Getting the books Pennlive Must Apologize For Labeling Environmental Leaders As Domestic Terror Threat now is not type of inspiring means. You could not abandoned going behind books store or library or borrowing from your connections to right of entry them. This is an totally simple means to specifically acquire lead by on-line. This online publication Pennlive Must Apologize For Labeling Environmental Leaders As Domestic Terror Threat can be one of the options to accompany you similar to having supplementary time.

It will not waste your time. believe me, the e-book will extremely atmosphere you new issue to read. Just invest tiny times to open this on-line revelation Pennlive Must Apologize For Labeling Environmental Leaders As Domestic Terror Threat as with ease as review them wherever you are now.

Public service professionals — government officials, those in the legal system, first responders, and investigators — confront ethical issues every day. In an environment where each decision can mean the difference between life and death or freedom and imprisonment, deciding on an ethical course of action can pose challenges to even the most seasoned professional. Ethics for the Public Service Professional explores these issues as they relate to virtually all areas of public service. Examining the history of ethics, codes, and legislation relating to public service, this volume: Provides timely coverage of current police and public service controversies Discusses important new mechanisms of accountability, including comprehensive use-of-force reporting, citizen complaint procedures, early intervention systems, and police auditors Presents real-life situations faced by those within public service, encouraging discussion and debate Incorporates news stories throughout the text to demonstrate the diverse scope of ethical issues within the public service workplace Includes a list of Web sites to facilitate further research Each chapter begins with learning objectives to emphasize active rather than passive learning, along with key terms for readers to assimilate. Many chapters contain Ripped from the Headlines current event examples that demonstrate actual scenarios involving the issues discussed within the chapter. Case studies and summations further assist readers in comprehending the material, along with sections offering insight from public servants specializing in a particular area. Review questions at the end of each chapter test comprehension.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

“ A bizarre yet effective yoking of the spy and horror genres. ” —The Washington Post Book World The Lovecraftian Singularity has descended upon the world in The Labyrinth Index, beginning an exciting new story arc in Charles Stross' Hugo Award-winning Laundry Files series! Since she was promoted to the head of the Lords Select Committee on Sanguinary Affairs, every workday for Mhari Murphy has been a nightmare. It doesn't help that her boss, the new Prime Minister of Britain, is a manipulative and deceptive pain in the butt. But what else can she expect when working under the thumb of none other than the elder god N'yar Lat-Hotep a.k.a the Creeping Chaos? Mhari's most recent assignment takes her and a ragtag team of former Laundry agents across the pond into the depths of North America. The United States president has gone missing. Not that Americans are alarmed. For some mysterious reason, most of the country has forgotten the executive branch even exists. Perhaps it has to do with the Nazgûl currently occupying the government and attempting to summon Cthulhu. It's now up to Mhari and her team to race against the Nazgûl's vampire-manned dragnet to find and, for his own protection, kidnap the president. Who knew an egomaniacal, malevolent deity would have a soft spot for international relations?

Written by one of the country's most experienced and entertaining etymological detectives, The Hidden History of Coined Words provides a delightful excavation into the process by which words became minted. Not only does Ralph Keyes give us the who-what-where of it all, but delights in stories that reveal the mysteries of successful coinage.

In 1922, at the age of two, Petey's distraught parents commit him to the state's insane asylum, unaware that their son is actually suffering from severe cerebral palsy. Bound by his wheelchair and struggling to communicate with the people around him, Petey finds a way to remain kind and generous despite the horrific conditions in his new "home." Through the decades, he befriends several caretakers but is heartbroken when each eventually leaves him. Determined not to be hurt again, he vows to no longer let hope of lifelong friends and family torment him. That changes after he is moved into a nursing home and meets a young teen named Trevor Ladd; he sees something in the boy and decides to risk friendship one last time. Trevor, new to town and a bit of a loner, is at first weary of the old man in the wheelchair. But after hearing more of his story, Trevor learns that there is much more to Petey than meets the eye. Petey is a touching story of friendship, discovery, and the uplifting power of the human spirit.

So Many Christians, So Few Lions is a provocative look at anti-Christian sentiments in America. Drawing on both quantitative and qualitative research, authors George Yancey

and David A. Williamson show that even though (or perhaps because) Christianity is the dominant religion in the United States, bias against Christians also exists—particularly against conservative Christians—and that this bias is worth understanding. The book does not attempt to show the prevalence of anti-Christian sentiments—called Christianophobia—but rather to document it, to dig into where and how it exists, to explore who harbors these attitudes, and to examine how this bias plays itself out in everyday life. Excerpts from the authors' interviews highlight the fear and hatred that some people harbor towards Christians, especially the Christian right, and the ways these people exhibit elements of bigotry, prejudice, and dehumanization. The authors argue that understanding anti-Christian bias is important for understanding some social dynamics in America, and they offer practical suggestions to help reduce religious intolerance of all kinds.

Most people get information about child sexual abuse from media coverage, social movements, or conversations with family and friends. *Confronting Child Sexual Abuse* describes how these forces shape our views of victims and offenders, while also providing an in-depth look at prevention efforts and current research. Sociologist Anne Nurse has synthesized studies spanning the fields of psychology, sociology, communications, criminology, and political science to produce this nuanced, accessible, and up-to-date account. Topics include the prevalence of abuse, the impact of abuse on victims and families, offender characteristics, abuse in institutions, and the efficacy of treatments. Written for people who care for kids, for students considering careers in criminal justice or human services, and for anyone seeking information about this devastating issue, Nurse's book offers new public policy ideas as well as practical suggestions on how to engage in prevention work. Interactive links to studies, videos, and podcasts connect readers to further resources.

Beneficial for law or philosophy students, or practicing lawyers, *Ethics and the Legal Profession* includes articles by eminent philosophers and lawyers that explore moral problems in legal practice. The text is divided into six sections, each dealing with an important issue: The History and Organization of the Profession in the United States; The Moral Critique of Professionalism; The Adversary System; Conflict of Interest and Professional Judgment; Perjury and Confidentiality; and Making Legal Services Available. Combining in-depth case studies with careful analysis, the editors help students and professionals distinguish between moral and technical judgment, become clearer about the meaning of moral discourse in the workplace, and better appreciate the higher callings of their profession. Raising provocative questions about the rationale and limits of professional responsibility, this text provides insights into the ethics of the legal profession at a time when technology, globalization, and the changing economics of lawyering are reshaping the profession of law in ways still hard to predict.

The defining geopolitical contest of the twenty-first century is between China and the US. But is it avoidable? And if it happens, is the outcome already inevitable? China and America are world powers without serious rivals. They eye each other warily across the Pacific; they communicate poorly; there seems little natural empathy. A massive geopolitical contest has begun.

America prizes freedom; China values freedom from chaos. America values strategic decisiveness; China values patience. America is becoming society of lasting inequality; China a meritocracy. America has abandoned multilateralism; China welcomes it. Kishore Mahbubani, a diplomat and scholar with unrivalled access to policymakers in Beijing and Washington, has written the definitive guide to the deep fault lines in the relationship, a clear-eyed assessment of the risk of any confrontation, and a bracingly honest appraisal of the strengths and weaknesses, and superpower eccentricities, of the US and China.

The physical, emotional, and social milestones of every girl's life: what we've lost and gained in the 21st century. Caitlin Flanagan's essays about marriage, sex, and families have sparked national debates. Now she turns her attention to girls: the biological and cultural milestones for girls today, and how they shape a girl's sense of herself. The transition from girl to woman is an experience that has changed radically over the generations: everything from how a girl learns about her period to how she expects to be treated by boys and men. Girls today observe these passages very differently, and yet the landmarks themselves have remained remarkably constant-proof, Flanagan believes, of their significance. In a world where protections of girls' privacy and personal freedom seem to disappear every day, the ultimate challenge modern parents face is finding a way to defend both.

This book analyzes both local and national House and Senate campaigns in the 2016 election to reveal how distinctive campaign dynamics have a collective national impact. Featuring detailed case studies of ten competitive House races and twelve high-profile U.S. Senate campaigns, the volume provides a deep analysis of campaign dynamics and the polarizing effects of the presidential campaigns of Donald Trump and Hillary Clinton. These studies are contextualized by four thematic chapters that cover the most salient talking points of the 2016 elections, including voter registration laws and congressional candidates' use of Twitter. As penetrating as it is comprehensive, this volume provides readers with a fuller understanding of the divided landscape of contemporary American political campaigns.

This book explores, through case studies, the interplay between religion, culture, government, and politics in diverse societies on questions arising in the domain of bioethics. The case studies draw from multiple disciplinary

perspectives, including history, theology, law, bioethics, public policy, science, and medicine. The text's global perspective permits a comparison of the differing approaches adopted by countries facing similar bioethical quandaries and the extent to which religion has or has not been instrumental in addressing such dilemmas. Secular and religious societies across the globe are being confronted with complex questions involving religious belief and the extent to which specific religious perspectives have in the past or should in the future be adopted as official policy. Bioethical issues involving the interplay of religion and government have become particularly notable in recent years. How these issues are resolved has major implications for individuals, healthcare providers, and the future of medical research and medical care. Topics explored among the chapters include: Homosexuality: Sin, Crime, Pathology, Identity, Behavior Medical Error: Truth-telling, Apology, and Forgiveness Refusal of Medical Treatment Medical Deportation Case Study: Nazism, Religion, and Human Experimentation The New Frontier: Cloning Case Studies in Society, Religion, and Bioethics will find an engaged audience among researchers and scholars in history, religion/theology, medicine, and bioethics interested in the influence of religion on bioethical decision-making. Students—particularly upper-level undergraduate and graduate students interested in bioethics, humanities, and theology—will find the text helpful in understanding the processes through which religion may serve as a basis for both societal policy and law and individual decision-making in health-related matters.

In this electrifying new thriller in the New York Times bestselling series, a convicted murderer is on the run and Chief of Police Kate Burkholder must catch him before he strikes again.

Identifies and explains the constitutional problems triggered by the government's speech, and proposes a new framework for thinking about them.

A unique blend of espionage thrills and Lovecraftian horror, Hugo Award-winning author Charles Stross's Laundry Files continues with Quantum of Nightmares. It's a brave new Britain under the New Management. The avuncular Prime Minister is an ancient eldritch god of unimaginable power. Crime is plummeting as almost every offense is punishable by death. And everywhere you look, there are people with strange powers, some of which they can control, and some, not so much. Hyperorganized and formidable, Eve Starkey defeated her boss, the louche magical adept and billionaire Rupert de Montfort Bigge, in a supernatural duel to the death. Now she's in charge of the Bigge Corporation—just in time to discover the lethal trap Rupert set for her long ago. Wendy Deere's transhuman abilities have gotten her through many a scrape. Now she's gainfully employed

investigating unauthorized supernatural shenanigans. She swore to herself she wouldn't again get entangled with Eve Starkey's bohemian brother Imp and his crew of transhuman misfits. Yeah, right. Mary Macandless has powers of her own. Right now she's pretending to be a nanny in order to kidnap the children of a pair of famous, Government-authorized superheroes. These children have powers of their own, and Mary Macandless is in way over her head. Amanda Sullivan is the HR manager of a minor grocery chain, much oppressed by her glossy blonde boss—who is cooking up an appalling, extralegal scheme literally involving human flesh. All of these stories will come together, with world-bending results... "For all of Stross's genuine ability to spook and dismay, The Laundry Files are some of the most tremendously humane books I've ever read." —Tamsyn Muir, author of Gideon the Ninth and Harrow the Ninth At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Roads to Congress 2016

A Blueprint for Delivering Success in the Public Sector

American Elections in a Divided Landscape

Hearing Before the Subcommittee on Health of the Committee on Finance, United States Senate, One Hundredth Congress, First Session, June 12, 1987

"Zoukis gives excellent examples to demonstrate that the U.S. would benefit from higher education for inmates in prison...a strongly suggested purchase...highly recommended"--Choice The United States accounts for 5 percent of the world's population, yet incarcerates about 25 percent of the world's prisoners. Examining a wealth of studies by researchers and correctional professionals, and the experience of educators, this book shows recidivism rates drop in direct correlation with the amount of education prisoners receive, and the rate drops dramatically with each additional level of education attained. Presenting a workable solution to America's mass incarceration and recidivism problems, this book demonstrates that great fiscal benefits arise when modest sums are spent educating prisoners. Educating prisoners brings a reduction in crime and social disruption, reduced domestic spending and a rise in quality of life.

Divisive issues affect us and cause much introspection: Taxes and government spending increase, but the budget is not balanced.

Entitlement programs and immigration—can they be reformed? Can we create jobs and positively impact the economy by utilizing domestic energy resources? Can the Health Care debacle be turned around? What are the REAL issues surrounding the Second Amendment? Have The Patriot Act and the TSA gone too far? Civil union vs. marriage - who is right? How do we work together to curtail the devastation of these unresolved issues? Dr. Glenn Mollette uses an informed and enlightened approach to tackle these issues. His experience as a husband, father, pastor, entrepreneur, seminary president and author of 10 books, provides

understandable, common sense solutions. In this book, Dr. Mollette stimulates much soul-searching concerning these issues and encourages us to stand together to make a difference.

"If you liked Big Little Lies, you'll want to crack open [Little Broken Things]." –Southern Living An unforgettable and moving novel about an affluent suburban family whose carefully constructed façade crumbles with the unexpected arrival of an endangered young girl. I have something for you. When Quinn Cruz receives that cryptic text message from her older sister Nora, she doesn't think much of it. They haven't seen each other in nearly a year and their relationship consists mostly of infrequent phone calls and the occasional email. But when a haunted-looking Nora shows up just hours later, a chain reaction is set into motion that will change both of their lives forever. Nora's "something" is more shocking than Quinn could have ever imagined: a little girl, cowering and wide-eyed. Nora hands her over to Quinn with instructions to keep her safe and disappears, leaving Quinn as the unlikely caretaker of a girl introduced simply as Lucy. "Steeped in menace...a race-to-the-finish family drama" (People), Little Broken Things explores life and death, family and freedom, and the lengths one woman will go to protect the ones she loves.

Examines the impact of DNA technology on issues of ethics, civil liberties, privacy, and security.

This book examines Donald Trump's longstanding connections to professional wrestling in relation to how he uses and exploits language, and the ways in which he has weaponized going public never before seen in previous administrations. Trump utilizes the language of wrestling to make rhetorical appeals and draws upon its theatrical tactics to redefine expectations of spaces to fundamentally change the nature of political expectations and expression. Wrestling is almost always about stories within a confined space, and Donald Trump inculcated many of its techniques to command an audience with rhetoric. The emotional performance supersedes truth or accuracy; factual exactness matters less than your presentation of the material. As Donald Trump blends performance and public service, social confusion over boundaries has occurred. Theatrical norms, when applied to daily life, generate vastly different reactions than within the artificial confines of an arena. It is not simply a muddling of public and private, but rather a jumbling of theatrical and generalized social standards. This book examines these aspects and explores how Donald Trump has also utilized well-established presidential tools in completely new ways in an attempt to build the strongest executive branch in American history.

Building Successful Government Building A Winning Culture In Government: A revolutionary blueprint for building organizational success in the private sector ? and now in government Government Culture: Our government organizations face political fallout, media scrutiny, reduced funding, and the many challenges involved in motivating large, multi-layered and highly regulated organizations. It's no surprise that many government organizations report that their employees are less engaged than ever and that leaders feel helpless to change the situation. In many cases, employees and government leaders are caught in a vicious cycle. Performance declines, scrutiny increases, and employee paralysis ensues. How do you break this cycle and begin building successful government? You change the mindset from "leaders are a select few in the organization" to "everyone can

and should be a leader." This simple shift is key to building successful government organizations in the 21st century. If every member of the organization is a leader, it enables government organizations to leverage the power of five highly effective and proven FranklinCovey practices that have made private sector organizations successful and are now bringing about positive change in public sector organizations. Five highly effective practices that you will learn in Building a Winning Culture in Government: These five practices will transform your government organization into one that is more responsive to the public interest and provide a more rewarding, less stressful, and overall better life for your employees:

- Practice 1: Lead with purpose and find your organization's mission, mantra, or manifesto: An engaging mission must appeal to people's passionate interests, leverage their distinctive talents, satisfy the conscience, and meet a compelling market need. You will learn how to find the voice of the organization and connect and align accordingly.
- Practice 2: Make the 7 Habits of Highly Successful People your organization's operating system: Move the 7 Habits to the next level by learning how to execute your strategy with excellence and precision using the "4 Disciplines of Execution". Learn the significance of "wildly important goals", "lead measures", creating a "compelling scoreboard" and a "cadence of accountability".
- Practice 3: Unleash and engage people to do infinitely more than you imagined they could: You will learn the process for building successful government and reducing stress within your team by applying a system that enables you to "Act on the Important, Don't React to the Urgent".
- Practice 4: Inspire trust and be the most trusted organization possible: Trust is the great accelerator. Where trust is high, everything is faster and less complicated, and where trust is low, everything is slower, costlier, and encumbered with suspicion.
- Practice 5: Create intense loyalty with all stakeholders: Loyal workers and loyal customers are worth gold. Mission Essential: Building a Winning Culture in Government will help government leaders create lasting change in their organizations ? build a culture of passion and excellence, serve the public interest, provide satisfaction to team members, and create a better life for everyone involved. If you liked FranklinCovey's The 7 Habits of Highly Effective People and The 4 Disciplines of Execution, you'll love Building A Winning Culture In Government.

This is a disturbing account of the campaign to promote fear and

hatred of Muslims in the United States and Europe, from the 'War on Terror' to Trump's travel ban. Nathan Lean takes us through a world of conservative bloggers, right-wing talk show hosts, evangelical religious leaders and politicians, united in their efforts to demonise Muslims as the new enemy of Western civilization. Lean uncovers their scare tactics, traces their sources of funding and exposes the ideologies that drive their lucrative propaganda machine. This second edition includes new material on the Trump campaign and presidency, tracking the rise to power of some of the Islamophobia Industry's most extreme figures. Writers from Breitbart, liberal anti-Muslim campaigners such as Bill Maher, and Trump-influencers such as Steve Bannon, Newt Gingrich and John Bolton are all put in the spotlight. This shocking and enlightening book is now more relevant than ever. Petey (new cover)

The goal of this book is to help the reader gain knowledge on ethical and legal issues in the field of student affairs and develop competency to follow the profession's principles and standards of conduct. The significance of the book is due to its focus on the practical value of ethics and legal issues and its aim to address the knowledge, skills, and dispositions required of student affairs educators to develop and maintain integrity in their life and work as described by the ACPA/NASPA. The text offers readers a number of major unique features: It offers multiple ethical decision-making models to guide student affairs educators in their ethical decision-making process. It proposes that ethics is not an individual but an organizational responsibility. It offers that ethical decision making is a professional skill that can be practiced and applied in student affairs educators' day-to-day practice. It presents the reader with the most current legal issues in student affairs and higher education. Finally, it reflects three themes: integration of ACPA/NASPA competency areas; development of professional identity; and application of knowledge and theory to practice. The book is critical and timely. A book that focuses on ethical and legal issues in student affairs is needed for faculty in preparation programs, new professionals navigating their identity as student affairs educators, and a resource for mid- and senior-level professionals facilitating ongoing professional development. The book begins to address what it means to have a professional identity, which is ground in the shared ethical and legal values espoused within the profession and academia. Each chapter uniquely contributes to the complexity embedded in the study of ethics and how that is applied to

practice. Additionally, the volume is a balance of procedural knowledge, case illustrations, and guided practice exercises to facilitate the reader's ability to translate the theory and research discussed into professional decision making and application.

Rodricus Crawford was sentenced to die for the murder of his beautiful baby boy. After years on death row, evidence confirmed what Crawford had claimed all along: he was innocent, and his son had died from an undiagnosed illness. In *Smoke but No Fire*, former New York City public defender Jessica S. Henry tells the heartbreaking stories of innocent people convicted of crimes that simply never occurred. A suicide is mislabeled a homicide. An accidental fire is mislabeled an arson. A false allegation of assault is invented to resolve a custody dispute. Henry exposes a deeply flawed criminal justice system that allows—even encourages—these no-crime wrongful convictions to regularly occur. This eye-opening book grapples with the chilling reality that far too many innocent people spend real years behind bars for fictional crimes.

A pioneering exploration of form, meaning, theme and function in African American slang, illustrated with thousands of contextual examples.

Winner of the 2009 ACHE James A. Hamilton Book of the Year Award! "This book is a tour de force, and no one but John Nance could have written it. Only he could have made sophisticated, scientifically disciplined instruction about the nature and roots of safety into a page-turner. Medical care has a ton yet to learn from the decades of progress that have brought aviation to unprecedented levels of safety, and, in instructing us all about those lessons, John Nance is not just a bridge-builder he is the bridge." --Donald M. Berwick, MD, MPP, President and CEO, Institute for Healthcare Improvement (IHI)

Educators remove over 3.45 million students from school annually for disciplinary reasons, despite strong evidence that school suspension policies are harmful to students. The research presented in this volume demonstrates that disciplinary policies and practices that schools control directly exacerbate today's profound inequities in educational opportunity and outcomes. Part I explores how suspensions flow along the lines of race, gender, and disability status. Part II examines potential remedies that show great promise, including a district-wide approach in Cleveland, Ohio, aimed at social and emotional learning strategies. *Closing the School Discipline Gap* is a call for action that focuses on an area in which public schools can and should make powerful improvements, in a relatively short period

of time. Contributors include Robert Balfanz, Jamilya Blake, Dewey Cornell, Jeremy D. Finn, Thalia González, Anne Gregory, Daniel J. Losen, David M. Osher, Russell J. Skiba, Ivory A. Toldson "Closing the School Discipline Gap can make an enormous difference in reducing disciplinary exclusions across the country. This book not only exposes unsound practices and their disparate impact on the historically disadvantaged, but provides educators, policymakers, and community advocates with an array of remedies that are proven effective or hold great promise.

Educators, communities, and students alike can benefit from the promising interventions and well-grounded recommendations."

—Linda Darling-Hammond, Charles E. Ducommun Professor of Education, Stanford University "For over four decades school discipline policies and practices in too many places have pushed children out of school, especially children of color. *Closing the School Discipline Gap* shows that adults have the power—and responsibility—to change school climates to better meet the needs of children. This volume is a call to action for policymakers, educators, parents, and students." —Marian Wright Edelman, president, Children's Defense Fund

CNN host and best-selling author Fareed Zakaria argues for a renewed commitment to the world's most valuable educational tradition. The liberal arts are under attack. The governors of Florida, Texas, and North Carolina have all pledged that they will not spend taxpayer money subsidizing the liberal arts, and they seem to have an unlikely ally in President Obama. While at a General Electric plant in early 2014, Obama remarked, "I promise you, folks can make a lot more, potentially, with skilled manufacturing or the trades than they might with an art history degree." These messages are hitting home: majors like English and history, once very popular and highly respected, are in steep decline. "I get it," writes Fareed Zakaria, recalling the atmosphere in India where he grew up, which was even more obsessed with getting a skills-based education. However, the CNN host and best-selling author explains why this widely held view is mistaken and shortsighted. Zakaria eloquently expounds on the virtues of a liberal arts education—how to write clearly, how to express yourself convincingly, and how to think analytically. He turns our leaders' vocational argument on its head. American routine manufacturing jobs continue to get automated or outsourced, and specific vocational knowledge is often outdated within a few years. Engineering is a great profession, but key

---

value-added skills you will also need are creativity, lateral thinking, design, communication, storytelling, and, more than anything, the ability to continually learn and enjoy learning—precisely the gifts of a liberal education. Zakaria argues that technology is transforming education, opening up access to the best courses and classes in a vast variety of subjects for millions around the world. We are at the dawn of the greatest expansion of the idea of a liberal education in human history.

Neo-Nazi and ultra-right groups are mushrooming throughout Europe at an alarming rate. Electoral support for fascist organizations is reflected in the 17 strong Group of the European Right led by Jean Mari Le Pen within the European Parliament. Destabilization and economic crisis in Eastern Europe and spiralling unemployment in the West have led millions to look to nationalistic and authoritarian groups - from the Pamyat movement in the Soviet Union to the Republikaner Partei in Germany. The attendant racism and violence is escalating.
