A close look at the evolution of American political alliances in Asia and their future While the American alliance system in Asia has been fundamental to the region's security and prosperity for seven decades, today it encounters challenges from the growth of China-based regional organizations. How was the American alliance system originally established in Asia, and is it currently under threat? How are competing security designs being influenced by the United States and China? In *Powerplay*, Victor Cha draws from theories about alliances, unipolarity, and regime complexity to examine the evolution of the U.S. alliance system and the reasons for its continued importance in Asia and the world. Cha delves into the fears, motivations, and aspirations of the Truman and Eisenhower presidencies as they contemplated alliances with the Republic of China, Republic of Korea, and Japan at the outset of the Cold War. Their choice of a bilateral "hub and spokes" security design for Asia was entirely different from the system created in Europe, but it was essential for its time. Cha argues that the alliance system ' s innovations in the twenty-first century contribute to its resiliency in the face of

China ' s increasing prominence, and that the task for the world is not to choose between American and Chinese institutions, but to maximize stability and economic progress amid Asia ' s increasingly complex political landscape. Exploring U.S. bilateral relations in Asia after World War II, *Powerplay* takes an original look at how global alliances are achieved and maintained.

The New York Times bestselling author of Always imagines life on Boat Street, a floating community on Seattle's Lake Union, home to people of artistic spirit who for decades protect the dark secret of one startling night in 1959. Fleeing an East Coast life marred by tragedy, Ada Santorini takes up residence on houseboat number seven on Boat Street in search of inspiration and new opportunities. When she discovers a trunk left behind by Penny Wentworth, a young newlywed who lived on the boat half a century earlier, she is immediately drawn into this long lost story. Ever-curious, Ada longs to know her predecessor's fate, but does not suspect that Penny's mysterious past and her own clouded future are destined to converge...

commentator Dana Loesch gives
her views on the history and
intent of the Second Amendment

and discusses what she believes gun confiscation would mean to Americans' basic rights as citizens. How many people in America today are truly well-versed in the history of the Second Amendment, and why it was included in the Bill of Rights? In *HANDS OFF MY GUN*, Dana Loesch explains why the Founding Fathers included the right to bear arms in the Bill of Rights, and argues that "gun control" regulations throughout history have been used to keep minority populations under control. She also contends that current arguments in favor of gun control are primarily based on emotions and fear. This narrative is a must-read for every Second Amendment supporter. Dana Loesch is a determined and fierce advocate for those rights and shouts out: hands off my gun!

This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America. Walter Prescott Webb (1888-1963), a towering figure in Texas and western history and letters, published an abundance of books—but for decades the autobiography he'd written late in life sat largely undisturbed among his papers. Webb's remarkable story appears here in print for the first time, edited and annotated by Michael Collins, an authority on Texas history. This firsthand account offers readers a window on the life, the work, and the world of one of the most interesting thinkers in the history, and historiography, of Texas. Webb's narrative carries us from the drought-scarred rim of West Texas known as the Cross Timbers, to the hardscrabble farm life that formed him, to the bright lights of Austin and the University of Texas, where he truly came of age. Fascinating for

the picture it summons of the Texas of his youth and the intellectual landscape of his career, Webb's autobiography also offers intriguing insights into the way his epic work, *The Great Plains*, evolved. He also describes the struggle behind his groundbreaking history of that storied frontier fighting force the Texas Rangers. Along the way, Webb reflects on the nature of historical research, the role that Texas and the West have played in American history, the importance of education, and the place of universities in our national culture. More than a rare encounter with a true American character's life and thought, *A Texan's Story* is also a uniquely enlightening look into the understanding, writing, and teaching of western American history in its formative years. *The Autobiography of Walter Prescott Webb*

The Biopolitics of Gender
It began as an intriguing piece of puzzle-solving - and ended with the discovery of the greatest secret of all. Dissatisfied with the explanations of previous researchers, Richard Andrews and Paul Schellenberger applied mathematical logic to the enduring mystery of the Rennes-le-Chateau and the 'treasure' alleged to be buried there. The quest began with an investigation into the activities of a group of 19th century priests who had become embroiled in the legend. These priests had grown rich because of their involvement and had maintained the anonymity of the

paymasters, but in 1993 an extraordinary clue came to light which suggested the priests were engaged in activities at odds with traditional Roman Catholic pastimes. A series of paintings was unearthed which incorporated a cryptic, obscure geometry; a set of interrelating shapes with a very direct link to the priests' habitat and spiritual role. Through the centuries a pattern emerged - a web of concealment on maps, in fine art, on tombstones which defied coincidence and pointed to one very specific location...

This book develops a politico-ethical response to climate change that accounts for the novelty and uncertainty that it entails. This volume explores the ethical dimensions of climate change and posits that one must view it as a social construction intimately tied to political issues in order to understand and overcome this environmental challenge. To show how this ethos builds upon the need for new forms of responsiveness, Anfinson analyzes it in terms of four features: commitment, worldly sensitivity, political disposition, and practice. Each of these features is developed by putting four thinkers - Kierkegaard, Nietzsche, Schmitt, and Foucault respectively - in conversation with the literature on climate change. In doing so, this book shows how social habits and norms can be transformed through subjective thought and behavior in the context of a global environmental crisis. Presenting a multidisciplinary engagement with the politics, philosophy, and science of climate change, this book will be of great interest to students and scholars of climate change, environmental politics, environmental philosophy and environmental humanities.

The text has been divided in two volumes: Volume I (Ch. 1-13) & Volume II (Ch. 14-22). In addition to the review material and some basic topics as discussed in the opening chapter, the main text in Volume I covers topics on infinite series, differential and integral calculus, matrices, vector calculus, ordinary differential equations, special functions and Laplace transforms. Volume II covers topics on complex analysis, Fourier analysis, partial differential equations and statistics. The present book has numerous distinguishing features over the already existing books on the same topic. The chapters have been planned to create interest among the readers to study and apply the mathematical tools. The subject has been presented in a very lucid and precise manner with a wide variety of examples and exercises, which would eventually help the reader for hassle free study. The Origins of the American Alliance System in Asia

Born in the drive-in theater backseats of the 1970s, the demonic visions of Teen Movie Hell fueled the VCR, cable TV, and shopping mall multiplex booms of the 1980s before collapsing in the 1990s in a pixelated pile of cable dissipation and Internet indulgences. Between George Lucas's American Graffiti in 1973 and Richard Linklater's Dazed and Confused twenty years later, lust-driven laugh riots on the order of Animal House, Porky's, Fast Times at Ridgemont High, and Revenge of the Nerds boomed at the box office and conquered pop culture by celebrating adolescent misbehavior run amok. Puberty-powered comedy classics including Meatballs, Caddyshack, Valley Girl, and The Last American Virgin fused hormonal overloads with anti-authority abandon and below-the-belt slapstick to create a genre that also unleashed the anarchic, sex-mad likes of The Swinging Cheerleaders, H.O.T.S., Hardbodies, Private School, Joysticks, Spring Break, and Zapped!—as well as the mainstream variations Sixteen Candles, The Breakfast Club, Ferris Bueller's Day Off, and Pretty in Pink. All-seeing author Mike "McBeardo" McPadden (Heavy Metal Movies) passes righteous judgment over the entire genre, one boobs-and-boner opus at a time. In more than 350 reviews and sidebars, Teen Movie Hell lays the crucible of coming-of-age comedies bare, from party-hearty farces such as The Pom-Pom Girls, Up the Creek, and Fraternity Vacation to the extreme insanity exploding all over King Frat, Screwballs, The Party Animal, and Surf II: The End of the Trilogy. Tap the keg, tailor your toga, and belly flop hard into the exploitation inferno of bikinis beaches, locker rooms, summer camps, study halls, wayward teachers, cool camp counselors, wet-T-shirts, custom vans, sexy ESP, shower peepholes, and other overlooked penal code violations!
