 The Life of Ibn Sina
 "Imagine it is the seventh century. As most of Europe continues its descent into a long period of intellectually dormancy, a quiet yet powerful academic revolution is erupting in another corner of the world. Over the next centuries, the geniuses of Muslim society will thrust the boundaries of knowledge forward to such a degree that their innovations still shape civilizations to this day. The staggering achievements of these men and women influenced the development of modern mathematics, science, engineering, and medicine. 1001 Inventions: The Enduring Legacy of Muslim Civilization sheds new light on this golden era that was once lost to so many, and celebrates the heritage that we all share"--P. [4] of cover.
 This new edition of one of the most widely used course books on Islamic civilizations around the world has been substantially revised to incorporate the new scholarship and insights of the last twenty-five years. Ira Lapidus' history explores the beginnings and transformations of Islamic civilizations in the Middle East and details Islam's worldwide diffusion. The history is divided into four parts. Part I is a comprehensive account of pre-Islamic late antiquity; the beginnings of Islam; the early Islamic empires; and Islamic religious, artistic, legal and

intellectual cultures. Part II deals with the construction in the Middle East of Islamic religious communities and states to the fifteenth century. Part III includes the history to the nineteenth century of Islamic North Africa and Spain; the Ottoman, Safavid and Mughal empires; and other Islamic societies in Asia and Africa. Part IV accounts for the impact of European commercial and imperial domination on Islamic societies and traces the development of the modern national state system and the simultaneous Islamic revival from the early nineteenth century to the present.

Eighteen essays depict the historical and cultural background of Islamic society, its contributions to world literature, art, science, and medicine, and the consequences of its interaction with the Christian West
 In 1412, Europe was a

miserable backwater ravaged by plague, bad sanitation and incessant war, while the Orient was home to dazzling civilizations. Yet, somehow, the West came to dominate the Rest for most of the next half millennium. In this vital, brilliant book, Niall Ferguson reveals the six 'killer applications' that the Rest lacked- competition, science, property rights, medicine, consumerism and the work ethic. And he asks- do we still have these winning tools? Or is this the end of Western ascendancy? Winner of the Estoril Global Issues Distinguished Book Prize 2013

This volume rejects the notion that Islam's sacred text is error free and cannot be critically evaluated. The study of the Koran must develop and mature. Scholars of Islam are of course familiar with the book's many errors and contradictions, but these inherent flaws have rarely been revealed to a wider public. The Origins of the Koran is an attempt to remedy this deficiency by bringing together classic critical essays which raise key issues surrounding Islam's holy book. Divided into four parts, this important anthology begins with Theodor N ö ldeke's first truly scientific study of the Koran. Part Two focuses on the difficulty of establishing a reliable Koranic text, while Part Three examines the Jewish, Christian, and Zoroastrian sources of Muhammad's revelation. Part Four is a consideration of the controversial interpretations of contemporary scholar John Wansbrough, who questions the historical reliability of the earliest Islamic sources. This superb collection, which includes additional selections from Leone Caetani, Arthur Jeffery, David Margoliouth, Andrew Rippin, C.C. Torrey, and more, will prove

indispensable to scholars and all those interested in the textual underpinning of one of the fastest growing religions in the world. Ibn Warraq is the highly acclaimed author of *Why I Am Not a Muslim* and *Defending the West*. He is also the editor of *The Origins of the Koran, What the Koran Really Says, Leaving Islam, The Quest for the Historical Muhammad, and Which Koran?*.

To meet the care needs of today's diverse patient community, healthcare professionals must learn to care in environments comprising different worldviews, communication styles and expectations. To meet this challenge, it is essential that they operate from a solid foundation of knowledge, based on high standards for cultural competence in nursing practice. *Cultural Competence in Caring for Muslim Patients* is designed for nurses and allied healthcare professionals. It offers a deeper insight into ways in which the Islamic faith is intertwined with patient care, and explores approaches

with which to effectively address the varying healthcare requirements of a growing and diverse Muslim community. Following a clear and accessible format, the book discusses key issues including: - The identity and religious beliefs of Muslims - The ethical dimension in caring - Understanding the Muslim family system - Health considerations during fasting and pilgrimage (Hajj) What's more, case studies, activities and discussion questions throughout actively support learning and reflective practices. This insightful guide will prove a valuable asset for any nurse or healthcare professional looking to develop their understanding of how to deliver culturally compassionate and congruent care. These case studies link genealogical knowledge to particular circumstances in which it was created, circulated and promoted. They stress the malleability of kinship and memory, and the interests this malleability serves. From the Prophet's family tree to the present, ideas about kinship and descent have shaped communal and national identities in Muslim societies. So an understanding of genealogy is vital to our understanding of Muslim societies, particularly with regard to the generation, preservation and manipulation of genealogical knowledge. This publication covers global

megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in *Global Trends 2030*, including: a review of the four previous *Global Trends* reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations.
