Over twenty-five years in the making, this much-anticipated commentary promises to be the standard study of Proverbs for years to come. Written by eminent Old Testament scholar Bruce Waltke, this two-volume commentary is unquestionably the most comprehensive work on Proverbs available.

Grounded in the new literary criticism that has so strengthened biblical interpretation of late, Waltke's commentary on Proverbs demonstrates the profound, ongoing relevance of this Old Testament book for Christian faith and life. A thorough introduction addresses such issues as text and versions, structure, authorship, and theology. The detailed commentary itself explains and elucidates Proverbs as "theological literature." Waltke's highly readable style -- evident even in his original translation of the Hebrew text -- makes his scholarly work accessible to teachers, pastors, Bible students, and general readers alike.

Tocharian and Indo-European Studies is the central publication for the study of two closely related languages, Tocharian A and Tocharian B. Found in many Buddhist manuscripts from central Asia, Tocharian dates back to the second half of the first millennium of the Common Era, though it was not discovered until the twentieth century. Focusing on both philological and linguistic aspects of this language, Tocharian and Indo-European Studies also looks at it in relationship to other Indo-European languages. This issue addresses topics such as the function and origin of the present suffix "-sk," verbal endings, the words for "fear" and "perfume," secular documents, and Tocharian glosses in Sanskrit manuscripts. Birgit Anette Olsen is a researcher and instructor at the University of Copenhagen and author of Derivation and Composition and The Noun in Biblical Armenian. The revolutionary X-15 remains the fastest manned aircraft ever to fly. Built in the two decades following World War II, it was the most successful of the high-speed X-planes. The only recently broken 'sound barrier' was smashed completely by the X-15, which could hit Mach 6.7 and soar to altitudes above 350,000ft, beyond the edge of space. Several pilots qualified as astronauts by flying above 50 miles altitude in the X-15, including Neil Armstrong, the first man on the Moon. The three X-15s made 199 flights, testing new technologies and techniques which greatly eased America's entry into manned space travel, and made the Apollo missions and Space Shuttle viable propositions. With historical photographs and stunning digital artwork, this is the story of arguably the greatest of the X-Planes.
