In *The Assassin's Accomplice*, historian Kate Clifford Larson tells the gripping story of Mary Surratt, a little-known participant in the plot to kill Abraham Lincoln, and the first woman ever to be executed by the federal government of the United States. Surratt, a Confederate sympathizer, ran the boarding house in Washington where the

conspirators- including her rebel son, John Surratt- met to plan the assassination. When a military tribunal convicted her for her crimes and sentenced her to death, five of the nine commissioners petitioned President Andrew Johnson to show mercy on Surratt because of her sex and age. Unmoved, Johnson refused- Surratt, he said, "kept the nest that hatched the egg." Set against the backdrop of the Civil War, *The Assassin's Accomplice* tells the intricate story of the Lincoln conspiracy through the eyes of its only female participant. Based on long-lost interviews, confessions, and court testimony, the text explores how Mary's actions defied nineteenth-century norms of femininity, piety, and motherhood, leaving her vulnerable to deadly punishment historically reserved for men. A riveting narrative account of sex, espionage, and murder cloaked in the enchantments of Southern womanhood, *The Assassin's Accomplice* offers a fresh perspective on America's most famous murder. *Cincinnati Magazine* taps into the DNA of

the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

"This volume is an attempt to present in permanent form the history of the British invasion of Maryland during the War of 1812. The story has not heretofore been fully told; the record is deplorably incomplete, and the following pages are intended to be an adequate chronicle of the events of that period in Maryland, and to that end even trifling circumstances have been interwoven in the narrative"--Preface.

"Catechesis is a hybrid collection of textual and visual poems that examine belief and obsession. It explores how beauty leads to danger and

danger births another kind of beauty, in a cycle of creation and destruction. This book holds its mythology close, but it holds its truth even closer"--Provided by publisher.

"Over ten years in the making, The Encyclopedia of the Stone-Campbell Movement offers for the first time a sweeping historical and theological treatment of this complex, vibrant global communion. Written by more than 300 contributors, this major reference work contains over 700 original articles covering all of the significant individuals, events, places, and theological tenets that have shaped the Movement. Much more than simply a historical dictionary, this volume also constitutes an interpretive work reflecting historical consensus among Stone-Campbell scholars, even as it attempts to present a fair,

representative picture of the rich heritage that is the Stone-Campbell Movement."--BOOK JACKET.

During the past decade, the study of the chemical structures used by insects has advanced from a subject that could be reviewed in a single volume to a vastly more advanced level. This important new volume brings together a focused group of reviews that offer perspective on the most interesting advances in insect chemical ecology. *Chemical Ecology of Insects 2* brings together an internationally respected group of experts covering such topics as chemoreception and integration, orientation mechanisms, plant-insect interactions and insect-insect interactions. An important benefit of these reviews lies in the identification of the boundaries of our current knowledge and the most profitable areas in which we should expect these areas to develop. This important work will appeal to entomologists and ecologists working directly with insects. In addition, plant scientists interested in the interaction of plants and insects will find much valuable information. The book is intended to benefit both field and laboratory researchers as well as

advanced students.
