This volume constitutes the proceedings of the 11th International Conference on Social Informatics, SocInfo 2019, held in Doha, Qatar, in November 2019. The 17 full and 5 short papers presented in these proceedings were carefully reviewed and selected from 86 submissions. The papers presented in this volume cover a broad range of topics, ranging from the study of socio-technical systems, to computer science methods to analyze complex social processes, as well as social concepts in the design of information systems.

From total beginner to technical expert, you will be digitally empowered by engaging with The Digital Plan. Whether you're the director of a digital communications department or you're a member of any team wishing to wield or understand the power of digital, this book will provide you with the tools you need to plan and execute digital strategy with ease. Using his many years of experience directing digital strategies for campaigns and organizations, Brad A Schenck outlines everything you want to know about digital planning, utilizing digital tools and making the most of your collaborative efforts. In this book, you should expect to find: Expert guidance framed with thoughtful questions you should ask. Bullet points of the most up-to-date tips and lots of them. Templates that will help you frame your plan, whatever your goals may be. Stories and anecdotes from someone who has advised hundreds of digital plans at the highest level. From the very technical to the more artistic, The Digital Plan covers everything from design and social media to data and analytics. This book is a must-have for anyone wishing to make the most of their digital presence to create powerful impact by driving community action.

Provides information for seniors on the social networking sites Facebook and Twitter, covering such topics as staying safe on the Internet, using email, setting up a Facebook profile, and finding trending topics on Twitter.

This book presents Proceedings of the 2021 Intelligent Systems Conference which is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world. The conference attracted a total of 496 submissions from many academic pioneering researchers, scientists, industrial engineers, and students from all around the world. These submissions underwent a double-blind peer-review process. Of the total submissions, 180 submissions have been selected to be included in these proceedings. As we witness exponential growth of computational intelligence in several directions and use of intelligent systems in everyday applications, this book is an ideal resource for reporting latest innovations and future of AI. The chapters include theory and application on all aspects of artificial intelligence, from classical to intelligent scope. We hope that readers find the book interesting and valuable; it provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research.

This set of 44 volumes, originally published between 1924 and 1995, amalgamates a wide breadth of research on the Labour Movement, including labour union history, the early stages and development of the Labour Party, and studies on the working classes. This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time, and will be of particular interest to students of political history.

"In May 1970, four days after Kent State, construction workers chased students through downtown Manhattan, beating scores of protesters bloody. As hardhats clashed with hippies, it soon became clear that something larger was underway. Democrats were at war with themselves. In The Hardhat Riot, David Paul Kuhn tells the fateful story of when the white working class first turned against liberalism, when Richard Nixon seized the breach, and America was forever changed. It was unthinkable one generation before: FDR's "forgotten man" siding with the party of Big Business and, ultimately, paving the way for presidencies from Ronald Reagan to Donald Trump. This is the story of the schism that tore liberalism apart. In this riveting story- rooted in meticulous research, including thousands of pages of never-before-seen records- we go back to a harrowing day that explains the politics of today. We experience an emerging class conflict between two newly polarized Americas, and how it all boiled over on one brutal day, when the Democratic Party's future was bludgeoned by its past."--

Twitter, Networked Publics, and the Transformation of American Journalism

First published in 1984. This volume brings together many of the foremost French and North American specialists on the French working class movement. Although they differ substantially in their theoretical and ideological orientation, they share a left perspective. Their original essays provide a coherent and comprehensive analysis of the history of the movement, focusing on the constraints and opportunities created by the economic crisis of the 1970s and the political change ushered in by the Socialist Party's victory in 1981.

In 1987 -- first in May and again in September -- Fiji, which had often been regarded as a model for racial co-existence, surprised the rest of the

world by staging not one but two coups. Most interpreters of the Fijian political scene saw the events as a result of tension between native Fijians and members of other ethnic groups. Michael Howard argues in this book that this interpretation is simplistic. Instead, he points out, the May coup was a strike against democratic government by elements associated with Fiji's traditional oligarchy seeking to hide behind a mask of populist communalism. Howard traces the evolution of Fijian politics from the precolonial chiefdoms, through the colonial era and into the postcolonial period, emphasizing the developments during the latter half of the 1980s. As a close and involved observer, he draws a convincing picture of the leading actors in contemporary Fijian politics and the motives guiding their actions. He describes how the ruling elite -- the Fijian chiefly families and their allies -- has maintained its power by manipulating communal or racially based sentiments and how the opposition has attempted to change the situation by creating political alignments based on social class. In the central part of the book Howard chronicles the rise of the Fiji Labour Party and its 1987 election victory over the ruling Alliance Party. He then discusses the short-lived regime of the Bavadra government and the events leading up to the May 1987 coup. Finally, he looks at events following the coup, as the oligarchy has sought to reimpose control in the face of popular opposition and internal division, discussing their implications for the social condition of Fiji, its international politics, and its internal ethnic relations. The book concludes with the death of Timoci Bavadra in late 1989. A perceptive case study of racial politics in the modern world and a significant new approach to the understanding of the dynamics of a non-western political system, *Fiji: Race and Politics in an Island State* provides a timely and comprehensive analysis of recent events in this important island state.

This comparative analysis of Scandinavian social democracies argues that the fate of socialist parties is decided, to a significant degree, by their own policies and reforms not solely by the changes in social structure emphasized in previous studies. Combining quantitative analysis and historical case studies to demonstrate the electoral effects of party policy, Gosta Esping-Andersen formulates a theory that is applicable not only to Scandinavia but to Western Europe as a whole. In addition, he explains why the support basis of social democracy has deteriorated so much more in Denmark than in Sweden and Norway. Originally published in 1985. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. The 29 papers in this volume cover a wide variety of topics, ranging from the Glottalic Theory and Lachmann's Law to the hermeneutic analysis of text-structure in Tacitus' *Germania*. The volume focuses on three themes specifically: the morphology and semantics of lexical formation; the internal and external syntax of the noun phrase; and the pragmatics of textual cohesion. The papers are descriptive rather than historical in approach, and most of the contributors are Latinists by training. For this reason the volume will be of interest not only for philologists and general linguists but also for those working with the Latin language.

First published in 1989, this book examines the work, careers and politics of French engineers and technical workers employed in traditional and high-technology settings. In the process, it critically evaluates several theories of social change and advocates a unique approach to class theory and the comparative analysis of nations. Neither owners of productive property nor wage workers performing routinised labour. Engineers occupy an ambiguous social position that has elicited a good deal of controversy about trends in their situation and ideology. Where theories of professionalism anticipate occupationally based challenges to the legitimacy of bureaucratic authority, Marxian and neo-Marxian analyses foresee class-based opposition to capitalism. Yet all these theories share a preoccupation with the effects of technology and the division of labour on social values and group identities. This book maintains that such a preoccupation obscures the significance of career situations and the distinctively national institutions that shape them. The book presents a fresh view of the interplay of occupation, class and nation.

Enjoy the top social media sites with ease and security Done correctly, social media is a way to connect friends, family, and the world while still maintaining security and privacy. Facebook, Twitter, & Instagram For Seniors For Dummies, 3rd Edition offers advice on how to enjoy the three most popular social media options while avoiding worry about who sees what you share. Written by social media expert Marsha Collier, this book walks you through establishing accounts, making connections, and sharing content including photos and video. You learn the settings to adjust on each platform to maintain privacy and filter out the content you don't want. This book also explains the subtle art of avoiding or blocking people on social platforms without jeopardizing your real-world relationships! Take control of what you share Connect with others Take and share your best pictures Use social media as a news source Social media sites are great fun once you learn how to cut through the clutter—and this book shows you how!

This book provides an overview of a range of quantitative methods, presenting a thorough analytical toolbox which will be of practical use to researchers across the social sciences as they face the challenges raised by new technology-driven language practices. The book is driven by a reflexive mind-set which views quantifying methods as complementary rather than in opposition to qualitative methods, and the chapters analyse a multitude of different intra- and extra-textual

context levels essential for the understanding of how meaning is (re-)constructed in society. Uniting contributions from a range of national and disciplinary traditions, the chapters in this volume bring together state-of-the-art research from British, Canadian, French, German and Swiss authors representing the fields of Political Science, Sociology, Linguistics, Computer Science and Statistics. It will be of particular interest to discourse analysts, but also to other scholars working in the digital humanities and with big data of any kind.

This two-volume set explores the various ways social media are profoundly changing politics in America. • Covers key political and cultural issues in today's discourse—such as gay marriage, race, gender, "big data," and hyper-surveillance—from a variety of perspectives and a broad range of contributors • Provides informed analysis of social media eruptions and their potential to change and shape political discourse • Supplies an analysis of power that highlights the forgotten core of politics and political communication

An exploration of anime 's masterpieces and game-changers from the 1960s to the present—with contributions from writers, artists, superfans and more. Anime—or Japanese animation—has been popular in Japan since Astro Boy appeared in 1963. Subsequent titles like Speed Racer and Kimba the White Lion helped spread the fandom across the country. In America, a dedicated underground fandom grew through the 80s and 90s, with breakthrough titles like Katsuhiro Otomo 's Akira making their way into the mainstream. Anime Impact explores the iconic anime movies and shows that left a mark on popular culture around the world. Film critic and longtime fan Chris Stuckmann takes readers behind the scenes of legendary titles as well as hidden gems rarely seen outside Japan. Plus anime creators, critics and enthusiasts—including Ready Player One author Ernest Cline, manga artist Mark Crilly, and YouTube star Tristan "Arkada" Gallant—share their stories, insights and insider perspectives.

This volume is focused on the emerging concept of Collaborative Innovation Networks (COINs). COINs are at the core of collaborative knowledge networks, distributed communities taking advantage of the wide connectivity and the support of communication technologies, spanning beyond the organizational perimeter of companies on a global scale. It includes the refereed conference papers from the 6th International Conference on COINs, June 8-11, 2016, in Rome, Italy. It includes papers for both application areas of COINs, (1) optimizing organizational creativity and performance, and (2) discovering and predicting new trends by identifying COINs on the Web through online social media analysis. Papers at COINs16 combine a wide range of interdisciplinary fields such as social network analysis, group dynamics, design and visualization, information systems and the psychology and sociality of collaboration, and intercultural analysis through the lens of online social media. They will cover most recent advances in areas from leadership and collaboration, trend prediction and data mining, to social competence and Internet communication.

The 5-volume proceedings, LNAI 12457 until 12461 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases, ECML PKDD 2020, which was held during September 14-18, 2020. The conference was planned to take place in Ghent, Belgium, but had to change to an online format due to the COVID-19 pandemic. The 232 full papers and 10 demo papers presented in this volume were carefully reviewed and selected for inclusion in the proceedings. The volumes are organized in topical sections as follows: Part I: Pattern Mining; clustering; privacy and fairness; (social) network analysis and computational social science; dimensionality reduction and autoencoders; domain adaptation; sketching, sampling, and binary projections; graphical models and causality; (spatio-) temporal data and recurrent neural networks; collaborative filtering and matrix completion. Part II: deep learning optimization and theory; active learning; adversarial learning; federated learning; Kernel methods and online learning; partial label learning; reinforcement learning; transfer and multi-task learning; Bayesian optimization and few-shot learning. Part III: Combinatorial optimization; large-scale optimization and differential privacy; boosting and ensemble methods; Bayesian methods; architecture of neural networks; graph neural networks; Gaussian processes; computer vision and image processing; natural language processing; bioinformatics. Part IV: applied data science: recommendation; applied data science: anomaly detection; applied data science: Web mining; applied data science: transportation; applied data science: activity recognition; applied data science: hardware and manufacturing; applied data science: spatiotemporal data. Part V: applied data science: social good; applied data science: healthcare; applied data science: e-commerce and finance; applied data science: computational social science; applied data science: sports; demo track.

The Encyclopedia of Social Media and Politics explores how the rise of social media is altering politics both in the United States and in key moments, movements, and places around the world. Its scope encompasses the disruptive technologies and activities that are changing basic patterns in American politics and the amazing transformations that social media use is rendering in other political systems heretofore resistant to democratization and change. In a time when social media are revolutionizing and galvanizing politics in the United States and around the world, this encyclopedia is a must-have reference. It reflects the changing landscape of politics where old modes and methods of political communication from elites to the masses (top down) and from the masses to elites (bottom up) are being displaced rapidly by social media, and where activists are building new movements and protests using social media to alter mainstream political agendas. Key Features This three-volume A-to-Z encyclopedia set includes 600 short essays on high-interest topics that explore social media 's impact on politics, such as " Activists and Activism, " " Issues and Social Media, " " Politics and Social Media, " and " Popular Uprisings and Protest. " A stellar array of world renowned scholars have written entries in a clear and accessible style that invites readers to explore and reflect on the use of social media by political candidates in this country, as well as the use of social media in protests overseas Unique to this book is a detailed appendix with material unavailable anywhere else tracking and illustrating social media usage by U.S. Senators and Congressmen. This encyclopedia set is a must-have general, non-technical resource for students and researchers who seek to understand how the changes in social networking through social media are affecting politics, both in the United States and in selected countries or regions around the world.

Social media platforms do not just circulate political ideas, they support manipulative disinformation campaigns. While some of these disinformation campaigns are carried out directly by individuals, most are waged by software, commonly known as bots, programmed to perform simple, repetitive, robotic tasks. Some social media bots collect and distribute legitimate information, while others communicate with and harass people, manipulate trending algorithms, and inundate systems with spam. Campaigns made up of bots, fake accounts, and trolls can be coordinated by one person, or a small group of people, to give the illusion of large-scale consensus. Some political regimes use political bots to silence opponents and to push official state messaging, to sway the vote during elections, and to defame critics, human rights defenders, civil society groups, and journalists. This book argues that such automation and platform manipulation, amounts to a new political communications mechanism that Samuel Woolley and Philip N. Noward call "computational propaganda." This differs from older styles of propaganda in that it uses algorithms, automation, and human curation to purposefully distribute misleading

information over social media networks while it actively learns from and mimicks real people so as to manipulate public opinion across a diverse range of platforms and device networks. This book includes cases of computational propaganda from nine countries (both democratic and authoritarian) and four continents (North and South America, Europe, and Asia), covering propaganda efforts over a wide array of social media platforms and usage in different types of political processes (elections, referenda, and during political crises).

Globalization, Robotics, and the Future of Work

Drawing insights from nearly a decade of mixed-method research, Stephen R. Barnard analyzes Twitter 's role in the transformation of American journalism. As the work of media professionals grows increasingly hybrid,

Twitter has become an essential space where information is shared, reporting methods tested, and power contested. In addition to spelling opportunity for citizen media activism, the normalization of digital communication adds new channels of influence for traditional thought leaders, posing notable challenges for the future of journalism and democracy. In his analyses of Twitter practices around newsworthy events—including the Boston Marathon bombing, protests in Ferguson, Missouri, and the election of Donald Trump—Barnard brings together conceptual and theoretical lenses from multiple academic disciplines, bridging sociology, journalism, communication, media studies, science and technology studies, and political science.

"Digital technology will bring globalisation and robotics (globotics) to previously shielded professional and service sectors. Jobs will be displaced at the eruptive pace of digital technology while they will be replaced at a normal historical pace. The mismatch will produce a backlash - the globotics upheaval"--

Africana Race and Communication: A Social Study of Film, Communication, and Social Media focuses on the areas of History, Ethos, Motif, and Mythology-Philosophy. This study is an interdisciplinary study, which surveys the collection, interpretation, and analysis of Black communication and culture. Likewise, the intellectual dexterity of Africana Studies as an interdisciplinary body of knowledge postures alternative ways of probing Africana phenomena. This volume provides a categorical lens matrix of Africana Studies to locate race and communication in place, space, and time. Thus, it provides readers with a compilation of literary, historical, philosophical, and communicative essays that attempt to describe and evaluate the Africana experience from a centered perspective.

A brand new collection of tools for communicating with incredible power... 5 authoritative books, now

in a convenient e-format, at a great price! 5 eBooks help you supercharge all your verbal and written

communications with the most potent tool in the English language: power verbs! Electrify your

communications with the most compelling, commanding, and persuasive tools in the English language:

power verbs! In this five eBook collection, world-class communicators Dr. Michael Lawrence Faulkner

and Michelle Faulkner-Lunsford show how to choose and use the right power verbs for every situation --

to lead, win, and guide others to flourish. Jam-packed with examples from thousands of years of

storytelling, literature, and experience, Power Verbs for Career Consultants, Coaches, and Mentors gives

you the right language to help others find new strength and perseverance... celebrate successes and

kindle new sparks of possibility... transform obstacles into challenges that can and will be overcome.

Power Verbs for Presenters helps yousupercharge your presentations, speeches, and pitches -- and get

the results you want. Discover the right verbs to close sales, launch businesses, build and unite teams,

forge consensus, recruit contributors and volunteers, and craft winning PowerPoints® for business or

school. Power Verbs for Job Seekers helps youpowerfully demonstrate your value, attract employers, and

build the career you really want. Learn to craft outstanding r é sum é s, cover letters, and thank-you

notes... draw attention to your greatest achievements... ace face-to-face pitches and interviews... prove

you 're the one they 're looking for. Power Verbs for Managers and Executives helps you

communicate more effectively at all levels of the organization... energize teams and workforces... exude

passion and confidence that make others want to follow... drive home any message... catalyze change at

every level. Finally, Top 100 Power Verbs brings together the most powerful verbs for any situation -- in

business and beyond, with everyone, everywhere. Grab the right verb and use it the right way to express

strength, intelligence, and confidence... motivate action... become a truly unforgettable networker...

write crisp, focused documents ... strengthen your relationships with clients, customers, and investors...

become a more powerful, charismatic leader! From world-renowned communications and marketing

experts Dr. Michael Lawrence Faulkner and Michelle Faulkner-Lunsford

This book explores the changes in political communication in light of the development of a public

opinion mediated by web 2.0 technologies. One of the most important changes in political

communication is related to the process of disintermediation, i.e. the process by which digital

technologies allow citizens to compete in the public space with those agents who, traditionally, co-opted

public opinion. However, while disintermediation has undeniably generated a number of advances,

having linked citizens to the public debate, the authors highlight some aspects where disintermediation is

moving away from a rational and inclusive public space. They argue that these aspects, related to the

immediacy, polarization and incivility of the communication, obscure the possibilities for

democratization of digital political communication.
