In the early days of Bloodgood touring, there were no booking circuits established for Christian Metal Bands. Rarely were there ever any guarantees, and most of the promoters were first-timers. Paul, was our soundman, truck driver, stage manager, crew leader, and whatever we needed him to be. Along with his amazing wife and partner, Leslie, he viewed firsthand what life was really like, out on the road for the early bands of Christian Metal. In this book, Paul captures this incredible pioneering Metal Missionary journey and what it was like to live it!-Les Carlsen, Lead vocalist of Bloodgood This special 25th Anniversary Edition of Rubber Meets the Road has been completely updated from cover to cover and contains many new never before published photographs, and two entirely new chapters not contained in the original book. A compelling look at the Christian music industry and a true must-read for any Bloodgood or Barren Cross fan.

The Soundman for Bloodgood and Barren Cross Speaks Out!

An ambitious and shocking exposé of America's hidden empire in Liberia, run by the storied Firestone corporation, and its long shadow In the early 1920s, Americans owned 80 percent of the world's automobiles and consumed 75 percent of the world's rubber. But only one percent of the world's rubber grew under the U.S. flag, creating a bottleneck that hampered the nation's explosive economic expansion. To solve its conundrum, the Firestone Tire and Rubber Company turned to a tiny West African nation, Liberia, founded in 1847 as a free Black republic. Empire of Rubber tells a sweeping story of capitalism, racial exploitation, and environmental devastation, as Firestone transformed Liberia into America's rubber empire. Historian and filmmaker Gregg Mitman scoured remote archives to unearth a history of

promises unfulfilled for the vast numbers of Liberians who toiled on rubber plantations built on taken land. Mitman reveals a history of racial segregation and medical experimentation that reflected Jim Crow America—on African soil. As Firestone reaped fortunes, wealth and power concentrated in the hands of a few elites, fostering widespread inequalities that fed unrest, rebellions and, eventually, civil war. A riveting narrative of ecology and disease, of commerce and science, and of racial politics and political maneuvering, Empire of Rubber uncovers the hidden story of a corporate empire whose tentacles reach into the present.

Daily dharma teachings on compassion, wisdom, mindfulness, and joy--ideal for creating moments of peace and reflection in our chaotic world. Framing effects are everywhere. An estate tax looks very different to a death tax. Gun safety seems to be one thing and gun control another. Yet, the consensus from decision theorists, finance professionals, psychologists, and economists is that frame-dependence is completely irrational. This book challenges that view. Some of the toughest decisions we face are just clashes between different frames. It is perfectly rational to value the same thing differently in two different frames, even when the decision-maker knows that these are really two sides of the same coin. Frame It Again sheds new light on the structure of moral predicaments, the nature of self-control, and the rationality of co-operation. Framing is a powerful tool for redirecting public discussions about some of the most polarizing contemporary issues, such as gun control, abortion, and climate change. Learn effective problem-solving and decision-making to get the better of difficult dilemmas.

1980s rock icon Greg Kihn spins a magical mystery tour headlined by the Beatles, who find themselves in jeopardy when murder rocks their world. For Bob “Dust Bin” Dingle, R&B is a passion his roughneck brothers don’t understand. But when a mop-haired group of Liverpoolians named John, Paul, George, and Ringo stumble into Dust Bin Bob’s secondhand shop on Penny Lane and gawk at his sparkling collection of 45s, everyone’s in perfect harmony. Stirred by the thumping backbeats of Chuck Berry, Little Richard, and Bo Diddley, the Fab Four rocket to stardom. As Beatlemania catapults them from the Cavern Club to The Ed Sullivan Show in record time, the lads show they’ve also got a talent for getting into trouble. Fortunately, Dust Bin Bob has a way of showing up just in time to lend them a hand. But when the world tour for Rubber Soul lands in the Philippines, trouble turns deadly. Exhausted from an eight-days-a-week schedule, the fab four snub a personal invite from Imelda Marcos, who just won’t let it be. Suddenly, thousands of fans turn menacing, and murder is in the air. It’s up to Dust Bin Bob to sort out the mess if they to get back on the plane alive . . .

An inquiry into science education is an exploration into education in a context that is grounded and significant. It is written by a college professor of Physics and Science Education who spent sabbatical year as a full time science teacher in a neighborhood high school in a poor area of New York City. His varied experiences highlight the contrast of what science education is and what it can be. The framework through which the book is written is that science education should be an active, purposeful process which promotes functional understanding and critical thinking. Science learners should be given the opportunity to build an understanding of benchmark principals of science based on their own observations and reasoning. In much the same way, this book explores benchmark principals of science education through real classroom experiences. Standard approaches of teaching and assessment are presented and alternative opportunities are described. Theories and strategies of science education emerge from analysis of classroom observations. Although the focus is on the teaching and learning of science, the subtext is implications of a failing educational system and what can be done about it. The primary intended audience is educators of all capacities, but particularly science teachers. An inquiry into science education integrates critical topics of science education in a contextualized, accessible, and easy to read narrative. The secondary intended audience is non-fiction readers. This book examines educational issues relevant to a general audience from the perspective of a scientist with a focus on inquiry and reasoning. Critical issues are addressed through case histories, some with touches of humor, but all with insight into children and learning.

"I like the way Dr Brenda Jamnik works the audience and makes people accountable. I also think we get a lot more value out of a day with her as compared to others who can be a bit 'wish washy'. Basically she doesn't 'beat about the bush'; I like that as it gets results." - Steve Gray, Manager (Program and Technical Support) Townsville Water and Waste, Townsville City Council "In one short session Brenda's words and advice saved me \$100k in executing one of my contracts." - Jason Coe, Founder, Jardini Have you ever completed a project without rework? How about one where everyone worked together and there were no people issues? And of course on this successful project, everybody used their common sense and you didn't have anybody make assumptions. When the Rubber Hits the Road provides simple tools and insights for factoring in the people equation of your next job to ensure your project is a reality. Based on 30 years experience in developing high performance teams including major

infrastructure projects, this book capitalises on the Lessons Learned from billion dollar rail lines to water treatment plants, dam building and major motorway upgrades. Brenda's RIGHT approach not only gives you a way to have great people who can run the best meetings, make the right decisions and ensure you gain every possible human efficiency; it also gives you the time you crave to do the things you want to do such as be home with the family, watch the footy, take the boat out or hit a golf ball guilt free. Dr Brenda Jamnik has over of 30 years working in and with the infrastructure industry and has earned the respect of colleagues and clients for her pragmatic and adaptable approach. If you want to successfully put the people equation together to make your leadership, projects and business a success then the tools in this book should be in your toolkit.

The essential guide for ethical decision-making in the 21st century. It's not your imagination: we're living in a time of moral decline. Publicly, we're bombarded with reports of government leaders acting against the welfare of their constituents; companies prioritizing profits over health, safety, and our best interests; and technology posing risks to society with few or no repercussions for those responsible. Personally, we may be conflicted about how much privacy to afford our children on the internet; how to make informed choices about our purchases and the companies we buy from; or how to handle misconduct we witness at home and at work. How do we find a way forward? Today's ethical challenges are increasingly gray, often without a clear right or wrong solution, causing us to teeter on the edge of effective decision-making. With concentrated power structures, rapid advances in technology, and insufficient regulation to protect citizens and consumers, ethics are harder to understand than ever. But in *The Power of Ethics*, Susan Liataud shows how ethics can be used to create a sea change of positive decisions that can ripple outward to our families, communities, workplaces, and the wider world—offering unprecedented opportunity for good. Drawing on two decades as an ethics advisor guiding corporations and leaders, academic institutions, nonprofit organizations, and students in her Stanford University ethics courses, Susan Liataud provides clarity to blurry ethical questions, walking you through a straightforward, four-step process for ethical decision-making you can use every day. Liataud also explains the six forces driving virtually every ethical choice we face. Exploring some of today's most challenging ethics dilemmas and showing you how to develop a clear point of view, speak out with authority, make effective decisions, and contribute to a more ethical world for yourself and others, *The Power of Ethics* is the must-have ethics guide for the 21st century.

This book answers an important question: if mentoring research coming out of Western nations have consistently shown that mentoring millennials brings tangible benefits to the organisation in the areas of job satisfaction, organisational commitment and employee retention, would such observations be seen in an Asian context?

Welcome to *The Courageous Adventures of Shelbee the Short Bus*, a heart-warming children's book series that reveals how Shelbee the Short Bus and his five new riders learn to turn

disabilities into possibilities. In *Where the Rubber Meets the Road*, book 1 in the *Shelbee the Short Bus* series, we meet Shelbee the Short Bus who is taking on a new job of transporting five children—Amber, Zoe, Ian, Sean, and Toby—to their special education classes at Evergreen Elementary School. Each child has a unique set of challenges, and together with Shelbee, they begin a journey of embracing new possibilities in life. Meanwhile, Shelbee is the only "short bus" (small bus) among all the other regular buses carrying kids to school. Bossee, the leader of the buses, is skeptical of Shelbee—having never worked with a short bus before. Rustee, a wise, older bus, has been around the block a time or two and sees some possibilities for Shelbee, while buses Smokee and Blinky are not sure what to make of Shelbee the "newbee." Will Shelbee the Short Bus weather the skepticism of Bossee and the other buses and earn their respect? Will Amber, Zoe, Ian, Sean, and Toby pull together to help Shelbee and learn a lesson or two of their own? Join us on *The Courageous Adventures of Shelbee the Short Bus* and discover the possibilities yourself. --ABOUT THE AUTHORS: Milo "Mi" and Mary Clark were inspired to create *The Courageous Adventures of Shelbee the Short Bus* by amazing children and adults who simply refuse to be defined or limited by disabilities. Time and again, they've seen courageous people look beyond disabilities to the inspiring possibilities life holds for each of us and our friends and neighbors. Mi and Mary dated in high school, and after a thirty-seven-year hiatus, they were reunited and married. Their collective experience in health care, writing, and life set the foundation for this inspirational series. They make their home in St. Augustine, FL. --ABOUT THE PUBLISHER: Innovo Publishing LLC is a conservative Christian publisher, serving the Christian and wholesome markets through Traditional Royalty Publishing and custom arrangements for authors, artists, ministries, and organizations. Innovo publishes hardbacks, paperbacks, ebooks, audiobooks, music, screenplays, film, and physical and online curricula. The present book is based on the conference *Software Development and Reality Construction* held at SchloB Eringerfeld in Germany, September 25 - 30, 1988. This was organized by the Technical University of Berlin (TUB) in cooperation with the German National Research Center for Computer Science (GMD), Sankt Augustin, and sponsored by the Volkswagen Foundation whose financial support we gratefully acknowledge. The conference was an interdisciplinary scientific and cultural event aimed at promoting discussion on the nature of computer science as a scientific discipline and on the theoretical foundations and systemic practice required for human-oriented system design. In keeping with the conversational style of the conference, the book comprises a series of individual contributions, arranged so as to form a coherent whole. Some authors reflect on their practice in computer science and system design. Others start from approaches developed in the humanities and the social sciences for understanding human learning and creativity, individual and cooperative work, and the interrelation between technology and organizations. Thus, each contribution makes its specific point and can be read on its own merit. But, at the same time, it takes its place as a chapter in the book, along with all the other contributions, to give what seemed to us a meaningful overall line of argumentation. This required careful editorial coordination, and we are grateful to all the authors for bearing with us throughout the slow genesis of the book and for complying with our requests for extensive revision of some of the manuscripts.

Reflective Planning Practice: Theory, Cases, and Methods uses structured, first-person reflection to reveal the artistry of planning practice. The value of professional reflection is widely recognized, but there is a difference between acknowledging it and doing it. This book takes up that challenge, providing planners' reflections on past practice as well as prompts for reflecting in the midst of planning episodes. It explains a reflection framework and employs it in seven case studies written by planning educators who also practice. The cases reveal practical judgments made during the planning episode and takeaways for practice, as the planners used logic and emotion, and applied convention and invention. The practical judgments are explained from the perspective of the authors' personal experiences, purposes, and professional style, and their interpretation of the rich context that underpins the cases including theories, sociopolitical aspects, workplace setting, and roles. The book seeks to awaken students and practitioners to the opportunities of a pragmatic, reflective approach to planning practice.

Gems of Holy Spirit wisdom that reminds us of the ever-present life-enhancing and unconditional love of the Father. The love of the heavenly Father for His children that Jesus often expounded on is shown explicitly in the varying Spirit-revealed messages given. The author hopes that those who read them will feel assured of their true identity, an inheritor of the Father's Kingdom. His love more than compensates for any incorrect or lack of fathering in our individual lives. In our short, chaotic life here on earth, one can easily lose sight of that truth. Eternity is a long time in comparison. Jesus said heaven and earth shall pass away, but His word shall not pass away. Saint Paul related his experience of going to the Third Heaven and telling how no eye has seen, nor has ear heard of, the wonderful things God has in store for those who believe. My nitty-gritty opinion is that the rubber can't hit the road any closer than that.

Don't give up till you reach the end, or you will miss the message. Introduction My poems are inspired by life's experience, the good times and the not so good times. Recapping significant bits of life and events that have absolutely no significance at all. Sometimes one of my poems will introduce a life changing truth next will lead you down the garden path to some humorous event that's really out for a laugh. I suppose it's not really fair to play with the dynamics of people's emotions but life's not always fair. Anyway if your reading my book and it has touched you enough to move your mind away from reality for a short time it has achieved the desired result. And also paid a small amount to help feed my family. This will also give me the

opportunity to write another verse that just may be the poem that touches the hearts of the people that needs a slight encouragement at that particular moment so don't get up off the lounge or out of that comfy chair.

Where the Rubber Meets the Road with God

I was attending a weekend men's retreat at the Billy Graham training center in Ashville, North Carolina when the guest speaker asked a very interesting question. He asked us to raise our hands if we had any detailed information about the life of our great grandparents. I don't think a single man raised his hand. He commented that it was sad that we knew so little about our ancestors, and challenged us to change that. I took the challenge!

Dick Erickson started his business career managing a tire store in Panama City, FL. He opened the first Sun Tire in Orange Park, FL, in 1981, added ten more stores over the next several decades, and sold the business to a large national chain of tire stores in 2018. How the Rubber Meets the Road documents Dick's journey from growing up in rural North Dakota, to flying helicopters in the Marine Corps in Vietnam, to his remarkable success in the retail tire business. The book also covers four key business topics. Customer Service: It's nearly impossible to have ongoing profitable growth in business without providing excellent customer service. From the friendly greeting a person gets when entering a business to being treated with respect after the sale, every element of customer service plays a part in how the customer feels about a business. Profit-sharing: Dick closely observed a very successful chain of tire stores in Oregon. One of the keys to their success was profit-sharing. It motivated employees to cut costs and improve profits. Dick incorporated much of what he saw in that organization in the Sun Tire program. Mentoring: Dick sought out and received excellent mentoring throughout his career in business. Many people in business have wisdom and are willing to share it. An entrepreneur can learn a great deal simply by asking the right person the right questions. Profitable Growth: Growth is important for any organization, but it has to be at the right pace with the right people to be profitable. Business owners and aspiring entrepreneurs who are looking for ways to improve their bottom lines and their impact on their communities will benefit from reading How the Rubber Meets the Road.
