A critical assessment of the practices of commercial military suppliers who have profited from the War on Terror evaluates the relationships between political decision-makers and wartime commercial ventures, the wartime contributions of private contractors, and the moral issues associated with wartime profit making.

The Profiteering Act, 1919, Order [n° 2], Dated October 14, 1919, Made by the Board of Trade Under Section 1 of the Profiteering Act, 1919 [9 and 10 Geo. 5, C. 66].

Tales of Corruption and Profiteering in the War on Terror

The Democrat Party likes to pose as the party of compassion. But where is the compassion in "sanctuary cities" that allow foreign criminals to prey on innocent Americans? Where is the compassion in encouraging envy and lawlessness? Crystal Wright isn't falling for the liberal con job any longer. A one-time (2008) Obama supporter herself—and now a totally fearless "Conservative Black Chick"—Wright blows the whistle on the Democrat Party and its policies that are destroying America. In Con Job you'll learn why Democrat politicians have no problem with inner-city riots; why Democrats so fervently defend Planned Parenthood, how Democrats are remaking America through massive immigration and more. The 2016 presidential election is set to be one of the most consequential in American history—and Crystal Wright's book is the one you need to help friends and family avoid falling for the Democrat con job yet again.

Argues that the for-profit mental health industry is defrauding the federal government out of millions of dollars and lobbying for more extensive coverage under the new health care reform

Genocide by Denial: How Profiteering from HIV/AIDS Killed Millions traces the carnage of HIV/AIDS from its Ugandan epicentre in the villages of Kasensero, along the shores of Lake Victoria, through sub-Saharan Africa and onto the rest of the world. The author's involvement in the struggle against the virus started in 1989, soon after his return from a long exile in Europe and the Middle East. On arrival he found the disease devastating his country, compelling him to fight the modern-age plague. He became one of the leaders in a protracted fight against the scourge and an advocate for universal access to life-saving antiretroviral therapy. In this book the author exposes the incredible self-indulgence of the pharmaceutical companies and the cold-heartedness of the rich world that turned a blind eye until it was far too late, and then responded too slowly with too little. The book details his challenge to the powerful pharmaceutical companies that insisted on profitable business as usual, ignoring the lives of millions, and his call for more ethical and humanitarian ways of trade, involving crucial life-saving drugs, and a new world order to ensure entitlement of the poor to rapid humanitarian relief.

Combating war profiteering: are we doing enough to investigate and prosecute contracting fraud and abuse in Iraq?: hearing before the Committee on the Judiciary, United States Senate, One Hundred Tenth Congress, first session, March 20, 2007.

Medicine in the United States is big business. We spend 50 percent more on health care per capita than other developed countries, but a multitude of measures indicate that we are not getting health-care value for our money. In *Too Big to Succeed*, author Dr. Russell J. Andrews details why health care in America has become more expensive but less effective and outlines a new paradigm for health-care delivery. *Too Big to Succeed* describes how American medicine is on an unsustainable course: costs are increasing while benefits are deteriorating in comparison with other developed nations. Beginning with the Hippocratic Oath and the the premedical student, Andrews traces the myriad ways in which the profit motive has infiltrated American medicine—including medical school training, current models of health-care delivery, medical professional societies, medical research, and medical drug and device development. Presenting an insider's look into the current crisis in health care, Andrews demonstrates that until both the physician and the patient return to the relationship that underlies medicine, physicians will not experience the joy of healing those who seek their help and patients will not appreciate that a good physician is a permanent part of their lives.

Profiteering

An explosive account of how a handful of arms-makers feast at the nearly limitless Pentagon trough.

The diet industry feeds on the hopes and the fears of those who need-or think that they need-to lose weight. Since the publication of the first known diet book in 1864, a host of sanctimonious preachers and self-proclaimed experts-often overweight themselves-have stoked fears of obesity effectively for both profit and political power, none more so than former surgeon general C. Everett Koop. In *Public Health Profiteering*, James T. Bennett and Thomas J. DiLorenzo offer a scathing and irreverent assessment of Koop's public and private career showing how a brilliant pediatric surgeon has evolved into a self-seeking and hypocritical public scold. During his term as Surgeon General under the Bush administration, Koop, enamored of the military trappings of title and uniform, saw himself as leading an army of public health administrators against an enemy. As often as not, the enemy took on the disquieting countenance of the American people. In Koop's view they were stupid, improvident, feckless, unable to make the simplest decisions about their lives. As Bennett and DiLorenzo show, he used his position as a bully pulpit for intemperate attacks on the tobacco and alcohol industries and to irresponsibly exaggerate the dangers of obesity. While taking a prohibitionist line, Koop himself smoked a pipe, drank martinis, and weighed in at a hefty 210 pounds. Although Koop claimed that he would never cash in on his office, his subsequent career tells a far different story. He has lobbied, hawked, and endorsed products for a host of firms: Wyeth Ayerst

(makers of the dubious diet drug Fen-Phen), Weight Watchers, Jenny Craig, Intel, Neurocrine, Kelloggs, BioPure, and many others. Lively in style and carefully researched, *Public Health Profiteering* will be of interest to health policy specialists, political scientists, economists, and media analysts. James T. Bennett is professor of economics at George Mason University. He is founder and editor of the *Journal of Labor Research* and has authored many books and articles, including *Health Research Charities: Image and Reality* and *Official Lies: How Washington Misleads Us*, co-authored with Thomas DiLorenzo. Thomas DiLorenzo is professor of economics at the Sellinger School of Business and Management at Loyola College in Baltimore. He has co-authored many books and is widely published in academic journals as well as the popular press, including the *Wall Street Journal* and *USA Today*.

The tale of the Bechtel family dynasty is a classic American business story. It begins with Warren A. 'Dad' Bechtel, who led a consortium that constructed the Hoover Dam. From that auspicious start, the family and its eponymous company would go on to 'build the world,' from the construction of airports in Hong Kong and Doha, to pipelines and tunnels in Alaska and Europe, to mining and energy operations around the globe. Today Bechtel is one of the largest privately held corporations in the world, enriched and empowered by a long history of government contracts and the privatization of public works, made possible by an unprecedented revolving door between its San Francisco headquarters and Washington. *Greed, Profiteering, and Fraud in a Mental Health System Gone Crazy*

"You think that you are free? Do you think that slavery is abolished and squashed out existence from the world after "liberating" the dark skinned slaves of the southern hemisphere? Think again. Slavery, instead of being uprooted, is firmly embedded in a different diffuse, pervasive and highly lucrative subscription business model form. The new slaves are the entire world, both the haves and have nots. The slave masters are just a few super rich global elites who fight to control every aspect of your daily lives. They have every imaginable whizbang technology tool with which they can hunt you down wherever you hide, listen to all your conversations, monitor all your purchases, track your bank balances, and even predict what you are thinking and planning to do. Do you think that you can escape? Think again!. In this not-too-distant future, you are the slave. You are the hunted. What do you do? In this disturbing, real life, true story of the past two years, the question - whether the pandemic was a random anomaly or a coordinated shock event - surfaces with no definitive answers. It is a turning point that can explain the trajectory of current lives. The book sheds light on the hidden connections and ideas in our pervasive slave lives and offers an escape route."

Bad things occur and persist because of the presence of powerful beneficiaries. In this provocative and illuminating book, Imad Moosa illustrates the economic motivations behind the last 100 years of international conflict, citing the numerous powerful individual and corporate war profiteers that benefit from war. In the tradition of Naomi Klein's Shock Doctrine, a

In this provocative and compelling examination of the deep politics of war, Carolyn Nordstrom takes us from the immediacy of war-zone survival, through the offices of power brokers, to vast extra-legal networks that fuel war and international profiteering. She captures the human face of the front lines, revealing both the visible and the hidden realities of war in the twenty-first century. *Shadows of War* is grounded in ethnographic research carried out at the epicenters of political violence on several continents. Its pages are populated not only with the perpetrators and victims of war but also with the scoundrels, silent heroes, and average families who live their lives in the midst of explosive violence. War reconfigures our most basic notions of humanity, Nordstrom demonstrates. This book, of crucial importance at the present moment, shows that war is enmeshed in struggles over the very foundations of the sovereign state, the crafting of economic empires both legal and illegal, and innovative searches for peace. Nordstrom describes the multi-trillion-dollar international financial networks that support warfare. She traces the entangled routes by which illegal drugs, precious gems, weapons, basic food supplies, and pharmaceuticals are moved by an international cast of businesspeople, profiteers, and black-market operators. *Shadows of War* demonstrates how the experiences of both the architects of war and of ordinary people are deleted from media accounts and replaced with stories about soldiers, weapons, and territory. For the first time, this book retrieves from the shadows the faces of those whose stories seldom reach the light of international recognition.
