Now in its twentieth edition, the MOONLIGHT CHRONICLES has brought Dan's creed of "truth, beauty, and really big sabbaticals from the convention of life" to thousands across the country. With such a following, Dan figured it was time to collect his offbeat observations into book form in hopes of inspiring other would-be journal writers to take pen, camera, and brush in hand. As Dan is fond of noting "Seems there's tons of empty journal books, but not too many on how to fill 'em up!" In *HOW TO MAKE A JOURNAL*, Dan answers the call, teaching readers how to tap into those pent-up creative juices and collect their life experiences on paper.

This engaging guide will equip students who are non-native speakers of English with the tools and confidence to respond effectively and appropriately to written assignments at university. It supports students in the development of essential writing skills, such as structuring paragraphs and building an argument, and provides practical guidance on adhering to the conventions of academic writing. It guides students systematically through a series of text analyses which bring out key linguistic and rhetorical features, making complex textual issues manageable and understandable for learners of all abilities. This is an ideal self-study aid for non-native English speakers, both on pre-sessional language courses and on degree programmes, who need to get to grips with the conventions of academic writing.

Joseph Smith, founding prophet and martyr of the Church of Jesus Christ of Latter-day Saints, personally wrote, dictated, or commissioned thousands of documents. Among these are several highly significant sources that scholars have used over and over again in their attempts to reconstruct the founding era of Mormonism, usually by focusing solely on content, without a deep appreciation for how and why a document was produced. This book offers case studies of the sources most often used by historians of the early Mormon experience. Each chapter takes a particular document as its primary subject, considering the production of a document as an historical event in itself, with its own background, purpose, circumstances, and consequences. The documents are examined not merely as sources of information but as artifacts that reflect aspects of the general culture and particular circumstances in which they were created. This book will help historians working in the founding era of Mormonism gain a more solid grounding in the period's documentary record by supplying important information on major primary sources.
