How engaging technology and relationships can help you stand out, attract business and achieve a more dynamic professional life The technological landscape has reshaped the way white collar workers cultivate and promote their businesses. The Transformation of Professional Services is an engaging look at how licensed experts are adapting to today's dynamic economic environment. From Ari Kaplan—a recognized advisor on business and career development— Reinventing Professional Services: Building Your Business in the Digital Marketplace offers insights on taking advantage of enterprising techniques to stand out and position one's self as an insightful chameleon rather than as an isolated purveyor of facts and figures. Details the importance of offering resources instead of simply selling Reveals strategies for increasing one's searchability and distinguishing one's self in an economic downturn or recovery Offers advice readers can immediately use to strengthen client relationships Written in a straightforward and accessible style, this book provides engaging guidance for anyone in the professional services field—from business consultants, financial advisers, and lawyers to accountants, real estate brokers, and appraisers. The information contained in this report was collected for the Substance Abuse and Mental Health Services Administration (SAMHSA) Managed Care Tracking System by the Lewin Group from January-July 1998. It includes descriptions of public sector managed behavioral healthcare programs in the 51 States. The tracking system serves as a central collection point for information and analysis on the impact of managed care on Medicaid behavioral health services and public mental health and substance abuse systems.

Each year, more than 33 million Americans receive health care for mental or substance-use conditions, or both. Together, mental and substance-use illnesses are the leading cause of death and disability for women, the highest for men ages 15-44, and the second highest for all men. Effective treatments exist, but services are frequently fragmented and, as with general health care, there are barriers that prevent many from receiving these treatments as designed or at all. The consequences of this are serious â €"for these individuals and their families; their employers and the workforce; for the nation â €™s economy; as well as the education, welfare, and justice systems. Improving the Quality of Health Care for Mental and Substance-Use Conditions examines the distinctive characteristics of health care for mental and substance-use conditions, including payment, benefit coverage, and regulatory issues, as well as health care organization and delivery issues. This new volume in the Quality Chasm series puts forth an agenda for improving the quality of this care based on this analysis. Patients and their families, primary health care providers, specialty mental health and substance-use treatment providers, health care organizations, health plans, purchasers of group health care, and all involved in health care for mental and substance â €"use conditions will benefit from this guide to achieving better care.

Catherine (Cathy) Napier received her her Bachelor's degree from Dallas Baptist University in Dallas, Texas and her Master's degree in counseling from Texas Christian University in Fort Worth, Texas. Cathy attended Rutgers University in New Brunswick, New Jersey for her post-graduate studies in addiction. Cathy has worked in some of the major psychiatric hospitals in the Dallas/Fort Worth area. Cathy left Presbyterian Hospital of Dallas, where she was Director of the Chemical Dependency Program, in 2003 to work under Governor Bill Richardson's administration in Santa Fe, New Mexico. Cathy was director of the Temporary Assistance for Needy Families (TANF) substance abuse programs for the state of New Mexico for two years. Cathy was the Employee Assistance Manager for Behavioral Health Services for the Burlington Northern Santa Fe Railroad's Southwest Division. She worked part-time at Sierra Tucson, where her book, Operation Daughters Addicted, is being taught to those with a secondary diagnosis of disordered eating, and at Sabino Recovery, where she worked with those recovering from trauma. Both facilities are in Tucson, Arizona.

Becoming an Addictions Counselor, Third Edition provides evidence-based findings, cutting-edge treatment techniques, and a focus on critical thinking to show future counselors how to respond to clients' needs rather than impose "cookie-cutter" routines. Topics explored in depth include: • Mentally ill chemical abusers • Individual, group, and family counseling skills • Clinical treatment issues Each chapter takes an experiential learning approach to these topics and encourages readers to practice individual and group counseling skills through structured activities and exercises. With thorough discussions on ethics, treatment planning, and case management, this text prepares readers to become ethical, competent counselors.

This book reviews a series of new urban ideas or themes designed to help make cities more liveable, safe and inclusive. Featuring examples drawn from cities all over the world, the various chapters provide critical assessments of each of the various approaches and their potential to improve urban life. New Urbanism: creating new areas based on a more humane scale with neighbourhood cohesion Just Cities: creating more fairness in decision-making so all residents can participate and benefit. Green Cities: helping places become greener with environmental rehabilitation and protection Sustainable Cities: avoiding the waste of resources and harmful pollution in settlements Transition Towns: developing local initiatives for more sustainable actions Winter Cities: making cities in cold climates more comfortable and enjoyable Resilient Cities: strengthening cities to better enable them to withstand natural hazards Creative Cities: supporting cultural industries and attracting talented individuals Knowledge Cities: creating, renewing and spreading knowledge and innovation Safe Cities: ensuring that citizens are better protected against criminal actions Healthy Cities: making improvements in the health of people in cities Festive Cities: rediscovering the utility of festive events in settlements Slow Cities: enhancing locally unique activities, such as local cuisines and community interactions This volume offers a host of approaches designed to give a new direction and focus to planning policies, helping readers to fully understand the advantages and disadvantages of each potential idea. It seeks to solve the many current problems associated with urban developments, making it a valuable resource for university and college students in urban geography, urban planning, urban sociology and urban studies as well as to planners and the general public.

Internet Addiction: A Handbook and Guide to Evaluation and Treatment "This book provides cutting-edge coverage by expanding the field to include specific problems such as online gaming, cybersex addiction, and gambling addiction. Its extensive attention to dealing with adolescents is essential, given the rapid rise in media and technology use by both Net Generation young adults and iGeneration teenagers. I am thrilled to have this invaluable, comprehensive, well-written resource for my own work and recommend it to people who need to understand this unique form of addiction." —Dr. Larry Rosen, Past Chair and Professor of Psychology at California State University, Dominguez Hills, author of Rewired: Understanding the iGeneration and the Way They Learn and Me, MySpace, and I: Parenting the Net Generation "Our clients come to us when online pornography, video gaming, social networking, gambling, and surfing create untenable disruptions in their lives. If we do not understand what we are seeing and how to address it, we will not be able to provide the help they need. This book provides the practical information clinicians can use to assess and treat this growing problem." —Hilarie Cash, PhD, coauthor of Video Games and Your Kids: How Parents Stay in Control, and cofounder of reSTART: Internet Addiction Recovery Program "Internet Addiction: A Handbook and Guide to Evaluation and Treatment provides an integrated and current overview of the different types of Internet addiction-gaming addiction, gambling addiction, and cybersex addiction. The authors deserve ample praise in providing such a comprehensive and informative guide for Internet addiction." —Ran Tao, MD, Professor and Director, and Xiuqin Huang, MD, Associate Professor, Treatment Center for Internet Addiction, General Hospital of Beijing Military Region, China The first empirically informed reference for defining, assessing, diagnosing, and treating problematic Internet use Comprehensive and timely, Internet Addiction explores: Validated assessment tools to differentiate normal from compulsive patterns of computer and online usage The most addictive or problematic online activities Epidemiology and subtypes of Internet addiction such as online pornography, Internet gambling, and online gaming Current theories on the risk factors associated with the development of an addictive

disorder related to Internet usage Evidence-based treatment strategies for helping clients of various ages, taking into account main presenting problems and individual situations and circumstances International in scope and empirically based, the cultural and global impact of this subject is discussed, introducing practitioners to the latest clinical implications, assessment methods, and treatment approaches in working with clients suffering from this emerging addictive disorder.

Harm reduction is a framework for helping drug and alcohol users who cannot or will not stop completely_the majority of users_reduce the harmful consequences of use. Harm reduction accepts that abstinence may be the best outcome for many but relaxes the emphasis on abstinence as the only acceptable goal and criterion of success. Instead, smaller incremental changes in the direction of reduced harmfulness of drug use are accepted. This book shows how these simple changes in emphasis and expectation have dramatic implications for improving the effectiveness of psychotherapy.
