Because we are living in an era of Green Science and Technology, developments in the field of bio- and nano- polymer composite materials for advanced structural and medical applications is a rapidly emerging area and the subject of scientific attention. In light of the continuously deteriorating environmental conditions, researchers all over the world have focused an enormous amount of scientific research towards bio-based materials because of their cost effectiveness, eco-friendliness and renewability. This handbook deals with cellulose fibers and nano-fibers and covers the latest advances in bio- and nano- polymer composite materials. This rapidly expanding field is generating many exciting new materials with novel properties and promises to yield advanced applications in diverse fields. This book reviews vital issues and topics and will be of interest to academicians, research scholars, polymer engineers and researchers in industries working in the subject area. It will also be a valuable resource for undergraduate and postgraduate students at

institutes of plastic engineering and other technical institutes.

Immerse students in the world of intellectual property law and provide essential perspectives to practice in this area. The Fifth Edition of Loren & Miller's Intellectual Property Law continues to provide engaging and challenging coverage of all the major types of intellectual property law: trade secret, patent, copyright, and trademark law. Covering cases and developments through Spring 2017, the book includes all the latest Supreme Court cases that are vital to a survey course, including *Star Athletica v. Varsity Brands* (as a principal case) and contextualized discussion of *Matal v. Tam* and *Impression Products v. Lexmark International*. Each chapter has been fully revised, with changes—some small, some more extensive—that optimize clear presentation of tightly edited cases and concise notes and questions. The book kicks off with an introduction that explores the basic policies animating i.p. law and concludes with two overarching chapters—one on i.p. limits (preemption and first sale), and one on remedies (to redress past harm and prevent future harm). This book will both guide student analysis and challenge students to make vital connections within and across doctrines and policies.

Visual statistics accomplishes the goal of bringing the most complex and advanced statistical methods within the reach of those with little statistical training by using animated graphics of the data. This text shows how to make dynamic visualizations that are fully interactive and respond instantly to the user's nudges and prods.

This book is a comprehensive resource covering the principles and practice of the conservation and restoration of furniture, and other decorative art objects made wholly or partly of wood. It integrates theory with practice to show the principles which govern interaction between wooden objects, the environmental and conservation treatments and the factors which need to be taken into account to arrive at acceptable solutions to conservation problems. The practical knowledge and experience of a team of conservators active in the field are brought together with theoretical and reference material from diverse sources and unified within a systematic framework. Specialist conservators from related disciplines cover diverse materials often incorporated into furniture.

This is the definitive reference for microphones and loudspeakers, your one-stop reference covering in great detail all you could want and need to know about electroacoustics devices (microphones and loudspeakers). Covering both the technology and the practical set up and placement this guide explores and bridges the link between experience and the technology, giving you a better understanding of the tools to use and why, leading to greatly improved results.

Learn the key techniques, tips, and tricks for pit, barrel, raku, and wood firing. Fall in love with flames, wood, and the effect that unique firing methods have on pottery. Move beyond the electric kiln and explore the dramatic surfaces of raku, the flashes of salt firing, and the rustic look of ash rivulets. In this book, Lindsay Oesterritter provides a crash course in the most accessible methods of alternative firing. Raku firing requires minimal equipment and can easily be fueled with a standard propane tank. Likewise, pit and barrel firing do not require much in the way of initial investment. Yet all these techniques provide an immediate glimpse into the magic of firing.

Bright reds and blues, dramatic black and white crackle, even metallic luster are instantly possible. For more experienced potters and studios looking to offer more, Oesterritter also explores wood-fired kilns. Drawing on years of experience and extensive interviews with fellow wood-fire potters, there is no comparable resource on the market. Features on top potters working today get to the heart of specialty techniques and asides show firing variations and traditional kilns in different cultures around the world. A gallery of showstopping work from a diverse group of artists round out the package and inspire you to get started.
