Alex and Toury Omnibus The Unwanteds Congressional Record Quiver Celestial Spheres A Thyme to Discover A well-funded legal and media campaign, with the ultimate goal of undermining what remains of limits on big money in politics, has mislabeled as a "partisan witch hunt" the bipartisan effort to enforce Wisconsin's longstanding laws governing coordination between campaigns and independent groups, according to a new report from the Center for Media and Democracy. "Anti-coordination laws have become more vital than ever before in the post-Citizens United world, where 'independent' political organizations are raising and spending unlimited funds for elections but keeping their donors a secret" said Brendan Fischer, CMD General Counsel and the author of the report. "If a candidate can coordinate with these secretly-funded groups and establish shadow campaign committees, then the candidate contribution limits and disclosure requirements are rendered meaningless." To say *Toury* and *Alex*'s reign has been rocky is an understatement. But the danger isn't over yet. Rebels and necromancers are still out there, joining forces under "the commander." As *Alex* plans against a war beyond what *Fyr* has seen in generations, he knows they will strike where it hurts *Alex* most: his heart. He must make the ultimate decision—sacrifice everything, or let his tenacious lifemate save herself? Meanwhile, being a queen is not *Toury*'s dream job—she always wanted *Alex*, not the crown. But as enemies close in, *Toury* must make her own harrowing choices to control her own destiny, and if she must, all of *Fyr*'s. In this conclusion to *Alex* and *Toury*'s love story, they will face horrors beyond their wildest nightmares. Will they be able to heal a fractured kingdom, or will all turn to ash and ruin? Rationale: Although studies using the California Verbal Learning Test (CVLT) have shown that recognition memory declines with age, age-related differences on more nuanced aspects of recognition have not been explored in detail. CVLT research also has shown that Alzheimer's disease (AD) is associated with impaired recall and recognition that reflect an encoding deficit stemming from neuropathology in medial temporal cortices. Huntington's disease (HD) is also associated with impaired recall but, in contrast to AD, in early stages shows less compromised recognition, reflecting primarily a retrieval deficit due to frontal-system dysfunction. Although original CVLT research demonstrated that recognition deficits are less severe in HD than in AD, more recent CVLT-II evidence has yielded mixed findings, highlighting the need for more refined measures to elucidate the extent of recognition memory impairment in AD and HD and thereby enhance characterizations of the profiles of memory loss associated with these neurodegenerative conditions. Method and Results: Study 1 examined whether AD and HD differences on the CVLT-II Total Recognition Discriminability (RD) index (which assesses the ability to distinguish List A [original word list] targets from all distractors on the Yes/No Recognition trial) varied across nonparametric (used in CVLT) and parametric (used in CVLT-II) calculations of Total RD. Comparisons of group differences on nonparametric versus parametric Total RD indices could only be done in the context of raw scores (the CVLT-II does not by default include a nonparametric Total RD index, and no standardized nonparametric Total RD scores were therefore available), and the magnitudes of group differences were not shown to significantly differ across nonparametric and parametric methods. However, in contrast to what was observed in prior CVLT studies, analyses indicated that relative to the AD group, the HD group exhibited comparable standardized parametric Total RD scores (despite higher raw nonparametric and parametric Total RD scores [after accounting for demographic factors when appropriate]). A potential explanation for the discrepancy in performance of individuals with HD on the CVLT versus CVLT-II recognition trials was that an increased proportion of prototypical distractors (i.e., those that are semantically related to targets) on the CVLT-II relative to the CVLT disproportionately amplified the difficulty of the recognition trial for individuals with frontal-system dysfunction (e.g., HD). Study 2 investigated the utility of more refined RD indices generated to parse the degree of semantic association between targets and distractors (on Source and Novel RD indices that assess the ability to distinguish List A targets from List B [interference word list] and novel distractors, respectively) in characterizing nuanced aspects of yes/no recognition memory in healthy older and young adults. Although older adults performed worse than young adults on all RD indices, age group differences were smaller on more refined RD indices that excluded semantically-related distractors in RD calculations. Building on findings from Studies 1 and 2, Study 3 examined performance in individuals with AD and HD on Total RD and List A vs. Novel/Unrelated RD indices. The latter is a new

index that isolates the ability to distinguish List A targets from distractors that are novel and semantically unrelated to targets. The List A vs. Novel/Unrelated RD index is therefore less subject than the Total RD index to source memory difficulties and semantic confusion, both of which are often seen in individuals with frontal-system dysfunction (e.g., HD), and may yield more purified assessments of yes/no recognition memory in HD. Analyses indicated that the List A vs.

Novel/Unrelated RD index yielded more robust AD versus HD differences than the Total RD index, providing greater differentiation between individuals whose memory disorder is primarily at the encoding/storage level (e.g., AD) versus at the retrieval level (e.g., early HD). Relevance: Given the expanding older population and that memory loss is a hallmark feature of cognitive impairment in both healthy aging and neurodegenerative disease, more refined memory indices are needed to elucidate the nature of memory changes that may be associated with normal aging and neurodegenerative processes. Collectively, Studies 1, 2, and 3 utilized innovative psychometric approaches with the CVLT-II to explore age-related differences on more nuanced aspects of yes/no recognition memory, as well as elucidate the extent of yes/no recognition memory impairment in AD and HD.

Longtime fans and new readers alike will enjoy this fantastical journey out of our world and into the sphere of *Fyr*. *Fyr* At seventeen, *Toury* arrives in *Fyr*, where magic is power, a prince's love is deadly, and female autonomy is a dream. Formerly a loner and burden to her adoptive parents, she ruins her chances of a fresh start by offending an ogler who just happens to be the prince. *Alex*, the Prince of *Fyr*, is no novice when it comes to pressure. He has to face his father's ailing health, the expectation

to marry soon, and the hidden necromancers trying to take over the realm by exploiting his dark curse. At least there's hope in a cheeky savior, but Earth girls aren't so easy. Toury and Alex learn that the strongest magic cannot be conjured but must be earned. They must risk their lives, hearts, and futures to save the land from a darkness of apocalyptic proportions. But can they trust each other enough to save Fyr? Or will everything they hold dear turn to ash? Draca After everything they've been through, Alex and Toury deserve a happily ever after, but being king proxy is not all it's cracked up to be. Alex inherited a world divided by his father, including incensed rebels—and a rogue dragon on the loose!—but the most pressing issue is Toury. Though he chose his kingdom over her and hurt her, by the god and goddess, he loves her too much to let her go. But can he ever do enough to deserve her? Toury is a shell of her former self and grappling to figure out who—in this still alien world—she will become. Her relationship is a hot mess, nightmares plague her, and rooting out necromancers is more than overwhelming—not to mention family baggage. Becoming queen means overcoming her past and seeing Alex for the man he is and not the cursed monster who destroyed their love. Rebels, dragons, and betrayals galore are just another day of court life. Toury and Alex managed to save the world, but can they repair a torn kingdom while their personal lives are in shambles? From a New York Times – bestselling author comes this “book to share with

every woman in your family” honoring the wisdom and spirit of older women (Evelyn “Champagne” King). These women have lived decades raising children, caring for husbands, and creating nests out of which children fly to be productive members of society. Often being forced to observe more than participate in the events around them, women have unique insights that can help future generations not merely survive, but thrive. In *Ageless Women, Timeless Wisdom*, Dr. Lois Frankel gives center stage to these wise women. From Los Angeles, California, to Shanghai, China, women aged seventy and older share thoughts and stories that are heartwarming and hilarious; insightful and witty; philosophical and practical: “When life gives you lemons,” says Jo-Ann Mercurio, born in 1941, “add vodka.” This book, with lovely illustrations by Lisa Graves, is an important record of women’s reflections on lives well lived. It is sure to be passed from grandmother to daughter to granddaughter. “I love this book! Wisdom and wit worth remembering and sharing.” —Josh Berman, creator and executive producer, *Drop Dead Diva* and *CSI* “It would be a shame if the humor and inspiration from these wise women was lost. Dr. Lois captured their spirits . . . This is truly a good read.” —Evelyn “Champagne” King “It’s about time for a book like this. For too long the wisdom of older women has gone unnoticed, unappreciated, and undervalued . . . Sure to put a smile on your face and the faces of the women you share it with.” —Rita Coolidge There are thousands and thousands of interesting, inspiring, and unique women in history to study, women from all over the world and from every time period. What better way to learn about each empowering story than by coloring them? I could not let go, let alone believe Archer was truly gone. There was something utterly wrong with the statement "Archer Ambrose is dead." To say it was a bad "breakup" would be an understatement. Callie is told Archer is dead, but if the god of love were dead, surely she'd stop loving him? Lucien and Aroha try to help Callie grieve and move on—only Lucien finds it difficult to not love her, which is complicated by Callie's sudden illness, evolving powers, and his obsession with exposing truth. Despite Archer's orders to never see her again and his warmonger father's ever-watchful gaze, Archer can't resist the dangerous urge to plot ways back to Callie. Chase must find a way to save his son, even if it means calling upon the recently suppressed war-god within. With the immortal world fractured, can Love find a way to piece his heart—and

In this groundbreaking narrative history, Ari Berman charts both the transformation of American democracy under the VRA and the counterrevolution that has sought to limit voting rights, from 1965 to the present day. The act enfranchised millions of Americans and is widely regarded as the crowning achievement of the civil rights movement. And yet, fifty years later, we are still fighting heated battles over race, representation, and political power, with lawmakers devising new strategies to keep minorities out of the voting booth and with the Supreme Court declaring a key part of the Voting Rights Act unconstitutional. Berman brings the struggle over voting rights to life through meticulous archival research, in-depth interviews with major figures in the debate, and incisive on-the-ground reporting. In vivid prose, he takes the reader from the demonstrations of the civil rights era to the halls of Congress to the chambers of the Supreme Court. At this important moment in history, *Give Us the Ballot* provides new insight into one of the most vital political and civil rights issues of our time.
