When charter schools first arrived on the American educational scene, few observers suspected that within two decades thousands of these schools would be established, serving almost a million and a half children across forty states. The widespread popularity of these schools, and of the charter movement itself, speaks to the unique and chronic desire for substantive change in American education. As an innovation in governance, the ultimate goal of the charter movement is to improve learning opportunities for all students--not only those who attend charter schools but also students in public schools that are affected by competition from charters. In *The Charter School Experiment*, a select group of leading scholars

traces the development of one of the most dynamic and powerful areas of education reform. Contributors with varying perspectives on the charter movement carefully evaluate how well charter schools are fulfilling the goals originally set out for them: introducing competition to the school sector, promoting more equitable access to quality schools, and encouraging innovation to improve educational outcomes. They explore the unintended effects of the charter school experiment over the past two decades, and conclude that charter schools are entering a new phase of their development, beginning to serve purposes significantly different from those originally set out for them. Since its publication in 1944, many Americans have described Gunnar Myrdal's *An American Dilemma* as a defining text on U.S. race relations. Here, Maribel Morey confirms with historical evidence what many critics of the book have suspected: *An American Dilemma* was not commissioned, funded, or written with the goal of challenging white supremacy. Instead, Morey reveals it was commissioned by

---

Carnegie Corporation president Frederick Keppel, and researched and written by Myrdal, with the intent of solidifying white rule over Black people in the United States. Morey details the complex global origins of An American Dilemma, illustrating its links to Carnegie Corporation's funding of social science research meant to help white policymakers in the Anglo-American world address perceived problems in their governance of Black people. Morey also unpacks the text itself, arguing that Myrdal ultimately complemented his funder's intentions for the project by keeping white Americans as his principal audience and guiding them towards a national policy program on Black Americans that would keep intact white domination. Because for Myrdal and Carnegie Corporation alike, international order rested on white Anglo-Americans' continued ability to dominate effectively.

A new model for the relationship between science and democracy that spans policymaking, the funding and conduct of research, and our approach to new technologies Our ability to act on some of the most pressing issues of our time, from pandemics and climate change to artificial intelligence and nuclear weapons, depends on knowledge provided by scientists and other experts. Meanwhile, contemporary political life is increasingly characterized by problematic responses to expertise, with denials of science on the one hand and complaints about the ignorance of the citizenry on the other. Politics

and Expertise offers a new model for the relationship between science and democracy, rooted in the ways in which scientific knowledge and the political context of its use are imperfect. Zeynep Pamuk starts from the fact that science is uncertain, incomplete, and contested, and shows how scientists' judgments about what is significant and useful shape the agenda and framing of political decisions. The challenge, Pamuk argues, is to ensure that democracies can expose and contest the assumptions and omissions of scientists, instead of choosing between wholesale acceptance or rejection of expertise. To this end, she argues for institutions that support scientific dissent, proposes an adversarial "science court" to facilitate the public scrutiny of science, reimagines structures for funding scientific research, and provocatively suggests restricting research into dangerous new technologies. Through rigorous philosophical analysis and fascinating examples, Politics and Expertise moves the conversation beyond the dichotomy between technocracy and populism and develops a better answer for how to govern and use science democratically.

reprint of the report exactly as it was issued by the government, it is without analysis or commentary from any other source and with nothing subtracted except for the material redacted by the Department of Justice. The mission of the Mueller investigation was to examine Russian interference in the 2016 Presidential election, consisting of possible links, or "collusion," between the Donald Trump campaign and the Russian government of Vladimir Putin as well as any allegations of obstruction of justice in this regard. It was also intended to detect and prosecute, where warranted, any other crimes that surfaced during the course of the investigation. The report consists of a detailed summary of the various investigations and inquiries that the Special Counsel and colleagues carried out in these areas. The investigation was initiated in the aftermath of the firing of FBI Director James Comey by Donald Trump on May 9, 2017. The FBI, under Director Comey, had already been investigating links between Russia and the Trump campaign. Mueller submitted his report to Attorney General William Barr on March 22, 2019, and the Department of Justice released the redacted report one month later.

Inspiring students to take action! The Lobbying Strategy Handbook shows how students with passion for a cause can learn to successfully influence lawmaking in the United States. The centerpiece of this book is a 10-step framework that walks the reader through the essential elements of conducting a lobbying campaign. The framework is illustrated by three separate case studies that show how groups of people have successfully used the model. Undergraduate, graduate students, and anyone interested in making a difference, can use the book to guide them in creating and conducting a grassroots campaign from start to finish. Video: Lobbying Is NOT a 4-Letter Word Author Pat Libby, Professor of Practice and Director of the Institute for Nonprofit Education and Research, University of San Diego, discusses lobbying rules and strategy in her video presentation, Lobbying Is NOT a 4-Letter Word. *A Wheelbarrow and a Shovel* documents the rags-to-riches success story of John Boll

who built a real estate empire by developing manufactured home communities around the world then selling his company to the State of Washington Pension Fund for \$2.3

billion. *A Wheelbarrow and a Shovel*

documents the truly remarkable story of one of America's most unlikely business

success stories. Starting with only a

wheelbarrow and a shovel, as well as the

same American dream that led his parents to leave their native Holland for the United

States, John Boll built a real estate empire in the most unlikely of ways—by developing

and improving manufactured home communities around the country. It's a rags-

to-riches tale that could only happen in

America—and only with the hand of God

leading the way. Before Boll sold his

company to the State of Washington Pension Fund for \$2.3 billion, he was the first person

to take a collection of mobile home

communities to Wall Street.

A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy. It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal – that social and economic rewards should follow achievement rather than breeding – reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if, both up and down the social ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the

radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within. Markovits also knows that, if we understand that meritocratic inequality produces near-universal harm, we can cure it. When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward, towards a new world that might once again afford dignity and prosperity to the American people.

The deliberate devaluation of Blacks and their communities has had very real, far-reaching, and negative economic and social effects. An enduring white supremacist myth claims brutal conditions in Black communities are mainly the result of Black people's collective choices and moral failings. "That's just how they are" or "there's really no excuse": we've all heard those not so subtle digs. But there is nothing wrong with Black people that ending racism can't solve. We haven't known how much the country will gain by properly valuing homes and businesses, family structures, voters, and school districts in Black neighborhoods. And we need to know. Noted educator, journalist, and scholar Andre Perry takes readers on a tour of six Black-majority cities whose assets and strengths are undervalued. Perry begins in his hometown of Wilkinsburg, a small city east of Pittsburgh that, unlike its much larger neighbor, is struggling and failing to attract new jobs and industry. Bringing his own personal story of growing up in Black-majority Wilkinsburg, Perry also spotlights five others where he has deep connections:

---

Detroit, Birmingham, New Orleans, Atlanta, and Washington, D.C. He provides an intimate look at the assets that should be of greater value to residents—and that can be if they demand it. Perry provides a new means of determining the value of Black communities. Rejecting policies shaped by flawed perspectives of the past and present, it gives fresh insights on the historical effects of racism and provides a new value paradigm to limit them in the future. Know Your Price demonstrates the worth of Black people's intrinsic personal strengths, real property, and traditional institutions. These assets are a means of empowerment and, as Perry argues in this provocative and very personal book, are what we need to know and understand to build Black prosperity.

The Top Censored Stories and Media

Analysis of 2011-2012

The Foundation Directory

Every year since 1976, Project Censored, our nation's oldest news-monitoring group--a university-wide project at Sonoma State University founded by Carl Jensen, directed for many years by Peter Phillips, and now under the leadership of Mickey Huff--has produced a Top-25 list of underreported news stories and a book, Censored, dedicated to the stories that ought to be top features on the nightly news, but that are missing because of media bias and self-censorship. Seven Stories Press has been publishing this yearbook since 1994, featuring the top stories listed democratically in order of importance according to students, faculty, and a national panel of judges. Each of the top stories is presented at length, alongside updates from the investigative reporters who broke the stories. Beyond the Top-25 stories, additional chapters delve further into timely media topics: The Censored News and Media Analysis section provides annual updates on Junk Food News and

News Abuse, Censored Deja Vu, signs of hope in the alternative and news media, and the state of media bias and alternative coverage around the world. In the Truth Emergency section, scholars and journalists take a critical look at the US/NATO military-industrial-media empire. And in the Project Censored International section, the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world. A perennial favorite of booksellers, teachers, and readers everywhere, Censored is one of the strongest life signs of our current collective desire to get the news we citizens need--despite what Big Media tells us.

Fully revised, updated and expanded third edition Lobbying is a global industry which thrives wherever democracy is established. This third edition of Lobbying by Lionel Zetter straddles the globe, from the USA to Japan. It covers the Westminster and Scottish Parliaments, and the Welsh, Northern Ireland and London Assemblies. It examines the lobbying scenes in the USA and Brussels. Finally, the book also deals with Asia, the Gulf and the Middle East. The acknowledged industry bible, this book explains all aspects of lobbying in an expert yet accessible manner. Areas covered include: - the historical background to lobbying, and the ethical and regulatory frameworks - advice on how to break into lobbying - the mechanics of lobbying, and the techniques employed by lobbyists around the world - the various types of lobbying and public affairs campaigns - how to use the media and third-party advocates in support of a campaign - a step-by-step guide to planning and implementing a lobbying campaign. The author is an acknowledged expert in his field, and this book represents a distillation of his decades of experience. There are also 'top tips' from some of the most senior lobbyists in the world, as well as contributions from elected politicians.
