The month of April 2015 will forever be etched in Baltimore history as a time of opinion, sadness, and soul-searching as the Freddie Gray incident occurred, along with the protests that swiftly followed. For the purpose of observing the framing done of the incident by newspaper outlets, a qualitative content analysis of *The Baltimore Sun* and *The Washington Post* was performed for the time period after his death and before the protests. Understanding that framing is virtually unavoidable, it is important to recognize the slants presented to the public about the incident. The findings suggested there are minimal differences in how media outlets in two different cities framed the same incident as evidenced by the majority of framing being sympathetic toward Freddie Gray. In addition, the majority of framing took place in the body of the article as opposed to the headline, lead, or closing paragraph.

National Book Critics Circle Award Winner New York Times Bestseller USA Today Bestseller A New York Times Notable Book of the Year A Washington Post Notable Nonfiction Book of the Year A Boston Globe Best Book of 2016 A Chicago Review of Books Best Nonfiction Book of 2016 From the Civil War to our combustible present, acclaimed historian Carol Anderson reframes our continuing conversation about race, chronicling the powerful forces opposed to black progress in America. As Ferguson, Missouri, erupted in August 2014, and media commentators across the ideological spectrum referred to the angry response of African Americans as "black rage," historian Carol Anderson wrote a remarkable op-ed in *The Washington Post* suggesting that this was, instead, "white rage at work. With so much attention on the flames," she argued, "everyone had ignored the kindling." Since 1865 and the passage of the Thirteenth Amendment, every time African Americans have made advances towards full participation in our democracy, white reaction has fueled a deliberate and relentless rollback of their gains. The end of the Civil War and Reconstruction was greeted with the Black Codes and Jim Crow; the Supreme Court's landmark 1954 *Brown v. Board of Education* decision was met with the shutting down of public schools throughout the South while taxpayer dollars financed segregated white private schools; the Civil Rights Act of 1964 and Voting Rights Act of 1965 triggered a coded but powerful response, the so-called Southern Strategy and the War on Drugs that disenfranchised millions of African Americans while propelling presidents Nixon and Reagan into the White House, and then the election of America's first black President, led to the expression of white rage that has been as relentless as it has been brutal. Carefully linking these and other historical flashpoints when social progress for African Americans was countered by deliberate and cleverly crafted opposition, Anderson pulls back the veil that has long covered actions made in the name of protecting democracy, fiscal responsibility, or protection against fraud, rendering visible the long lineage of white rage. Compelling and dramatic in the unimpeachable history it relates, *White Rage* will add an important new dimension to the national conversation about race in America.

In this provocative book, the authors connect the regulation of African American people in many settings into a powerful narrative. Completely updated throughout, the book now includes a new chapter on policing black athletes' bodies, and expanded coverage of the Black Lives Matter movement, policing trans bodies, and policing Black women's bodies.

Providing chronologies of important events, historical narratives from the first settlement to the present, and biographies of major figures, this work offers readers an unseen look at the history of racism from the perspective of individual states. • Comprises detailed narratives encompassing the first European contact to the present day of the unique racial history of all 50 states and the District of Columbia • Provides a chronology of important racial events, achievements, and milestones for the states, plus the District of Columbia • Offers biographies of individuals who successfully confronted racism in America and removed obstacles to social achievement • Includes sidebars highlighting interesting events, individuals, and accomplishments relevant to the racial history of particular states

Framing the Freddie Gray Incident

Beginning with Plato, and carried over in the

Christian tradition, western political thought has been wedded to the proposition that justice and virtue can be achieved in history through the adoption of proper norms. Hannah Arendt termed this "the tyranny of truth," and its effect is to transform politics into a religious exercise through commitment to metaphysical propositions like truth or goodness. The tumultuous political aftermath that formed the wake of Freddie Gray's crucifixion in Baltimore, MD, is an example of politics turned religious exercise. In those politics, confessional commitments to propositions related to race, society, and structure came to dominate the interpretation of the killing of Gray's mortal body. But as Gray was resurrected in various forms in the weeks after his death, one consequence is that a very poor community had one of their sons stripped from them first by police violence, and then again through politics whose discursive violence appropriated Gray as proof of its own metaphysics.

—Updated with new content— Extraordinary conversations between a confidant of Martin Luther King Jr. and a modern-day activist lead to the game-changing realizations that a second-wave civil rights movement is unfolding and that we must embrace the lessons of the past to effect lasting change. In 1966, Nelson Malden ran for public office in Montgomery, Alabama. He was the first African American to do so. Campaigning for him was his friend, Martin Luther King Jr., who had organized protests and had written the speeches that would help criminalize racial segregation and discrimination from his seat in the Malden Brothers Barbershop. In *The Colored Waiting Room*, modern-day activist Kevin Shird heads from his hometown of Baltimore, Maryland to Montgomery to meet eighty-four-year-old Nelson Malden and contextualize the significance of the killings of Tamir Rice, Freddie Gray, and Trayvon Martin as well as the demonstrations in Charlottesville, Ferguson, Baltimore, and around the country. The result is a groundbreaking understanding of today's burgeoning second-wave civil rights movement and the urgent actions necessary for racial equality and change. Here, Shird raises the profound question of whether blacks are still in a colored waiting room, biding their time and waiting for racial equality to be the norm. He also shares compelling personal realizations on the lost connection between African American youth and their ancestors' fight against slavery and Jim Crow laws, asking throughout this pivotal volume, how far can we go without knowing where we've come from?

The *Ferguson Interview Project* is a collection of twenty interviews about the events before and after the death of Michael Brown Jr. on August 9, 2014. The interviewees are community leaders, activists, organizers, politicians, faith-based leaders, and law enforcement professionals. These interviews were collected over a two-week period in May of 2015. The main characters in our story, Jay Allan Scripps and Rowena Moore, have connected after many years after a mysterious accident. He is hiding from his past, while she leads a reclusive existence. They are motivated by a perhaps misguided need to improve their world. Their unique use of guns forms helps save lives in a neglected area of the city. "*Baltimore Blue and Freddie Gray*" is a work of fiction set in Baltimore during the eventful time of the demonstrations and riots after the funeral of Freddie Gray in April, 2015. The riots destroyed stores and buildings and other economic disasters affected tax revenues, increasing the pressure on the already strapped city budget. Not surprisingly, the national and international coverage also affected the housing market in Baltimore, and perhaps more importantly, the city's reputation. Earlier that month, I had a conversation with a clerk in a shop in Belgrade, Serbia where he asked me where I was from and asked me about crime and violence in Baltimore. All he knew about Baltimore he learned from the television shows, *Homicide* and *The Wire*.

Wonder what our conversation might be like if it took place now. The riots also caused the downfall of a rising political star, Mayor Stephanie Rawlings-Blake, who later announced that she would not run for re-election. She was head of the national Council of Mayors and clearly headed for higher office. The book also contains an account of the fascinating legal issues raised by the trials of six police officers and whether they can be forced to testify in each other's trials. Stay tuned for updates as the six interconnected trials progress.

Freddie's Last Ride: "What Really Happened to Freddie Gray?"

This book is a collection of poems which is about the struggles of the civil rights movement in the darkest times in American history. The events that happened to the black man have seen an increase on the war on the black men. The poems also reflect on police brutality, police shootings. There are also some special dedications and a few additional poems about love and Gods love for all men.

Taking Matters into Our Own Hands is the decision of activists, leaders, politicians, clergy, and concerned citizens to use their influence to its highest potential, in both conventional and nonconventional measures, to shine a light on unjust beatings and homicides of unarmed African Americans. Violence permeates our society, but when that violence comes at the hands of those charged with protecting us and upholding the law, public trust is shattered, and the rights to which every citizen is entitled are called into question. We must let the perpetrators of these unjust beatings and homicides know that a foundation built on lies and cover-ups cannot stand. This is not the idea of engaging in unlawful, divisive forms of protest or rhetoric, but rather coming to the conclusion that you are the agent of change that you want to see—that all individuals are qualified to use their voices, their cell phones, their social media, their music, their resources, their legal minds, their political connections, their creative ability, their God-given talents, whatever they may be, to let the world know that this unjust killing must come to an end!

In 2015, Baltimore plunged into the worst American riots in recent history. In the chaos, two high school honor-roll students, "Brick" and "Wax," used their smarts, computer skills, ambition and gang connections to change the world of illegal drugs forever. With their gang associates, they looted pharmacies, stealing over one million prescription narcotic pills with a street value of up to \$100 each. "Brick" and "Wax" were not going to sell drugs on corners; they used location-based technology and encrypted messaging software to dispatch ordered drugs via delivery drivers—an Uber-like service that eliminated street deals and easily tapped phones. They were soon supplying cities along the East Coast, creating a whole new class of opioid addicts with the FBI and DEA trailing in their wake. To ensure the drugs did not run out, the teens formed an alliance with the Sinaloa cartel, headed by El Chapo. Veteran *Newsday* crime reporter Kevin Deutsch has been reporting on the ground for over a year. He's seen the bodies. Across America, thousands are dying from opioid overdoses. This middle-class crisis has been well documented, but the inner cities, where families are being swallowed up by addiction, have been ignored. Deutsch brings us into this underworld, where social unrest and cutting-edge technology allow criminals to seed the next wave of dysfunction and despair.

Written and extensively updated by an author team that includes former and current law enforcement officers, *Introduction to Policing* focuses on the thought-provoking, contemporary issues that underscore the challenging and rewarding world of policing. The authors skillfully balance research and practice to offer students an overview of both the foundations of policing and the expanded role of today's police officers. Evolving with the modern realities of the field, the Fourth Edition discusses major new and ongoing impactful events, such as the political shift marked by the U.S. presidential election of 2016 and expanded coverage of women and minorities in policing. The accessible and engaging writing style, coupled with unique coverage of the issues of policing in multicultural communities, the impact of technology on policing, and policing strategies and procedures, make this bestselling book a must-have for policing courses.

Introduction to Policing

This book examines how the media approached long-standing and long-simmering issues of race, class, violence, and social responsibility in Baltimore during the demonstrations, violence, and public debate in the spring of 2015. Contributors take Baltimore to be an important place, symbol, and marker, though the issues are certainly not unique to Baltimore: they have crucial implications for contemporary journalism in the U.S. These events prompt several questions: How well did journalism do, in Baltimore, nearby and nationally, in explaining the endemic issues besetting Baltimore? What might have been done differently? What is the responsibility of journalists to anticipate and cover these problems? How should they cover social problems in urban areas? What do the answers to such questions suggest about how journalists should in future cover such problems?

Flourishing in Emerging Adulthood highlights the third decade of life as a time in which individuals have diverse opportunities for positive development. There is mounting evidence that this time period, at least for a significant majority, is a unique developmental period in which positive development is fostered. Dr. Lene Arnett Jensen highlights the importance of this work in an engaging foreword, and chapters are written by leading scholars in diverse disciplines who address various aspects of flourishing. They discuss multiple aspects of positive development including how young people flourish in key areas of emerging adulthood (e.g., identity, love, work, worldviews), the various unique opportunities afforded to young people to flourish, how flourishing might look different around the world, and how flourishing can occur in the face of challenge. Most chapters are accompanied by first-person essays written by a range of emerging adults who exemplify the aspect of flourishing denoted in that chapter and make note of how choices and experiences have helped them transition to adulthood. Taken together, this innovative collection provides rich evidence and examples of how young people are flourishing as a group and as individuals in a variety of settings and circumstances. This unique resource will be useful to students, faculty, professionals, clinicians, and university personnel who work with young adults or who study development during emerging adulthood.

Understanding the explosive protests over police killings and the legacy of racism Following the high-profile deaths of eighteen-year-old Michael Brown in Ferguson, Missouri, and twenty-five-year-old Freddie Gray in Baltimore, Maryland, both cities erupted in protest over the unjustified homicides of unarmed black males at the hands of police officers. These local tragedies—and the protests surrounding them—assumed national significance, igniting fierce debate about the fairness and efficacy of the American criminal justice system. Yet, outside the gaze of mainstream attention, how do local residents and protestors in Ferguson and Baltimore understand their own experiences with race, place, and policing? In *Hands Up, Don't Shoot*, Jennifer Cobbina draws on in-depth interviews with nearly two hundred residents of Ferguson and Baltimore, conducted within two months of the deaths of Brown and Gray. She examines how protestors in both cities understood their experiences with the police, how those experiences influenced their perceptions of policing, what galvanized Black Lives Matter as a social movement, and how policing tactics during demonstrations influenced subsequent mobilization decisions among protesters. Ultimately, she humanizes people's deep and abiding anger, underscoring how a movement emerged to denounce both racial biases by police and the broader economic and social system that has stacked the deck against young black civilians. *Hands Up, Don't Shoot* is a remarkably current, on-the-ground assessment of the powerful, protestor-driven movement around race, justice, and policing in America.

A masterful narrative—with echoes of *Evicted* and *The Color of Law*—that brings to life the structures, policies, and beliefs that divide us Mark Lange and Nicole Smith have never met, but if they make the moves they are contemplating—Mark, a white suburbanite, to West Baltimore, and Nicole, a black woman from a poor city neighborhood, to a prosperous suburb—it will defy the way the Baltimore region has been programmed for a century. It is one region, but separate worlds. And it was designed to be that way. In this deeply reported, revelatory

story, duPont Award – winning journalist Lawrence Lanahan chronicles how the region became so highly segregated and why its fault lines persist today. Mark and Nicole personify the enormous disparities in access to safe housing, educational opportunities, and decent jobs. As they eventually pack up their lives and change places, bold advocates and activists—in the courts and in the streets—struggle to figure out what it will take to save our cities and communities: Put money into poor, segregated neighborhoods? Make it possible for families to move into areas with more opportunity? The *Lines Between Us* is a riveting narrative that compels reflection on America's entrenched inequality—and on where the rubber meets the road not in the abstract, but in our own backyards. Taking readers from church sermons to community meetings to public hearings to protests to the Supreme Court to the death of Freddie Gray, Lanahan deftly exposes the intricacy of Baltimore's hypersegregation through the stories of ordinary people living it, shaping it, and fighting it, day in and day out. This eye-opening account of how a city creates its black and white places, its rich and poor spaces, reveals that these problems are not intractable; but they are designed to endure until each of us—despite living in separate worlds—understands we have something at stake.

Nobody is a powerful and eye-opening examination of the deeper meaning behind the string of deaths of unarmed citizens like Michael Brown, Eric Garner, and Freddie Gray. Unarmed citizens shot by police. Drinking water turned to poison. Mass incarcerations. We've heard the stories. Now public intellectual and acclaimed journalist Marc Lamont Hill offers a powerful, paradigm-shifting analysis of race and class in America, and what it means to be "Nobody." Through on-the-ground reporting and careful research, Hill shows how some American citizens are made vulnerable, exploitable, and disposable through the machinery of unregulated capitalism, public policy, and social practice. This *Nobody* class, Hill argues, has emerged over time, and forces in America have worked to preserve and exploit it in ways that are both humiliating and harmful. He carefully reconsiders the details of tragic events like the deaths of Michael Brown, Sandra Bland, and Freddie Gray, and the water crisis in Flint, Michigan, and delves deeply into a host of alarming trends including mass incarceration, overly aggressive policing, broken court systems, shrinking job markets, and the privatization of public resources, showing time and again the ways the current system is designed to worsen the plight of the vulnerable.

Since the shutdown of our public psychiatry system, the seriously mentally ill are now mostly managed by public safety officers, school officials, emergency first responders and social workers with little experience in recognizing symptoms, triggers and issues. This book addresses the need to recognize the psychiatric component of criminological issues and the methodology of dealing with it on a practical as well as academic basis. It provides a roadmap for training in rapid assessment built on evidence-based emergency psychiatry protocols.

NEW YORK TIMES EDITORS' CHOICE • The astonishing true story of "one of the most startling police corruption scandals in a generation" (The New York Times), from the Pulitzer Prize – nominated reporter who exposed a gang of criminal cops and their yearslong plunder of an American city NOW AN HBO SERIES FROM THE WIRE CREATOR DAVID SIMON AND GEORGE PELECANOS "A work of journalism that not only chronicles the rise and fall of a corrupt police unit but can stand as the inevitable coda to the half-century of disaster that is the American drug war." —David Simon Baltimore, 2015. Riots are erupting across the city as citizens demand justice for Freddie Gray, a twenty-five-year-old Black man who has died under suspicious circumstances while in police custody. Drug and violent crime are surging, and Baltimore will reach its highest murder count in more than two decades: 342 homicides in a single year, in a city of just 600,000 people. Facing pressure from the mayor's office—as well as a federal investigation of the department over Gray's death—Baltimore police commanders turn to a rank-and-file hero, Sergeant Wayne Jenkins, and his elite plainclothes unit, the Gun Trace Task Force, to help get guns and drugs off the street. But behind these new efforts, a criminal conspiracy of unprecedented scale was unfolding within the police department. Entrusted with fixing the city's drug and gun crisis, Jenkins chose to exploit it instead. With other members of the empowered Gun Trace Task Force, Jenkins stole from Baltimore's citizens—skimming from drug busts, pocketing thousands in cash found in private homes, and planting fake evidence to throw Internal Affairs off their scent. Their brazen crime spree would go unchecked for years. The results were countless wrongful convictions, the death of an innocent civilian, and the mysterious death of one cop who was shot in the head, killed just a day before he was scheduled to testify against the unit. In this urgent book, award-winning investigative journalist Justin Fenton distills hundreds of interviews, thousands of court documents, and countless hours of video footage to present the definitive account of the entire scandal. The result is an astounding, riveting feat of reportage about a rogue police unit, the city they held hostage, and the ongoing struggle between American law enforcement and the communities they are charged to serve.

In *Essentials of Psychology*, authors Saul Kassin, Gregory J. Privitera, and Kristal D. Clayton propel students into a clear, vibrant understanding of psychological science with an integrative, learn-by-doing approach. Students assume the role of a psychologist, carrying out experiments and making predictions. Compelling storytelling, real-life examples, and the authors' active practice approach encourages critical thinking and engagement.

Linda Sarsour, co-organizer of the Women's March, shares an

"unforgettable memoir" (Booklist) about how growing up

Palestinian Muslim American, feminist, and empowered moved her

to become a globally recognized activist on behalf of marginalized

communities across the country. On a chilly spring morning in

Brooklyn, nineteen-year-old Linda Sarsour stared at her reflection,

dressed in a hijab for the first time. She saw in the mirror the woman

she was growing to be—a young Muslim American woman

unapologetic in her faith and her activism, who would discover her

innate sense of justice in the aftermath of 9/11. Now heralded for her

award-winning leadership of the Women's March on Washington,

Sarsour offers a "moving memoir [that] is a testament to the power

of love in action" (Michelle Alexander, author of *The New Jim*

Crow). From the Brooklyn bodega her father owned, where Linda

learned the real meaning of intersectionality, to protests in the streets

of Washington, DC, Linda's experience as a daughter of Palestinian

immigrants is a moving portrayal of what it means to find one's

voice and use it for the good of others. We follow Linda as she learns

the tenets of successful community organizing, and through decades

of fighting for racial, economic, gender, and social justice, as she

becomes one of the most recognized activists in the nation. We also

see her honoring her grandmother's dying wish, protecting her

children, building resilient friendships, and mentoring others even as

she loses her first mentor in a tragic accident. Throughout, she

inspires you to take action as she reaffirms that we are not here to be

bystanders. In this "book that speaks to our times" (The

Washington Post), Harry Belafonte writes of Linda in the foreword,

"While we may not have made it to the Promised Land, my peers

and I, my brothers and sisters in liberation can rest easy that the

future is in the hands of leaders like Linda Sarsour. I have often said

to Linda that she embodies the principle and purpose of another

great Muslim leader, brother Malcolm X." This is her story.

Writing and Editing for Digital Media teaches students how to write

effectively for digital spaces—whether writing for an app, crafting a

story for a website, blogging, or using social media to expand the

conversation. The lessons and exercises in each chapter help students

build a solid understanding of the ways that digital communication

has introduced opportunities for dynamic storytelling and multi-

directional communication. With this accessible guide and

accompanying website, students learn not only to create content, but

also to become careful, creative managers of that content. Updated

with contemporary examples and pedagogy, including examples from

the 2016 presidential election, and an expanded look at using social

media, the third edition broadens its scope, helping digital writers

and editors in all fields, including public relations, marketing, and

social media management. Based on Brian Carroll's extensive

experience teaching a course of the same name, this revised and

updated edition pays particular attention to opportunities presented

by the growth of social media and mobile media. Chapters aim to:

Assist digital communicators in understanding the socially networked,

increasingly mobile, always-on, geomapped, personalized media

ecosystems; Teach communicators to approach storytelling from a

multimedia, multi-modal, interactive perspective; Provide the basic

skill sets of the digital writer and editor, skill sets that transfer across

all media and most communication and media industries, and to do

so in specifically journalistic and public relations contexts; Help

communicators to put their audiences first by focusing attention on

user experience, user behavior, and engagement with their user

bases; Teach best practices in the areas of social media strategy,

management, and use.

A critical examination of affective labour based on ethnographic

fieldwork. It traces the centrality of affective labor in enabling and

constraining prevailing norms and practices of race, citizenship, class,

gender, and sexuality across multiple spatial contexts.

For much of American history, the federal government has played a

limited role in local police regulation. That all changed in 1994,

when Congress passed a little known statute that permitted the US

Attorney General to reform troubled police departments. Since then,

many of the nation's largest police departments - including those in

Los Angeles, Chicago, Seattle, Washington, DC, New Orleans,

Pittsburgh, Cincinnati, Cleveland, and Albuquerque - have been

subject to federal oversight. But until recently, we've known little

about how this federal process works. Drawing on original interviews,

court documents, statistical data, and media reports, this book

provides the first comprehensive account of federal intervention in

American police departments. It shows that, under the right

circumstances, federal intervention is uniquely effective at combating

misconduct in police departments. However, federal intervention is

far from perfect. This book concludes by arguing that Congress

should expand and improve federal oversight of policing.

College Curriculum at the Crossroads explores the ways in

which college curriculum is complicated, informed, understood,

resisted, and enriched by women of color. This text challenges

the canon of curriculum development which foregrounds the

experiences of white people, men and other dominant subject

positions. By drawing on Black, Latina, Queer, and

Transnational feminism, the text disrupts hegemonic curricular

practices in post-secondary education. This collection is relevant to current conversation within higher education, which looks to curriculum to aid in the development of a more tolerant and just citizenry. Women of color have long theorized the failures of injustice and the promise of inclusion; as such, this text rightly positions women of color as true "experts in the field." Across a variety of approaches, from reflections on personal experience to application of critical scholarship, the authors in this collection explore the potency of women of color 's presence with/in college curriculum and emphasize a dire need for women of color 's voices at the center of the academic process.

Freddie's Last Ride By: Mary Anne Whelan This book is about Freddie Gray, a young black man who died in police custody in Baltimore as a result of a broken neck. Six officers were subsequently tried, but the trials of three were dismissed and the others were found not guilty on various charges. The charges were incorrectly placed by Attorney General of Baltimore City Marilyn Mosby. Mosby relied on the Autopsy Report which, in turn, took its opinion of the timing of Gray's death from the self-invested Baltimore Police. It didn't happen in the van: the arresting officers broke his neck. The media perpetuated Mosby's misreading of the report which confused Opinion with formal, medical, forensic evidence, thereby reinforcing both the misplaced charges and public misunderstanding, and facilitating the consequent injustice that set Baltimore on fire. This book takes apart the process and testimony of the trial from an informed medical point of view. It critiques the prosecution, the autopsy report, and the testimony of the expert witnesses. It reviews the important medical concepts necessary to evaluating what happened, and the medical ethics which should (but did not) prevail in such cases. This book should be of broad interest: to those concerned with the processes of racial injustice in America generally; to those concerned with medico-legal ethics; to medical and legal educators and their students. The message is both topical and enduring, and the book is unique because of its authoritative medical perspective. The author wants readers to take away an appropriate understanding not only of what happened in this case, but of the necessary changes in the approach to such situations. And I want them to understand that this is not just a problem for the Black community, but for all of us.

This book takes a case study approach to explore leadership narratives of women in healthcare and science, paying attention to the intersection of gender, identity, and race in each story. Putting forward a new vision and pathway inclusive of the lived experiences and contributions of women worldwide, this text proposes a strength-based approach to meeting leadership challenges. Key themes discussed include leadership redefined by those not identifying as leaders, the influence of the intersectionality of race and gender on leadership, and the implications for how we teach about leadership in healthcare and science. Grounded in theory that is translated into practice and evidenced by the leadership case studies described, the book draws out useful tools and organizational learnings to support transformation of the landscape of clinical care, education, research and policies healthcare and science. This book is an invaluable reference for leaders at all levels across healthcare and science. It is also of interest to students and academics from gender studies, leadership studies, organization and governance, anthropology, sociology, higher education, public health, social work, nursing and medicine.

Focusing on the relationship between prosecutors and democracy, this volume throws light on key questions about prosecutors and the role they should play in liberal self-government. Internationally distinguished scholars discuss how prosecutors can strengthen democracy, how they sometimes undermine it, and why it has proven so challenging to hold prosecutors accountable while insulating them from politics. The contributors explore the different ways legal systems have addressed that challenge in the United States, the United Kingdom, and continental Europe. Contrasting those strategies allows an assessment of their relative strengths - and a richer understanding of the contested connections between law and democratic politics. Chapters are in explicit conversation with each other, facilitating comparison and deepening the analysis. This is an important new resource for legal scholars and reformers, political philosophers, and social scientists.

The first in-depth history and analysis of a much-abused policing policy
No policing tactic has been more controversial than "stop and frisk," whereby police officers stop, question and frisk ordinary citizens, who they may view as potential suspects, on the streets. As Michael White and Hank Fradella show in *Stop and Frisk*, the first authoritative history and analysis of this tactic, there is a disconnect between our everyday understanding and the historical and legal foundations for this policing strategy. First ruled constitutional in 1968, stop and frisk would go on to become a central tactic of modern day policing, particularly by the New York City Police Department. By 2011 the NYPD recorded 685,000 'stop-question-and-frisk' interactions with citizens; yet, in 2013, a landmark decision ruled that the police had over- and mis-used this tactic. *Stop and Frisk* tells the story of how and why this happened, and offers ways that police departments can better serve their citizens. They also offer a convincing argument that stop and frisk did not contribute as greatly to the drop in New York 's crime rates as many proponents, like former NYPD Police Commissioner Ray Kelly and Mayor Michael Bloomberg, have argued. While much of the book focuses on the NYPD 's use of stop and frisk, examples are also shown from police departments around the country, including Philadelphia, Baltimore, Chicago, Newark and Detroit. White and Fradella argue that not only does stop and frisk have a legal place in 21st-century policing but also that it can be judiciously used to help deter crime in a way that respects the rights and needs of citizens. They also offer insight into the history of racial injustice that has all too often been a feature of American policing 's history and propose concrete strategies that every police department can follow to improve the way they police. A hard-hitting yet nuanced analysis, *Stop and Frisk* shows how the tactic can be a just act of policing and, in turn, shows how to police in the best interest of citizens.

"With lively prose and sensitivity to context, this book offers a sweeping, authoritative history of the Obama presidency, focusing particularly on its impact and meaning vis-à-vis African Americans. This interpretative account captures the America that made Obama's White House years possible, while at the same time rendering the America that resolutely resisted the idea of a Black chief executive, thus making conceivable the ascent of his most unlikely of successors"--
Megyn Kelly possesses both courage and knowledge when it comes to uncovering the truth at the heart of today's issues. Leaving a successful legal career to pursue journalism, Kelly went on to host her own television programs and conduct interviews with celebrities and presidents alike. Despite challenging moments in her personal and professional life, she continues to demonstrate fortitude and a sense of humor. This book focuses on the experiences that shaped her personal life and career and made her an inspiration for fans on both sides of the political aisle.

In *Mourning in America*, McIvor addresses significant and urgent questions about how citizens can mourn traumatic events and enduring injustices in their communities. McIvor offers a framework for analyzing the politics of mourning, drawing from psychoanalysis, Greek tragedy, and scholarly discourses on truth and reconciliation. *Killing African Americans* examines the pervasive, disproportionate, and persistent police and vigilante killings of African Americans in the United States as a racial control mechanism that sustains the racial control system of systemic racism. Noel A. Cazenave 's well-researched and conceptualized historical sociological study is one of the first books to focus exclusively on those killings and to treat them as political violence. Few issues have received as much conventional and social media attention in the United States over the past few years or have, for decades now, sparked so many protests and so often strained race relations to a near breaking point. Because of both its timely and its enduring relevance, *Killing African*

Americans can reach a large audience composed not only of students and scholars, but also of Movement for Black Lives activists, politicians, public policy analysts, concerned police officers and other criminal justice professionals, and anyone else eager to better understand this American nightmare and its solutions from a progressive and informed African American perspective.

An illustrated storybook of memories that were shared with Freddie Gray while growing up in the city of Baltimore.

Based on new evidence and deep reporting, the riveting truth about a case that has become a touchstone in the struggle for racial justice and Black lives. They Killed Freddie Gray exposes a conspiracy among Baltimore leaders to cover up what actually happened to Freddie Gray, who was fatally injured in the back of a police van in April 2015. After Gray 's death, Baltimore became ground zero for Black Lives Matter and racial justice protests that exploded across the country. State 's Attorney Marilyn Mosby became a hero when she charged six officers in Gray 's death, and the trials of the officers generated national headlines for two years. Yet the cause of Gray 's death has remained a mystery. A viral video showed an officer leaning on Gray 's back while he cried out in pain. But the autopsy concluded he was fatally injured later that morning while the van was in motion—during its notorious, multi-stop "rough ride"—from sudden impact to his head. None of the officers were convicted of any crimes. They Killed Freddie Gray solves the mystery of Gray 's death by uncovering new evidence of how he was killed by police and how his cause of death was covered up. In coordination with a documentary film being produced by MRC Entertainment and directed by Merawi Gerima, this book revisits an historic moment in US criminal justice history, providing new insight into what happened, the historical structures of power that allowed it to happen, and the personalities and dynamics involved.

"An illuminating portrait of Baltimore in the aftermath of the April 2015 death of Freddie Gray . . . Readers will be enthralled by this propulsive account." —Publishers Weekly

From the New York Times bestselling author of *The Other Wes Moore*, a kaleidoscopic account of five days in the life of a city on the edge, told through eight characters on the front lines of the uprising that overtook Baltimore and riveted the world. When Freddie Gray was arrested for possessing an "illegal knife" in April 2015, he was, by eyewitness accounts that video evidence later confirmed, treated "roughly" as police loaded him into a vehicle. By the end of his trip in the police van, Gray was in a coma from which he would never recover. In the wake of a long history of police abuse in Baltimore, this killing felt like the final straw—it led to a week of protests, then five days described alternately as a riot or an uprising that set the entire city on edge and caught the nation's attention. Wes Moore is a Rhodes Scholar, bestselling author, decorated combat veteran, former White House fellow, and CEO of Robin Hood, one of the largest anti-poverty nonprofits in the nation. While attending Gray 's funeral, he saw every stratum of the city come together: grieving mothers, members of the city 's wealthy elite, activists, and the long-suffering citizens of Baltimore—all looking to comfort one another, but also looking for answers. He knew that when they left the church, these factions would spread out to their own corners, but that the answers they were all looking for could be found only in the city as a whole. Moore—along with journalist Erica Green—tells the story of the Baltimore uprising both through his own observations and through the eyes of other Baltimoreans: Partee, a conflicted black captain of the Baltimore Police Department; Jenny, a young white public defender who 's drawn into the violent center of the uprising herself; Tawanda, a young black woman who 'd spent a lonely year protesting the killing of her own brother by police; and John Angelos, scion of the city 's most powerful family and executive vice president of the Baltimore Orioles, who had to make choices of conscience he 'd never before confronted. Each shifting point of view contributes to an engrossing, cacophonous account of one of the most consequential moments in our recent history, which is also an essential cri de coeur about the deeper causes of the violence and the small seeds of hope planted in its aftermath.

Shows how government created "ghettos" and affluent white space and entrenched a system of American residential caste that is the linchpin of US inequality—and issues a call for abolition. The iconic Black hood, like slavery and Jim Crow, is a peculiar American institution animated by the ideology of white supremacy. Politicians and people of all colors propagated "ghetto" myths to justify racist policies that concentrated poverty in the hood and created high-opportunity white spaces. In *White Space, Black Hood*, Sheryll Cashin traces the history of anti-Black residential caste—boundary maintenance, opportunity hoarding, and stereotype-driven surveillance—and unpacks its current legacy so we can begin the work to dismantle the structures and policies that undermine Black lives. Drawing on nearly 2 decades of research in cities including Baltimore, St. Louis, Chicago, New York, and Cleveland, Cashin traces the processes of residential caste as it relates to housing, policing, schools, and transportation. She contends that geography is now central to American caste. Poverty-free havens and poverty-dense hoods would not exist if the state had not designed, constructed, and maintained this physical racial order. Cashin calls for abolition of these state-sanctioned processes. The ultimate goal is to change the lens through which society sees residents of poor Black neighborhoods from presumed thug to presumed citizen, and to transform the relationship of the state with these neighborhoods from punitive to caring. She calls for investment in a new infrastructure of opportunity in poor Black neighborhoods, including richly resourced schools and neighborhood centers, public transit, Peacemaker Fellowships, universal basic incomes, housing choice vouchers for residents, and mandatory inclusive housing elsewhere. Deeply researched and sharply written, *White Space, Black Hood* is a call to action for repairing what white supremacy still breaks. Includes historical photos, maps, and charts that illuminate the history of residential segregation as an institution and a tactic of racial oppression.

Arnold Dodge, through research and personal narrative, examines the racial underpinnings of social/cultural inequities in South Africa and the United States and the strident voices – and tactics - of those who claim racism has been eliminated.
