Tor Seidler's sweet and humorous story about Toes, the runt of a litter of cats who is born with seven toes on each paw. Intelligent and aptly named, Toes has seven toes on each foot. The other kittens, fearing his condition might be contagious, refuse to play with him. So one night, a lonely Toes runs away. He takes refuge in a strange basement, where a struggling musician named Sebastian eventually finds him. As he grapples with his own insecurities as a violinist, Sebastian learns from Toes that the most beautiful duet can be the one made by true friendship. National Book Award finalist Tor Seidler once again introduces an endearing animal who will live in readers' hearts forever.

While working for the summer at Cod Almighty, his local fish and chip shop, Ben Warner meets Lila, an unusual young woman, who makes him the unwitting guinea pig in a bet--between Socrates, president of the World of Ideas for more than two millennia, and his arch-rival Wittgenstein--over whether or not philosophy can improve your life. Toddler dancers bounce, swirl, hop, and finally go to sleep, in a book with textured pages. From the bestselling author of Thank You for Smoking and Make Russia Great Again comes a comic tour de force, the story of one man's spiraling journey through lockdown during the Covid-19 pandemic. During the pandemic, an aging screenwriter is holed up in a coastal South Carolina town with his beloved second wife, Peaches. He's been binge-eating for a year and developed a notable rapport with the local fast-food chain Hippo King. He struggles to work—a ludicrous screenplay about a Nazi attempt to kidnap FDR and, naturally, an article for Etymology Today on English words of Carthaginian origin. He's told Peaches so often about the origins of the world mayonnaise that she's developed an aversion to using the condiment. He thinks he has Covid. His wife thinks he is losing his mind. In short, your typical pandemic worries. Things were going from bad to worse even before his doctor suggested a battery of brain tests. He knows what that means: dementia! But even in these scary times, there are plenty of things to distract him. His iPhone is fat-shaming him. He's been trying to read Proust and thinks the French novelist missed his true calling as a parfumer. And he's discovered nefarious Russian influence on the local coroner's race. Why is Putin so keen to control who decides who died peacefully and who by foul play in Pimento County? Could it be the local military base? Has Anyone Seen My Toes? is a hilarious romp through a time that has been anything but funny.

The Living Age

Now a major motion picture starring Cole Sprouse and Haley Lu Richardson! Goodreads Choice Winner, Best Young Adult Fiction of 2019 In this #1 New York Times bestselling novel that 's perfect for fans of John Green ' s The Fault in Our Stars, two teens fall in love with just one minor complication—they can ' t get within a few feet of each other without risking their lives. Can you love someone you can never touch? Stella Grant likes to be in control—even though her totally out of control lungs have sent her in and out of the hospital most of her life. At this point, what Stella needs to control most is keeping herself away from anyone or anything that might pass along an infection and jeopardize the possibility of a lung transplant. Six feet apart. No exceptions. The only thing Will Newman wants to be in control of is getting out of this hospital. He couldn ' t care less about his treatments, or a fancy new clinical drug trial. Soon, he ' ll turn eighteen and then he ' ll be able to unplug all these machines and actually go see the world, not just its hospitals. Will ' s exactly what Stella needs to stay away from. If he so much as breathes on Stella she could lose her spot on the transplant list. Either one of them could die. The only way to stay alive is to stay apart. But suddenly six feet doesn ' t feel like safety. It feels like punishment. What if they could steal back just a little bit of the space their broken lungs have stolen from them? Would five feet apart really be so dangerous if it stops their hearts from breaking too? An Overview of Human Potential The quintessence and expansion of his Essays. Stan Kapuscinski draws on his extensive experience to share with us his unique perspective on

the world we live in. He asserts his Perception of Reality in terms of historical, sociological, religious, scientific and philosophical context. This book will help you stand on your own feet with such confidence that nothing will ever upset your balance. Excerpts from 5 Star Reviews: "The more one reads Stanislaw Kapuscinski, the more convincing he becomes. Not that he tries to convince you... He merely states, clearly, what his view of reality is, and, lo and behold, with each sentence it seems to make more and more sense. What an extraordinary man!" (Marvin D. Clark, Smashwords) ..".The Bibliography at the end of this book is a living testament to the author's desire to master the secrets of reality." (Bahdan Czytelnik, Poland) ..".I strongly recommend it to all who pride themselves in having an open mind." (Anetta Bach, Smashwords) ..".If this book doesn't waken you from your mental abnegation of truth perceived by your mind, (not just your senses), nothing will. Or, perhaps, you already live in a universe of your own making? Highly recommended!" (Adam Kerry, Smashwords) ..".The philosophy Kapuscinski developed here, seems to permeate all his novels. And... I am awfully glad it does!" (Hanna, Smashwords)

From eyes to ears, tummy to nose, legs to toes, there's a lot for baby to discover - and even more for a family to love. Justice of the Peace
Fifteen-year-old Ben Warner is dizzy with boredom working at his local fish and chips shop. One evening, a young woman saunters in and, between mouthfuls of chips, invites him to visit her in the World of Ideas. Ben is excited, but suspicious. The World of Ideas is the philosopher's quarter of the afterlife, and adorable Lila has been residing there for thirty years, but being dead is just the start of her problems. Lila's boss, Socrates, President of the World of Ideas for the last 2,109 years, has made a bet with his rival, Wittgenstein, that philosophy can improve your life. If Socrates loses he cedes the presidency to his crabby nemesis. For the wager, they choose Ben as their unwitting guinea pig, and Lila's mission is to prove to him that his life-annoying sisters, adolescent blues, smarmy boss and all-can be changed fundamentally for the better through philosophy. So begins a mind-bending guided tour through the big questions in life. When is orange not orange? Do we have free will? Does time speed up when your heart beats faster? Charming and full of wit and humor, Lucy Eyre's If Minds Had Toes warmly shows that few other questions-how we live and whether our lives have meaning-are more important.

This unique memoir of reading the classics to find strength and wisdom "makes an elegant case for literature as an everyday companion" (The New York Times Book Review). While undergoing a series of personal and family crises, Christopher Beha discovered that his grandmother had used the Harvard Classics—the renowned "five foot shelf" of great world literature compiled in the early twentieth century by Charles William Eliot—to educate herself during the Great Depression. He decided to follow her example and turn to this series of great books for answers—and recounts the experience here, in a smart, big-hearted, and inspirational mix of memoir and intellectual excursion that "deftly illustrates how books can save one's life" (Helen Schulman). "As he grapples with the death of his beloved aunt, a debilitating case of Lyme disease, and other major and minor calamities, Beha finds that writers as diverse as Wordsworth, Pascal, Kant, and Mill had been there before, and that the results of their struggles to find meaning in life could inform his own." —The Seattle Times "An important book [and] a sheer blast to read." —Heidi Julavits

Phenomenology of Spirit

In an original defense of armchair philosophy, Michael Strevens seeks to restore philosophy to its traditional position as an essential part of the quest for knowledge, by reshaping debates about the nature of philosophical thinking. His approach explores experimental philosophy's methodological implications and the cognitive science of concepts.

One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?" Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. Thus begins Jostein Gaarder's unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy.
