By providing a framework for solving statistical problems, this eighth Australian and New Zealand edition of Business Statistics teaches skills that students can use throughout their career. The book shows how to analyse data effectively by focusing on the relationship between the kind of problem being faced, the type of data involved and the appropriate statistical technique for solving the problem. Business Statistics emphasises applications over theory. It illustrates how vital statistical methods and tools are for today's managers and analysts, and how to apply them to business problems using real-world data. Using a proven three-step Identify-Compute-Interpret (ICI) approach to problem solving, the text shows students how to: 1. IDENTIFY the correct statistical technique by focusing on the problem objective and data type; 2. COMPUTE the statistics doing them by hand and using Excel; and 3. INTERPRET results in the context of the problem. This unique approach enhances comprehension and practical skills. The text's vast assortment of data-driven examples, exercises and cases covers the various functional areas of business, demonstrating the statistical applications that marketing managers, financial analysts, accountants, economists and others use. Completely up-to-date and with a NEW XLStat analysis plugin/tool, the eighth edition offers comprehensive coverage, current examples and an increased focus on applications in the real world. Written by one of ANZ 's premier sustainability and social accounting academics, An Introduction to Accounting: Accountability in Organisations and Society brings today 's accounting hot topics of corporate accountability, sustainability and social responsibility to life with the only complete textbook created from the ground up for these modern accounting teaching and learning concepts.

An Introduction to Accounting: Accountability in Organisations and Society takes a unique approach in embracing from the start the notion of accountability for the environment and sustainability in accounting; the structure, content and learning activities provide students with an understanding of accounting 's pervasive and transformative role as a social practice and

organisational driver. It shows that environments, ideas and values change; the interconnectivity of society; that the planet must be respected as a resource; and that people are affected/influenced by the information they receive and the way it is presented. It is emphasised that accounting and accountability are key aspects of every person 's life and that the practice of accounting, while often being seen as very technical in nature, has many social implications. Learning accounting through the lens of sustainability and the environment embeds this perspective in students ' minds so that in their careers they will actively seek and use accounting information to make decisions that take into consideration accountability for the environment.
