Excerpt: Ellery Cuthwyn Hanley MBE (born 27 March 1961 in Leeds, West Riding of Yorkshire) is a British former rugby league player of the 1970s, '80s and '90s, and former head coach of Great Britain, St. Helens and Doncaster. As a player he played most of his games at Stand-off, or Loose forward. Over a period of nineteen years, he played for Bradford Northern, Wigan, Balmain, Western Suburbs and Leeds. He was capped 34 times by Great Britain and honoured by the Queen in January 1990 for his services to the game. In 2007, he was voted as the greatest British rugby league player of all time. In 1978, Ellery Hanley signed for Bradford Northern from the junior club Corpus Christi. On 26 November 1978, he made his professional debut for Northern against Rochdale Hornets in a League Division One match. He helped his club to a 30-18 victory, by scoring a try on his debut. He had to wait his time before gaining...

The Directory of Corporate Counsel, Fall 2021 Edition remains the only comprehensive source for information on the corporate law departments and practitioners of the companies of the United States and Canada. Profiling over 30,000 attorneys and more than 12,000 companies, it supplies complete, uniform listings compiled through a major research effort, including information on company organization, department structure and hierarchy, and the background and specialties of the attorneys. In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

Since the late 18th century, when it emerged as a source of heating and, later, steam power, coal has brought untold benefits to mankind. Even today, coal generates almost 45 percent of the world's power. Our modern technological society would be inconceivable without coal and the energy it provides.

Unfortunately, that society will not survive unless we wean ourselves off coal. The largest single source of greenhouse gases, coal is responsible for 43 percent of the world's carbon emissions. Richard Martin, author of SuperFuel, argues that to limit catastrophic climate change, we must find a way to power our world with less polluting energy sources, and we must do it in the next couple of decades—or else it is "game over." It won't be easy: as coal plants shut down across the United States, and much of Europe turns to natural gas, coal use is growing in the booming economies of Asia— particularly China and India. Even in Germany, where nuclear power stations are being phased out in the wake of the Fukushima accident, coal use is growing. Led by the Sierra Club and its ambitious "Beyond Coal" campaign, environmentalists hope to drastically reduce our dependence on coal in the next decade. But doing so will require an unprecedented contraction of an established, lucrative, and politically influential worldwide industry. Big Coal will not go gently. And its decline will dramatically change lives everywhere—from Appalachian coal miners and coal company executives to activists in China's nascent environmental movement. Based on a series of journeys into the heart of coal land, from Wyoming to West Virginia to China's remote Shanxi Province, hundreds of interviews with people involved in, or affected by, the effort to shrink the industry, and deep research into the science, technology, and economics of the coal industry, Coal Wars chronicles the dramatic stories behind coal's big shutdown—and the industry's desperate attempts to remain a global behemoth. A tour de force of literary journalism, Coal Wars will be a milestone in the climate change battle.

A portrait of a family living with AIDS describes how the Broadbents adopted a baby girl, only to discover that she had been infected with HIV, and Hydeia's struggle to beat the odds as well as to become a teenage AIDS activist.

In a thriller narrated entirely through e-mail, letters, faxes, messages, memos, and transcripts, beautiful newscaster Joan Carpenter is stalked by "The Watcher," a twisted psychopath with an ardent obsession for her. Reprint.

Students and extreme sport enthusiasts will not only learn about the sports themselves, but also about the techniques, innovations, engineering, and physics behind them. How do ice yachters achieve speeds of up to 150 MPH? What does take to become a pro snowboarder? Other parts of the encyclopedia highlight key areas of study, such as extreme sports and the media, the controversies surrounding, and the impact of extreme sports on our culture. A resource guide of print and electronic sources, competitions, organizations offers students an insider's guide to all things extreme. Inside readers will discover BASE (Building, Antenna tower, Span, Earth) Jumping. What's more dangerous than leaping off of a tall building? Jumping off a structure that's much closer to the ground, and that's exactly what many BASE jumpers regularly do. The risks include malfunctioning parachutes, landing on rocks, into electrical wires and more. Readers will learn about Bhang Gliding, where experienced pilots perform full barrel rolls, inverted maneuvers and other stunt flying moves. It is no longer unusual for an experienced hang glider to travel 200 miles or reach altitudes above 10,000 feet. Coverage also includes information on caving, which involves exploring caves that travel deep into the earth, mountain biking, and many other sports.

The Jazz Standards

Marianne Broadbent is a leadership and executive search consultant who works every day with women and men making career decisions and life choices. Her multiple careers, from high school teacher to global business executive, have been experienced alongside raising four children in a 'guilt free environment' and sustaining long term relationships. She provides sharp and informed insights through working with organisations and teams to build and sustain great talent. She shares her personal experiences of taking career risks, making multiple choices and managing a 'blended life' in our new modern paradigm where careers aren't as linear as they once were, and diversity and risks are required to achieve success. She complements this with the thoughts and words of 24 executives who willingly provide their personal and career perspectives on their own trade-offs and 'getting on with it'.

Over 100 British executives have contributed to this study of what it's really like to work for a Japanese company. Media beliefs about the Japanese in Britain suggest that they are obsessed with long-term planning and consensus decision-making, that all the bosses are Japanese, that all decisions are made in Tokyo, and that uniforms and exercises are compulsory. Dr Jones' findings question these 'myths' arguing that the Japanese have shown a remarkable adaptability to local conditions.

2007 was a pivotal year for Widnes Vikings. Dreams of promotion to Super League were dashed, the club sank into Administration, but rose, phoenix-like, under new owner Steve O'Connor.
