The Lotus Europa was Colin Chapman and Lotus's first mid-engined road car, and was produced from 1966 through to 1975. Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well

as featuring in historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars. A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid

during the late 1950s.

Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.

Celebrating a quarter century of the car that redefined its genre.

[apply edits made above] The Mazda MX-5, (known as Miata in North America and Eunos Roadster in Japan),

revolutionized the lightweight two-seater roadster market. By taking the front-engine, rear-wheel-drive layout of traditional British and Italian roadsters and combining it with the modern function and reliability for which Japanese cars were justly famous, Mazda created what many consider the perfect sports car. The MX-5 became the best-selling sports car of all time, selling over a million units worldwide.

Customers proved that they hadn't lost their desire for simple, lightweight two-seat convertibles; they had simply lost their desire for unreliable, archaic European anachronisms that caught on fire as part of their charm. In 2009, English automotive critic Jeremy Clarkson wrote: "The fact is that if you want a sports car, the MX-5 is perfect. Nothing on the road will give you better value. Nothing will give you so much fun. The only reason I'm giving it five stars is because I can't give it 14."
