For six years Maya Stovall staged Liquor Store Theatre, a conceptual art and anthropology video project---included in the Whitney Biennial in 2017---in which she danced near the liquor stores in her Detroit

neighborhood as a way to start conversations with her neighbors. In this book of the same name, Stovall uses the project as a point of departure for understanding everyday life in Detroit and the possibilities for ethnographic research, art, and knowledge creation. Her conversations with her neighbors—which touch on everything from economics, aesthetics, and sex to the

political and economic racism that undergirds Detroit's history—bring to light rarely acknowledged experiences of longtime Detroiters. In these exchanges, Stovall enacts an innovative form of ethnographic engagement that offers new modes of integrating the social sciences with the arts in ways that exceed what either approach can achieve alone. Laws regulating the retail sale of alcoholic beverages vary greatly by state. Whereas some states allow the

sale of beer, wine and hard liquor at grocery stores and other retail establishments, others restrict the sale of one or more of the beverage categories to private or state-owned liquor stores. Increasingly states have considered the liberalization of alcoholic beverage sales. Although Washington is the only state to significantly liberalize their regulation of alcohol in recent years, several states across the country have also considered loosening existing restrictions. This paper examines the impact of retail restrictions on alcohol consumption as well as retail sector structure and employment using panel data from the fifty US states from 2001 to 2010. Preliminary results suggest that prohibiting wine and hard liquor sales at grocery and convenience stores reduces alcohol consumption and increases liquor store employment, but does not affect employment in grocery stores or other retail establishments. However, states that only prohibit hard liquor sales at grocery and convenience stores and states that prohibit all alcohol sales at such stores

are not significantly different than unrestricted states in terms of overall alcohol consumption or liquor store employment. These results may contribute to the policy debate surrounding the liberalization of state alcohol retail laws.
