Harrison Birtwistle has become the most eminent and acclaimed of contemporary British composers. This book provides a comprehensive view of his large and varied output. It contains descriptions of every published work, and also of a number of withdrawn and unpublished pieces. Revealing light is often cast on the more familiar pieces by considering these lesser-known areas of Birtwistle's oeuvre. The book is structured around a number of broad themes - themes of significance to Birtwistle, but also to much other music. These include theatre, song, time and texture. This approach emphasizes the music's multifarious ways of meaning; now that even the academic world no longer takes the merits of 'difficult' contemporary music for granted, it is all the more important to assess what it represents beyond mere technical innovation. Adlington thus avoids in-depth technical analysis, focusing instead upon the music's wider cultural significance.

Offering comprehensive coverage of classical music, this guide surveys more than eleven thousand albums and presents biographies of five hundred composers and eight hundred performers, as well as twenty-three essays on forms, eras, and genres of classical music. Original.

Chosen alongside celebrated poets Louise Glück and Czesław Miłosz, Bob Hicok's *Animal Soul* was the standout surprise of the 2002 National Book Critics Circle Award nominations. According to author David Wojahn, a three-time winner of the Pushcart Prize, this collection of poetry is the best collection yet by a poet who has become one of the most individual and necessary voices of his generation. An almost prophetic rage seems to inhabit these poems, which present us with a speaker who is tender and brutally rueful by turns. Bob Hicok asks to be a voice of conscience in a conscience-less world. And, like all true prophets, his rage and consternation in the end transform themselves into a form of prayer, what one of his poems calls a 'mad . . . devotion.' Hicok is able to instruct and console us, and that is a very rare thing indeed. "

William Sanday (1843-1920) is best known today perhaps for his editing of a now classic work on the Synoptic Gospels and his co-authorship of a still-important commentary on the book of Romans (ICC). However, this great Oxford scholar also produced a large number of other important books and other writings. This volume, the first in the new Trinity Academic Press sub-series, *Classics in Biblical and Theological Studies*, gathers together in an accessible form a number of Sanday's important articles in the areas of method, language and exegesis. In the section on method, Sanday has articles on biblical criticism and interpretation. His writings on language include his responses in his dispute with A. Roberts. The section on exegesis touches on interpretation of the parables, understanding the son of man, issues in Acts 15, and, perhaps most importantly, his dispute with W. Ramsay. This is an important collection of essays by an important but now unfortunately often overlooked scholar of a previous generation.

The *Rough Guide to Classical Music* is the ideal handbook, spanning a thousand years of music from Gregorian chant via Bach and Beethoven to contemporaries such as Thomas Adès and Kaija Saariaho. Both a CD buyer's guide and a who's who, the guide includes concise biographical profiles of more than 200 composers and informative summaries of the major compositions in all genres, from chamber works to operatic epics. For novices and experts alike, the fully updated fifth edition features contemporary composer Helmut Lachenmann and Widor, the 19th century organ composer of 'Toccata' wedding fame, as well as dozens more works added for existing composers. You'll find a new 'Top 10's' section with accessible introductory listings including the Top 10 operas and the Top 10 symphonies plus new essay boxes on topics such as "Baroque - a style or a period?" and "The clarinet comes of age". The *Rough Guide to Classical Music* features fresh and incisive reviews of hundreds of CDs, selecting the very best of the latest recordings and reissues as well as more than 150 illustrations of composers and performers, including a rare archive of photos.

The author of *Empire of the Sun* and other acclaimed novels and stories, British writer J. G. Ballard is here given a penetrating analysis, his work being explored in terms of its internal coherence, thematic continuity and development, and mythic and metaphysical aspects.

Ballard's fiction is widely considered to be a critique of our secular, rational, technological culture, but the writer is shown not to be fatalistic, but, rather, concerned with the redemption and regeneration of the human psyche. This study examines Ballard's output over four decades and compares him to several British and American writers of the post-World War II era--within and beyond the often too-rigidly applied categorization of science fiction, as well as to Romantic visionaries of the past.

"Gabriel Said Reynolds tells the story of Islam in this brief illustrated survey, beginning with Muhammad's early life and rise to power, then tracing the origins and development of the Quran juxtaposed with biblical literature, and concluding with an overview of modern and

fundamentalist narratives of the origin of Islam. Reynolds offers a fascinating look at the structure and meaning of the Qur'an, revealing the ways in which biblical language is used to advance the Qur'an's religious meaning. Reynolds' analysis identifies the motives that shaped each narrative Islamic, Jewish, and Christian. The book's conclusion yields a rich understanding of diverse interpretations of Islam's emergence, suggesting that its emergence is itself ever-developing" -- Publisher description.

G.I. Gurdjieff (d. 1949) remains an important, if controversial, figure in early 20th-century Western Esoteric thought. Born in the culturally diverse region of the Caucasus, Gurdjieff traveled in Asia, Africa, and elsewhere in search of practical spiritual knowledge. Though oftentimes allusive, references to Sufi teachings and characters take a prominent position in Gurdjieff's work and writings. Since his death, a discourse on Gurdjieff and Sufism has developed through the contributions as well as critiques of his students and interlocutors. J.G. Bennett began an experimental 'Fourth Way' school in England in the 1970s which included the introduction of Sufi practices and teachings. In America this discourse has further expanded through the collaboration and engagement of contemporary Sufi teachers. This work does not simply demonstrate the influence of Gurdjieff and his ideas, but approaches the specific discourse on and about Gurdjieff and Sufism in the context of contemporary religious and spiritual teachings, particularly in the United States, and highlights some of the adaptive, boundary-crossing, and hybrid features that have led to the continuing influence of Sufism.

Today's most pressing environmental problems are planetary in scope, confounding the political will of any one nation. How can we solve them? Global Environmental Governance offers the essential information, theory, and practical insight needed to tackle this critical challenge. It examines ten major environmental threats—climate disruption, biodiversity loss, acid rain, ozone depletion, deforestation, desertification, freshwater degradation and shortages, marine fisheries decline, toxic pollutants, and excess nitrogen—and explores how they can be addressed through treaties, governance regimes, and new forms of international cooperation. Written by Gus Speth, one of the architects of the international environmental movement, and accomplished political scientist Peter M. Haas, Global Environmental Governance tells the story of how the community of nations, nongovernmental organizations, scientists, and multinational corporations have in recent decades created an unprecedented set of laws and institutions intended to help solve large-scale environmental problems. The book critically examines the serious shortcomings of current efforts and the underlying reasons why disturbing trends persist. It presents key concepts in international law and regime formation in simple, accessible language, and describes the current institutional landscape as well as lessons learned and new directions needed in international governance. Global Environmental Governance is a concise guide, with lists of key terms, study questions, and other features designed to help readers think about and understand the concepts discussed.

A Dark Night's Dreaming opens by defining the shape of horror fiction today, illuminating the genre's narrative themes, psychological and social contexts, and historical development. The core of the volume focuses on the lives and major works of the six who have dramatically shaped the genre: William Peter Blatty, Thomas Harris, Stephen King, Anne Rice, Peter Straub, and Whitley Strieber. A final chapter analyzes the complex relationship between horror fiction and its adaptation to film. Looking beyond the tormented maidens, madmen, monsters, and other archetypes of the genre, these critics differentiate contemporary Gothic fiction from that of earlier generations while demonstrating that horror remains one of the most important and consistent strains connecting the diverse elements of the American literary tradition. They comment on the genre's enormous popularity and undeniable influence in American society and scrutinize its changing representations of women, monsters, and gore. The volume concludes with an extensive bibliography of primary and secondary works.

Night is the terrifying record of Elie Wiesel's memories of the death of his family, the death of his own innocence, and his despair as a deeply observant Jew confronting the absolute evil of man.
