that enable biostatisticians to design a CRM in timely manner Limitations of the CRM are outlined to aid in correct use of method This book supplies practical, efficient dose-finding methods based on cutting edge statistical research. More than just a cookbook, it provides full, unified coverage of the CRM in addition to step-by-step guidelines to automation and parameterization of the methods used on a regular basis. A detailed exposition of the calibration of the CRM for applied statisticians working with dose-finding in phase I trials, the book focuses on the R package 'drcrm' for the CRM and its major variants. The author recognizes clinicians' skepticism of model-based designs, and addresses their concerns that the time, professional, and computational resources necessary for accurate model-based designs can be major bottlenecks to the widespread use of appropriate dose-finding methods in phase I practice. The theoretically- and empirically-based methods in *Dose Finding by the Continual Reassessment Method* will lessen the statistician's burden and encourage the continuing development and implementation of model-based dose-finding methods.

THE SUNDAY TIMES BESTSELLER and a Times, Spectator and Observer Book of the Year 2021 'In the first decade of this century, it was unthinkable that a gender-critical book could even be published by a prominent publishing house, let alone become a bestseller.'

Louise Perry, *New Statesman* 'Thank goodness for Helen Joyce.' Christina Patterson, *Sunday Times* 'Reasonable, methodical, sane, and utterly unintimidated by extremist orthodoxy, *Trans* is a riveting read.' Lionel Shriver 'A tour de force.' *Evening Standard* Biological sex is no longer accepted as a basic fact of life. It is forbidden to admit that female people sometimes need protection and privacy from male ones. In an analysis that is at once expert, sympathetic and urgent, Helen Joyce offers an antidote to the chaos and cancelling.

Dose Finding by the Continual Reassessment Method

One evil god, two rival empires, three unlikely bishops and seven brave ghosts make for one fantastic adventure! The paths of one evil god, two rival empires, three unlikely bishops and seven brave ghosts converge in the destiny of Teito Klein, a boy who vows to master a powerful artifact known as the Eye of Mikael in order to lay bare the secrets of the world's—and his own—murky past. While the Seven Ghosts travel to their past lives' memory bank to investigate who tampered with their memories, Teito unearths a shocking secret of his own—he is the evil god Verloren's vessel! And unless he regains the Eye of Mikael, his soul may crumble, spelling the end of the world. Reads R to L (Japanese Style) for teen audiences.
