“ A good read for anyone who wants to understand what actually determines whether a developing economy will succeed ” (Bill Gates, “ Top 5 Books of the Year ”). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said “ should be named chief myth-buster for Asian business. ” In How Asia Works, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell ’ s in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need “ export discipline, ” a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron ’ s stifling of reform to the explosive growth at a Korean steel mill. “ Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic. ” —The Economist

This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 20112012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada’s automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an expos of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers cant beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches. 'I could have done with a copy of Ad Astra in December 2015!' -Tim Peake 'A wonderful, wise and witty guide for space explorers everywhere.' - Richard Osman 'A must read both for intrepid space explorers and misty-eyed dreamers. Now, to space!' - Hannah Fry 'Few people are more knowledgeable, celebratory and witty about space travel than Dallas Campbell.' - Adam Rutherford Need some space? For almost all human history we’ve been firmly rooted to the Earth. And, sure, it's got some good things going for it: nice views, friendly inhabitants, good coffee. Air. But what if you want to get off? Whether you've got itchy feet and need a bit of a break, or you're looking for a complete change of scene, this book has all the information you'll need to leave, with FREE expert

advice from the men and woman who can actually make it happen. Do I need a passport? How do I know if I have the right stuff? Can I take my dog? What spacesuit do I need? Where am I going to go? What am I going to eat? As well as being a deeply impractical guide to getting off the planet, this is an eclectic and beautifully illustrated mix-tape of space travel stories - both real and imagined. From the migrating lunar geese that flew us to the moon in the 1600's, to Elon Musk's wild plan to get humans to Mars en masse in the future; from the history of early rocket science to the Soviet tortoises that secretly won the space race. A collection for anyone who has looked up in wonder at the stars... And then wondered how to get there. 'The next best thing to actually heading off into space.' - Jim Al-Khalili 'Few people are more knowledgeable, celebratory and witty about space travel than Dallas Campbell.' - Adam Rutherford 'If, like me, you dream of going into space, this is definitely the place to start the journey.' - Dan Snow 'A must have volume for astronauts and armchair astronauts alike.' - Helen Sharman OBE 'Funny, factual and beautiful.' - Shaun Keavney 'Read it, make notes, and be ready when the day comes.' - Helen Czerski

July 16, 2019 will be the 50th anniversary of the Apollo 11 mission, celebrating an incredible decade in science history. In *Eight Years to the Moon*, unique personal stories of NASA engineers and MIT computer experts are interwoven with Nancy's gripping style to tell the story of Apollo 11 in a fresh and riveting way. Despite incredible hurdles and catastrophes, Apollo 11 launched a successful mission within President Kennedy's proposed timeline. The employees of NASA made the impossible possible—creating new technology and completely reimagining space travel. In *Eight Years to the Moon*, readers are transported into the space race of the 1960s. Nancy begins in 1962—when NASA had to build the Manned Spacecraft Center and space exploration first became a priority—and spans to the successful Apollo 11 mission. With firsthand accounts from Henry Pohl (director of engineering at Johnson Space Center), Glynn Lunney (Apollo flight director), and Frank Hughes (lead test engineer for the Apollo command and lunar module simulators), it's easy to get wrapped up in the excitement of what it was like. In the words of Henry Pohl when he saw his first rocket test launch, "When that thing lit off I had never seen such power in my life...I decided right then and there that's what I wanted to be part of..." And he was far from alone. Filled with stories from those involved and interviews with other Apollo experts, *Eight Years to the Moon* is a book that will delight anyone who has ever looked up at the moon and wondered how we got there.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously

published as Auto Repair For Dummies, 2nd Edition (9780764599026).

While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

A riveting and beautifully designed YA biography that shows how a once-bullied school boy became an iconic visionary who the New York Times described as "arguably the most important and successful entrepreneur in the world." Elon Musk is the visionary behind SpaceX and CEO of the electric car company Tesla. He is working on unique and daring improvements to both public transit and solar energy. And then, there's his highly-publicized plans for colonizing Mars... But behind the mind-blowing headlines and legendary drive is the story of a bullied and beaten school boy, who through creativity and determination decided to rewrite his story and find his own way to make the world a better place. And to do so with a sense of fun and style. From hosting raves to pay for college to re-writing the rules on space travel, Elon Musk has always gone his own way. And now, award-winning investigative journalist, Anna Crowley Redding takes readers on a well-researched trip through Elon's life and accomplishments.

Competition Policy

In a world of rising tensions between Russia and the United States, the Middle East and Europe, Sunnis and Shiites, Islamism and liberalism, Turkey is at the epicentre. And at the heart of Turkey is its right-wing populist president, Recep Tayyip Erdoğan. Since 2002, Erdoğan has consolidated his hold on domestic politics while using military and diplomatic means to solidify Turkey as a regional power. His crackdown has been brutal and consistent - scores of journalists arrested, academics officially banned from leaving the country, university deans fired and many of the highest-ranking military officers arrested. In some senses, the nefarious and failed 2016 coup has given Erdoğan the licence to make good on his repeated promise to bring order and stability under a 'strongman'. Here, leading Turkish expert Soner Cagaptay will look at Erdoğan's roots in Turkish history, what he believes in and how he has cemented his rule, as well as what this means for the world. The book will also unpick the 'threats' Erdogan has worked to combat - from the liberal Turks to the Gulen movement, from coup plotters to Kurdish nationalists - all of which have culminated in the crisis of modern Turkey.

The first-ever book on this subject establishes a rigid, transparent and useful methodology for investigating the material metabolism of anthropogenic systems. Using Material Flow Analysis (MFA), the main sources, flows, stocks, and emissions of man-made and natural materials can be determined. By demonstrating the application of MFA, this book reveals how resources can be conserved and the environment protected within complex systems. The fourteen case studies presented exemplify the potential for MFA to contribute to sustainable materials management. Exercises throughout the book deepen comprehension and expertise. The authors have had success in applying MFA to various fields, and now promote the use of MFA so that future engineers and planners have a common method for solving resource-oriented problems.
