Robotic process automation (RPA) is a software technology that makes it easy to build, deploy, and manage software robots that emulate human actions interacting with digital systems and software. Just like people, software robots can do things like understanding what's on a screen, complete the right keystrokes, navigate systems, identify and extract data, and perform a wide range of defined actions. But software robots can do it faster and more consistently than people, without the need to get up and stretch or take a coffee break. Are you seeking to establish up an automation Centre of Excellence (CoE) in your organization to leverage RPA and start creating automation solutions, or perhaps you want your new CoE to mature and grow? It's critical to understand the entire lifecycle of robotic process automation, from identifying the problem to designing, building, and testing the solution to supporting the new capability, whether you've only heard of it yesterday, have been doing it for a few months, or have been doing it for a few years. This book takes you through Lean IA's 36 steps of the AEIO YOU methodology to scale successfully, discussing tools, techniques, roles, and responsibilities. You will notice that the AEIO YOU method which you can use to bring RPA into your company can also be used for introducing any new technology.

As manufacturing control systems converge with manufacturing automation systems and systems supporting the back office, IT managers in

Bring RPA Into Your Company With AEIO YOU Method: Set Up A Coe

Investment & Securities Industry Market Research, Statistics, Trends & Leading Companies

The investment and securities industry is rebounding from the dismal markets of the early 2000s. Improved corporate profits,

low interest rates and efforts to improve corporate governance have led the way, despite recent scandals in the mutual funds industry. Meanwhile, the investment industry is increasingly a global business. This is partly due to the needs of multinational corporations to list their stocks or issue debt in more than one nation. For example, ADRs (American Depository Receipts) are increasingly popular instruments. Cross-border investments and acquisitions continue at a rapid pace. Discount brokerages are enjoying improved levels of trading, while investment banks are developing new ways to create lucrative fees. This carefully-researched book (which includes a database of leading companies on CD-ROM) is a complete investments, securities and asset management market research and business intelligence tool -- everything you need to know about the business of investments, including: 1) Investment banking, 2) Stock brokers, 3) Discount brokers, 4) Online brokers, 5) Significant trends in financial information technologies, 6) Asset management, 7) Stock ownership by individuals and households, 8) 401(k)s and pension plans, 9) Mutual funds, 10) ETFs (Exchange traded funds), 11) ECNs (Electronic Communication Networks), 12) Developments at the NYSE and other exchanges. The book includes a complete chapter of vital industry statistics, an industry glossary, a complete list of industry contacts such as industry associations and government agencies, and our in-depth profiles of more than 300 leading firms in the investment and asset management business. A CD-ROM database of these firms is included with the book. This book will be very useful to those engineers who want to learn how to PLC program, SCADA graphics design, VFD

Commissioning and filed instruments. The fee for the complete course is very costly. So with this book, they can learn and it will be useful to crack interviews also. Even experienced engineers can read this book to learn programming.

Capitalist Nigger is an explosive and jarring indictment of the black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive race, a consumer race that depends on other communities for its culture, its language, its feeding and its clothing. Despite enormous natural resources, blacks are economic slaves because they lack the 'devil-may-care' attitude and the 'killer instinct' of the Caucasian, as well as the spider web mentality of the Asian. A Capitalist Nigger must embody ruthlessness in pursuit of excellence in his drive towards achieving the goal of becoming an economic warrior. In putting forward the idea of the Capitalist Nigger, Chika Onyeani charts a road to success whereby black economic warriors employ the 'Spider Web Doctrine' – discipline, self-reliance, ruthlessness – to escape from their victim mentality. Born in Nigeria, Chika Onyeani is a journalist, editor and former diplomat.

The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 700 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone

digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Our new Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac covers these sectors in detail. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies.
