This book offers a careful examination of the politics of social policy in an era of austerity and conservative governance. Focusing on the administrations of Ronald Reagan and Margaret Thatcher, Pierson provides a compelling explanation for the welfare state's durability and for the few occasions where each government was able to achieve significant cutbacks. The programmes of the modern welfare state - the 'policy legacies' of previous governments - generally proved resistant to reform. Hemmed in by the political supports that have developed around

mature social programmes, conservative opponents of the welfare state were successful only when they were able to divide the supporters of social programmes, compensate those negatively affected, or hide what they were doing from potential critics. The book will appeal to those interested in the politics of neo-conservatism as well as those concerned about the development of the modern welfare state. It will attract readers in the fields of comparative politics, public policy, and political economy. Is large-scale immigration to Europe incompatible with the continent's generous and encompassing welfare states? Are Europeans willing to share welfare benefits with ethnically different and often less well-off immigrants? Or do they regard the newcomers as undeserving and their claim for welfare rights as unjustified? These questions are at the heart of what has to become known as the 'New Progressive Dilemma' debate — and the predominant answers given to them are rather pessimistic. Pointing to the experiences of the US, where a multi-racial society

in combination with a longstanding history of immigration encounters very limited welfare provision, many Europeans fear that the continent's new immigrant-based heterogeneity may push it toward more American levels of redistribution. But are the conflictual US experiences really resembled in the European context? *Immigration and Welfare State Retrenchment* addresses this question by connecting the New Progressive Dilemma debate with comparative welfare state and party research in order to analyse the role ethnic diversity plays for welfare reforms in the US and Europe. Whereas the combination of racial patterns and party politics had and still has serious consequences for the US welfare system, the general message of the book is that these are not resembled in the Western European context. While many Europeans are very critical of immigration and willing to ban immigrants from welfare benefits, both the institutional design of European welfare programs and the economically divided anti-immigrant movement prevent immigration concerns from translating into actual retrenchment in the core areas of welfare.

Public Health in a Retrenchment Era illustrates the political and economic reality of making cutbacks in traditional government-sponsored programs. This book critically examines the issues concerning cutbacks by focusing on Los Angeles County, which has one of the largest public health service systems in the nation, and explains how cutbacks were legitimized and implemented. Muller and Ventriss propose that the retrenchment process offers an opportunity for policymakers and citizens alike to critically examine new choices which may not have existed in periods of fiscal expansion. They criticize the present focus on managerialism and propose an alternative approach. Called the co-possibility model, it enhances a more humane and substantive policy approach in making cutbacks. This model links the citizen, policymaker, and public organization in a new relationship, fostering an environment for policy experimentation and innovation in this retrenchment era. A lot can be learned about the impact of an antipoverty program by studying income replacement for those observed to leave the program after its retrenchment. A Bank-supported workfare program in Argentina is found to have a sizeable impact on participants' incomes.

Christianity is a Permanent Thing; this work is about how Christians should defend Christianity and other Permanent Things in an increasingly hostile civilization. It is a continuation of the dialogue of Schaeffer, MacIntyre, Moore and Dreher and owes much to Eliot, Yeats and Kirk for inspiration. No book or idea stands alone, we all stand on the shoulders of giants and this is no exception. Herein I offer a contribution to the Benedictine approach to the dilemma Christianity faces of an increasingly post-Christian and perhaps potentially anti-Christian civilization. In our era, these concepts were first articulated in 1981 by Francis August Schaeffer, in *A Christian Manifesto* and Alasdair MacIntyre in *After Virtue* describing in detail the problems so eloquently penned by W.B. Yeats in 1919. Hoppe furthered the discussion in 2001 by pointing out the failure of Western Ideology and its implications. Others have since written on the subject, Lee Strang in 2006 called for a legal scholar to rise as a St. Benedict, Russell Moore offered an optimistic way ahead in 2015. Rod Dreher codified the idea in *The Benedict Option* into a realistic and workable concept in 2017. At the heart of it, all of these efforts have approached the idea of Christianity as a Permanent thing and wondered how Christians might defend permanent things in a changing world. Individuals like Mike Church, denied employment for standing upon principles, are living Benedictine lives, seeking to pursue their vocation in alternate ways

and to make a difference. There are others, groups, and individuals. This offering owes to the intellectual and vocational efforts of others, their examples and their dedication. *Retrenchment* addresses three areas, the individual, local church and local community and discusses the problems we in Christianity have traditionally faced that prevent cooperation and love of our brothers and sisters in Christ. This is a less optimistic book than Dreher's, things have progressed perhaps faster than could have been imagined in the two years since his book was written. I suspect others will write even less optimistic books in the years to come, things will get worse before they get better. But, there are things we can and should be doing.

Austerity, Retrenchment and the Welfare State

Why the US Experience is not Reflected in Western Europe

This book confronts one of the most fiercely contested issues in current political debates: how is welfare state retrenchment possible in modern democracies despite the welfare state's continuing popular appeal? Starke offers an international comparative analysis of welfare state retrenchment and an in-depth examination of its radical deployments.

In this bold new perspective on the United States – China power transition, Paul K. MacDonald and Joseph M. Parent examine all great power transitions since 1870. They find that declining and rising powers have strong incentives to moderate their behavior at moments when the hierarchy of great powers is shifting. How do great powers respond to decline? they ask. What options do great powers have to slow or reverse their descent? In *Twilight of the Titans*, MacDonald and Parent challenge claims that policymakers for great powers, unwilling to manage decline through moderation, will be pushed to extreme measures. Tough talk, intimidation, provocation, and preventive war, they write, are not the only alternatives to defeat. Surprisingly, retrenchment tends not to make declining states tempting prey for other states nor does it promote domestic dysfunction. What retrenchment does encourage is resurrection. Only states that retrench have recovered their former position. MacDonald and Parent show how declining states tend to behave, what policy options they have to choose from, how rising states respond to decline, and what conditions reward which strategies. Using case studies that include Great Britain in 1872 and 1908, Russia in 1888 and 1903, and France in 1893 and 1924, *Twilight*

of the Titans offers clear evidence that declining powers have a wide array of options at their disposal and offers guidance on how to use the right tools at the right time. The result is a comprehensive rethinking of power transition and hegemonic war theories and a different approach to the policy problems that declining states face. What matters most, the authors write, is the strategic choices made by the great powers.

Are we living in an age of permanent austerity? In this insightful book, Bent Greve provides a comprehensive empirical analysis of welfare states since 2000, exploring the ways in which austerity can be measured and quantified and how far retrenchment has impinged on European welfare states. Featuring clear and succinct discussions defining austerity and retrenchment, Greve offers strong methodological approaches to the measurement of austerity. This timely book provides detailed comparative European analysis, unpacking changes in health care, pension systems and employment policies to better understand the nature, impact and extent of austerity in welfare services. Detailed and nuanced, this book is critical for students of social policy, sociology and political science exploring contemporary European austerity programs. Researchers will also benefit, as the author

casts new light on the development and trajectories of the modern welfare state.

When the Susan G. Komen foundation pulled funding for Planned Parenthood's breast exam program, the public uproar brought new focus to the high political and economic stakes faced by nonprofit organizations. The missions of 501(c)(3) and 501(c)(4) organizations, political action committees, and now Super PACs have become blurred as issues of advocacy and political influence have become increasingly entangled. Questions abound: Should a nonprofit advocate for its mission and its constituents with a goal of affecting public policy? What are the limits of such advocacy work? Will such efforts fundamentally jeopardize nonprofit work? What can studies of nonprofit advocacy efforts reveal? Editors Robert J. Pekkanen, Steven Rathgeb Smith, and Yutaka Tsujinaka recognize the urgent need for relevant research and insight into these issues as direct and indirect government services are squeezed by federal cutbacks. *Nonprofits and Advocacy* defines advocacy and clarifies the differences among advocacy, lobbying, political activity, and education, as well as advocacy measurements. Providing original empirical data and innovative theoretical arguments, this comparative study is organized into two parts. The first part focuses on local and national dimensions of nonprofit advocacy, and the second part looks at organizational politics and strategies. The conclusion considers basic questions about nonprofit advocacy and seeks to draw lessons from research efforts and practice. Providing a critical look at the multidimensional roles and advocacy efforts of nonprofits, this volume will be valued by scholars, students, leaders, and

activists—many of whom advocate for the interests of their organizations while delivering services to their organizations' constituents. The research is also relevant for policymakers involved in cross-sector public policy initiatives as they strive to provide more efficient public-private solutions to challenging governance issues.

Exploring NATO's post-Cold War determination to support democracy abroad, this book addresses the alliance's adaptation to the new illiberal backlashes in Eastern Europe, the Western Balkans and Afghanistan after the alleged 'return of history'. The book engages the question of what has driven NATO to pursue democratisation in face of the significant region-specific challenges and what can explain policy expansion or retrenchment over time. Explaining NATO's adaptation from the perspective of power dynamics that push for international change and historical experience that informs grand strategy allows wider inferences not only about democratisation as a foreign policy strategy but also about the nature of the transatlantic alliance and its relations with a mostly illiberal environment. Larsen offers a theoretical conception of NATO as a patchwork of one hegemonic and several great power interests that converge or diverge in the formulation of common policy, as opposed to NATO as a community of universal values. This volume will appeal to researchers of transatlantic relations, NATO's functional and geographical expansion, hegemony and great power politics, democracy promotion, lessons of the past, (Neoclassical) Realism, alliance theory, and the crisis of the liberal world order.

Turkey has been a critical case to study to assess the impact of EU conditionality on non-member states, but has lost its visibility following the debates on the detachment of Turkey from the EU gradually since 2005. This book studies Turkey–EU relations in the area of foreign policy from 1987 when Turkey applied for full membership and expanding to the present-day retrenchment of Turkey from the EU. It provides a unique perspective in looking to explain the entirety of the EU–Turkey relations during this period, covering both transformation and retrenchment of Turkish foreign policy from the EU requirements. The book further illustrates that the conditionality mechanism is still relevant to study EU–Turkey relations, and when applied systematically, can map both attachment and detachment from the EU. It is also critical to understand how Turkey has distanced itself from the EU gradually and incrementally. This book is of key interest to scholars and students of EU foreign policy, Turkish foreign policy, conditionality, foreign policy analysis, Turkish–EU relations, the ENP and more broadly to international relations. The consolidation of public finance has become the most prevalent topic in recent policy discourse in the US. However, the

political debate about fiscal "belt-tightening" stretches back to the last decades of the past millennium, induced by deteriorating economic conditions which followed the first oil price shock in the early 1970s. Retrenchment in the American Welfare State investigates to what extent different welfare state programs in the US were affected by cutbacks during the Republican Reagan era, on the one hand, and during the Democratic Clinton era on the other, and to what extent these cutbacks reveal certain "patterns" of retrenchment, and how the measured discrepancies can best be explained. Immigration and Welfare State Retrenchment

After retirement starts, increased savings are no longer possible to avoid later running out of funds. To avoid running out of funds the only possibility becomes retrenchment. But retrenchment causes immediate pain by reducing the current standard of living. The question is does accepting this pain improve the future standard of living sufficiently to cover the cost of the earlier retrenchment? Other

discussions of retirement have failed to consider this key question. This book answers this question by developing The Retrenchment Rule to determine when retirees should retrench.

The Risk of Social Policy? uses a comparative perspective to systematically analyse the effects of social policy reforms and welfare state retrenchment on voting choice for the government. It re-examines twenty elections in OECD countries to show if and how social policy issues drive elections. This book contributes to the existing literature by providing an empirical analysis of the electoral implications of social policy. Giger asks the basic research question: What are the electoral consequences of social policy performance and retrenchment? More specifically, the following questions are addressed in order to provide a systematic test of the topic: Is retrenchment indeed completely unpopular? Do people punish the government for bad performance in the field of social policy? And what are the political implications of such a punishment reaction; does it affect the government composition? It shows empirically that the risks of welfare state retrenchment to incumbent governments may be lower than previously thought, and presents a theoretical framework for re-examining the impact of retrenchment initiatives on election outcome. Making an important contribution to studies in political economy and welfare by questioning the assumption that social policy is an inherently controversial policy field in times of elections, The Risk of Social Policy? will be of interest to scholars and students concerned with the interplay between government and citizens, social policy and voting behaviour, and the political economy of welfare.

Are we living in an age of permanent austerity? In this insightful book, Bent Greve provides a comprehensive empirical analysis of welfare states since 2000, exploring the ways by which austerity can be measured and quantified. Through detailed comparative analysis between states, this book dissects the implementation of economic retrenchment, its extent and impact in Europe.

In common with republicanism or socialism in continental Europe, Liberalism in nineteenth-century Britain was a mass movement. By focussing on the period between the 1860s and the 1880s, this book sets out to explain why and how that happened, and to examine the people who supported it, their beliefs, and the way in which the latter related to one another and to reality.

Popular support for the Liberal party was not irrational in either its objectives or its motivations: on the contrary, its dissemination was due to the fact that the programme of reforms proposed by the party leaders offered convincing solutions to some of the problems perceived as being the most urgent at the time. This is a revealing, innovative synthesis of the history of popular support for the Liberal party, which emphasises the extent to which Liberalism stood in the common heritage of European and American democracy.

Over the post-Mao period, the Chinese state has radically cut back

its role in funding health services and insuring its citizens against

the costs of ill health. Using an analytical framework drawn from

studies of state retrenchment in industrialized democracies and in

post-communist Eastern Europe, Jane Duckett argues that the

state's retreat from health in China was not a simple consequence

of economic policies and market reform. Just as important were

the influences of health policies, reform era political institutions,

communist party ideology, and bureaucratic stakeholders.

Through her analysis, Duckett maintains that by studying

retrenchment in China, the world's most populous nation and

now a major global economic power, we can better understand

international transformations in the role of the state, and the

politics that shape that role. The Chinese State's Retreat from

Health both extends research on retrenchment politics to a major

authoritarian state and contributes to piecing together

understanding of the Chinese state's changing role across the

economy and other social policies, including housing and

education. It will be of interest to students and scholars of Chinese

politics, social policy and the Chinese health care system, as well

as to those with a comparative interest in health, welfare states

and the politics of retrenchment. Jane Duckett is Professor of
